## **Secret Life Of Buildings:**

The Secret Lives of Buildings Edward Hollis, 2009-11-10 A strikingly original beautifully narrated history of Western architecture and the cultural transformations that it represents Concrete marble steel brick little else made by human hands seems as stable as immutable as a building Yet the life of any structure is neither fixed nor timeless Outliving their original contexts and purposes buildings are forced to adapt to each succeeding age To survive they must become shape shifters In an inspired refashioning of architectural history Edward Hollis recounts more than a dozen stories of such metamorphosis highlighting the way in which even the most familiar structures all change over time into something rich and strange The Parthenon that epitome of a ruined temple was for centuries a working church and then a mosque the cathedral of Notre Dame was restored to a design that none of its original makers would have recognized Remains of the Berlin Wall meanwhile which was once gleefully smashed and bulldozed are now treated as precious relics With The Secret Lives of Buildings Edward Hollis recounts the most enthralling of these metamorphoses and shows how buildings have come to embody the history of Western culture Hollis exposes the surprisingly motley histories of some of the world's great landmarks The chapter on the Parthenon actually brought me to tears Jenna Russell *The Boston Globe* What a happy tingle of discovery to come across a book that differs sharply from all the others in its field Hollis thinks with such originality and writes with such flair that he is a pleasure to read Stanley Abercrombie *The American Scholar*

Obsolescence Daniel M. Abramson, 2016-02-12 In our architectural pursuits we often seem to be in search of something newer grander or more efficient and this phenomenon is not novel In the spring of 1910 hundreds of workers labored day and night to demolish the Gillender Building in New York once the loftiest office tower in the world in order to make way for a taller skyscraper The New York Times puzzled over those who would sacrifice the thirteen year old structure as ruthlessly as though it were some ancient shack In New York alone the Gillender joined the original Grand Central Terminal the Plaza Hotel the Western Union Building and the Tower Building on the list of just one generation s razed metropolitan monuments In the innovative and wide ranging Obsolescence Daniel M Abramson investigates this notion of architectural expendability and the logic by which buildings lose their value and utility The idea that the new necessarily outperforms and makes superfluous the old Abramson argues helps people come to terms with modernity and capitalism s fast paced change Obsolescence then gives an unsettling experience purpose and meaning Belief in obsolescence as Abramson shows also profoundly affects architectural design In the 1960s many architects worldwide accepted the inevitability of obsolescence experimenting with flexible modular designs from open plan schools offices labs and museums to vast megastructural frames and indeterminate building complexes Some architects went so far as to embrace obsolescence s liberating promise to cast aside convention and habit envisioning expendable short life buildings that embodied human choice and freedom Others we learn were horrified by the implications of this ephemerality and waste and their resistance eventually set the stage for our turn to sustainability the conservation rather than disposal of resources Abramson s fascinating tour of our idea of obsolescence culminates in an assessment of recent manifestations of sustainability from adaptive reuse and historic preservation to postmodernism and green design which all struggle to comprehend and manage the changes that challenge us on all sides

*YOU-TOPIA* Erik Veldhoen,2013 You Topia You topia is about people and about organisations It s about the future of our society You topia is not a utopia but is based largely on experience and evidence You topia is also a work of philosophy based on logical reasoning that is grounded in experience and evidence You topia is a call to action How can we become our own leaders in this promising seductive world You topia is above all else about the journey that we must make to regain the balance between desire and discipline It is a world in which people and organisations perform better and are therefore happier and more successful Let the journey to You topia begin There s no excuse to put it off any longer It will be worth your while Welcome to the new world You topia Your ideal space Because it s all about the choices that you make The moments you choose to do everyday things The places you choose to do your work The people you choose to meet The relevant discipline you choose to exercise The relevant energy you choose to spend The inspiration that you seek to achieve a satisfactory balance in your life This ideal place isn t yours alone however We share the place in order to do our everyday things You can choose time and again but your choices must always fit smoothly into the larger organisation to which you belong and into the turbulent society around you Ultimately everyone has to see to their own needs Everyone has to develop the discipline required to meet the obligations that they take upon themselves the

obligations they have towards themselves and towards their environment The choices we make in that respect will ultimately change the way we look at life And that might mean anything from orderly regularity to total chaos from an anarchical free state to a safe haven and from steady as a rock to Bacchanalian licentiousness We have to internalise the freedom we are given We have to combine the playing field and the rules of the game into a single formula and give them meaning If we do that respectfully and consciously then all will be well Ever since Frederick Taylor introduced his Principles of Scientific Management our work and our lives have been in the clutches of management You topia shows that severely curtailing our desire to manage everything will improve our lives Every individual can harness his or her own energy and master his or her productivity All organisations need do is facilitate this as best they can Not only is that possible but it is also going to happen because You topia is technology driven Without digitisation we would not have access to information any time anywhere Without the virtual workspace we would not be able to work whenever and wherever it suits us Modern technology has weaned us off desks and offices and rigid timetables It has forced us to reconsider time and place And time and place must be given new meaning in a future that will be entirely different from our post industrial era You topia channels this innovation in a particular direction by looking holistically at our new physical virtual and mental reality In You topia less really is more
