finding aids for electronic resources to the implementation of marketing strategies to increase support and strengthen service Reference Services for Archives and Manuscripts shows you how to thrive in the changing world of archival reference. Intended to foster an appreciation of the issues both within and beyond the field of archives Reference Services for Archives and Manuscripts reveals that today's archivist is straddling the world of the traditional with the world of the new. The book establishes its value as it guides you through new concerns such as how to take advantage of technological developments in appraisal, accession and preservation, address copyright, privacy and funding issues for electronic resources, mount archival cataloging records on local and wide area databases, create a publicly available site on the Internet, improve in-house access tools, professional abilities and the caliber of public service, address security issues and respond to theft. Reference Services for Archives and Manuscripts also helps you by preparing you for changes in the relationship between archivist and researcher that will inevitably occur with further changes in technology. Other vital issues discussed are improved access for unserved and underserved groups, a revision in ethical codes and the ability of archivists to become more customer centered.

Records in Africa Mpho Ngoepe, 2022-05-23. Managing Digital Records in Africa draws on the research work of the InterPARES Trust ITrust project that investigated interrelated archival issues focusing on legal analysis, infrastructure, trust, authentication and education within the African context. This research-focused book provides a legal analysis and systematic assessment of how African institutions manage digital records in four countries, i.e. Botswana, Kenya, South Africa and Zimbabwe. It also examines the extent to which records are managed using Internet-based applications, trust in such records and digital record authentication to support the auditing process. Finally, it provides a curriculum analysis in digital records at institutions of higher learning in 38 African countries. The book's case studies illustrate the threads of discussion which span the ITrust domains of legislation, infrastructure, authentication, trust and education in archives and records management. The book can be used as a premier reference source by private and public organizations, researchers, educators, archivists, records managers and postgraduate students to make informed decisions about digital records, records management systems, cloud

based services authenticating records and identifying universities on the continent that offer archival programmes The book may also find expression to practitioners in other fields such as law and auditing **Journal of the Senate of the United States of America** United States.
