Land Delivery for Low Income Groups in Third World Cities

Robert Jan Baken, J. J. van der Linden, 1992 This text provides an up to date broad and critical review of the literature on urban land supply in the Third World It deals with land supply systems as well as with policies and the experience with implementation of such policies It criticizes much present thinking on urban land issues attempts to find ways out of a current impasse in research which is divided into two schools applying either sociological anthropological or economic points of view and reviews innovative policies for overcoming some of the problems encountered in the application of traditional instruments of land policy *Second World Congress on Land Policy, 1983* World Congress on Land Policy Staff, Zoning and the American Dream Charles Monroe Haar, Jerold S. Kayden, 1989 This thoughtful book assesses just how well zoning is meeting its goals six decades after it was introduced Zoning and the American Dream finds grounds for both optimism and pessimism Though susceptible to gross misuse Haar and Kayden argue that zoning is still the most powerful tool available for shaping the environment in which we live and work The book starts before the Supreme Court's 1926 landmark decision in *Village of Euclid v Ambler Realty Company* with a look at the battles that prompted litigation It's a story of strong willed individuals surprising political coalitions and debate on some of the major philosophical issues of the Progressive era This great drama is recounted with flair and detail The dusty files of Ambler Realty Company's lawyers are exhumed to reveal the thinking behind the case We're given a lively first hand perspective of the unfolding trail strategy There's also a look at the personal backgrounds of major and minor players and an appendix with the complete text of the decision The book also explores the problematic sides of zoning for example its use for racial and class discrimination One chapter uncovers how some communities have even used zoning not only to exclude blacks but to destroy existing viable black neighborhoods by zoning for intrusive commercial and industrial uses The book casts a skeptical eye on increased judicial intervention in zoning as constitutional battles have involved judges more and more in the planning of American communities It also examines the pervasive impact of zoning on design and questions the compatibility of zoning and traditional economic theory *Zoning and the American Dream* is the first book that looks at zoning from every imaginable perspective historical physical design and planning sociological legal economic and political It's a useful reference for professionals And just a good read for anyone interested in the nature of American communities *Nature and Resources*, 1982 **American Book Publishing Record**, 1987
