Serving To Learn Learning To Serve Civics And Service From A To Z:

Serving to Learn, Learning to Serve Cynthia Parsons,1995-10 A major theme of education reform in the United States is that schools should prepare students to live in a democratic society To this end service learning is designed to encourage young people to become responsible caring citizens At present however service learning tends to be restricted to assigning students to community service projects In this book Cynthia Parsons argues that service learning should be regarded as part of not additional to school requirements She offers a range of alternative curriculum based examples of service learning to broaden the understanding and scope of this reform principle *Service Sociology and Academic Engagement in Social Problems* A. Javier Treviño,Karen M. McCormack,2016-04-01 This book challenges sociologists and sociology students to think beyond the construction of social problems to tackle a central question What do sociologists do with the analytic tools and academic skills afforded by their discipline to respond to social problems Service Sociology posits that a central role of sociology is not simply to analyse and interpret social problems but to act in the world in an informed manner to ameliorate suffering and address the structural causes of these problems This volume provides a unique contribution to this approach to sociology exploring the intersection between its role as an academic discipline and its practice in the service of communities and people With both contemporary and historical analyses the book traces the legacy characteristics contours and goals of the sociology of service shedding light on its roots in early American sociology and its deep connections to activism before examining the social context that underlies the call for volunteerism community involvement and non profit organisations as well as the strategies that have promise in remedying contemporary social problems Presenting examples of concrete social problems from around the world including issues of democratic participation poverty and unemployment student involvement in microlending disaster mitigation the organization and leadership of social movements homelessness activism around HIV AIDS and service spring breaks *Service Sociology and Academic Engagement in Social Problems* explores the utility of public teaching participatory action research and service learning in the classroom as a contribution to the community *Creative Writing Pedagogies for the Twenty-First Century* Alexandria Peary,Tom C Hunley,2015-05-22 The creative writing workshop has long been entrenched as the primary pedagogy of creative writing classes This book offers twelve different approaches to the teaching of creative writing to supplement or replace traditional workshop pedagogy Contributors are from both creative writing and composition studies a discipline rich with a wide range of established pedagogies **Resources in Education**,1997 **Voices of Strong Democracy** David Droge,Bren Ortega Murphy,2023-07-03 Eleventh in AAHE and Campus Compact s series on service learning in the disciplines this book focuses on incorporating service learning in communication one of the fastest growing disciplines in higher education The first part provides a strong argument on why service learning should be part of the communication curriculum while the second part dramatically demonstrates the ways in which service learning has a natural affinity for the communication discipline Projects That Matter Edmund Tsang,2023-07-03 This

book represents the 14th in the Service Learning in the Disciplines Series and concentrates on how service learning can be successfully incorporated in engineering programs a discipline to which is it relatively new Contributors to the volume are experienced in using service learning and address issues of concern to engineering educators As one peer reviewer commented The audience for this book is the engineering education community that community will expect practical applications of the theory that will lead to improved engineering education

Social Work and Service Learning Meryl Nadel, Virginia Majewski, Marilyn Sullivan-Cosetti, 2007 Service learning and social work education comprise an exciting yet underutilized partnership This book represents the first comprehensive overview of this active and empowering approach to learning in social work Both educators and practitioners will discover conceptual and practical guidance for developing productive community based projects Often envisioned as located at the midpoint on a continuum from volunteer work to internship service learning combines the opportunity to serve with the opportunity to learn It offers community agencies a chance to collaborate with academic colleagues to meet identified community needs frequently with an explicit social justice dimension The contributors illustrate how service learning facilitates students understanding and interacting with community members as partners not clients Service learning encourages students to use critical thinking skills to reflect on their work and its implications This combination of study action reflection in conjunction with course content is highly effective The book explores its subject from several perspectives The first section serves as a conceptual and theoretical orientation to service learning in social work The second section offers models that illustrate many ways of implementing service learning across the components of the social work curriculum The final two parts of the book focus on evaluation and service learning in the broader context of civic engagement
