Staphylococcus aureus Toxins William R. Schwan, 2019-08-20 *Staphylococcus aureus* is a common inhabitant of the human body with which we co exist However this species can also cause disease in humans when an appropriate opportunity arises such as a cut or some other breakdown in our body s defenses *S aureus* is able to initiate infections due in part to the diverse group of toxins that they secrete The exotoxins produced by *S aureus* can cause direct damage thwart our own body s defenses or trigger massive amounts of cytokines that lead to indirect damage within the human body In this book are 12 research articles that deal with different aspects of staphylococcal exotoxins Some of the work gives an overview about how the toxins contribute to the disease process Other articles discuss different aspects of several exotoxins and two articles are centered on countermeasures against *S aureus* infections Overall this book will give the reader a good overview of how staphylococcal exotoxins contribute to initiating and sustaining infections in humans **Bacterial Pathogenesis** Brenda A.
