Early Athens Eirini M. Dimitriadou, 2019-03-31 This volume is one of the most important works on ancient Athens in the last fifty years The focus is on the early city from the end of the Bronze Age ca 1200 BCE to the Archaic period when Athens became the largest city of the Classical period only to be destroyed by the Persians in 480 479 BCE From a systematic study of all the excavation reports and surveys in central Athens the author has synthesized a detailed diachronic overview of the city from the Submycenaean period through the Archaic It is a treasure trove of information for archaeologists who work in this period Of great value as well are the detailed maps included which present features of ancient settlements and cemeteries the repositories of the human physical record Over eighty additional large scale interactive maps are available online to complement the book Approaches to the Analysis of Production Activity at Archaeological Sites Anna K.

Hodgkinson, Cecilie Lelek Tvetmarken, 2020-03-05 Proceedings of a workshop held in Berlin 2018 focusing on manufacturing activities identified at archaeological sites New excavation techniques ethnographic research archaeometric approaches GIS experimental archaeology and theoretical issues associated with how researchers understand production in the past are presented here *A Poetics of Political Economy in Egypt* Kristin Koptiuch, Original in perspective innovative in approach this book investigates the changing relationship between Egypt's urban artisanry and the larger socio historical transformations of the Egyptian economy Focusing on two key historical periods in the early and late twentieth century Kristin Koptiuch examines the political and economic conditions that affected the role of the artisan in Egypt over time She is particularly interested in how the politics of representation in different modes of discourse colonialist nationalist developmentalist ethnographic have alternatively cast Egypt's craft production as outmoded artisanry and as an ingenious micro entrepreneurial informal sector In light of the artisans changing relation to the national and global economy Koptiuch reads this figurative shift from artisanry to informal sector as a political allegory that contradicts the dominant narratives of Egypt's colonial modernity and neocolonial postmodernity Attention to this allegorical figuration discloses what Koptiuch calls a poetics of political economy Contrary to conventional positivist social science realist ethnography and empiricist history this approach acknowledges the intricate mutual workings of meaning and material culture The Evolution of Ceramic Production Organization in a Maya Community Dean E. Arnold, 2015-02-15 In *The Evolution of Ceramic Production Organization in a Maya Community* Dean E Arnold continues his unique approach to ceramic ethnoarchaeology tracing the history of potters in Ticul Yucatán and their production space over a period of more than four decades This follow up to his

2008 work *Social Change and the Evolution of Ceramic Production and Distribution* uses narrative to trace the changes in production personnel and their spatial organization through the changes in production organization in Ticul. Although several kinds of production units developed, households were the most persistent units of production in spite of massive social change and the reorientation of pottery production to the tourist market. Entrepreneurial workshops, government sponsored workshops and workshops attached to tourist hotels developed more recently but were short lived, whereas pottery making households extended deep into the nineteenth century. Through this continuity and change, intermittent crafting, multi-crafting and potters increased management of economic risk also factored into the development of the production organization in Ticul. Illustrated with more than 100 images of production units, *The Evolution of Ceramic Production Organization in a Maya Community* is an important contribution to the understanding of ceramic production. Scholars with interests in craft specialization, craft production and demography as well as specialists in Mesoamerican archaeology, anthropology, history and economy will find this volume especially useful. [The Potter's Dictionary of Materials and Techniques](#) Frank Hamer, Janet Hamer, 2004-06-23 This book is an authoritative survey of all aspects of making ceramics for craft potters and ceramic artists. [Hagios Charalambos](#) Philip P. Betancourt, 2014-12-31 This is the first of five planned volumes to present the primary archaeological report about the excavation of the cave of Hagios Charalambos in eastern Crete. The Minoans used this small cavern as an ossuary for the secondary burial of human remains and grave goods primarily during the Early and Middle Bronze Age. The geography and geology surrounding the cave is discussed along with the methodology of the excavation. A portion of the pottery and all of the small finds are presented with many illustrations.

A Skilled Hand and Cultivated Mind Harriet Edquist, Elizabeth Grierson, 2008 *Cities Called Athens* Kevin F. Daly, Lee Ann Riccardi, 2014-12-18 The fourteen essays in this volume share new and evolving knowledge, theories and observations about the city of Athens or the region of Attica. The contents include essays on topography, architecture, religion and cult, sculpture, ceramic studies, iconography, epigraphy, trade and drama. This volume is dedicated to John McK Camp II to acknowledge the extraordinary impact he has had on the field of Greek archaeology through his work in the Athenian Agora as a scholar of ancient Greece and as Mellon Professor at the American School of Classical Studies. The contributors' work represents current research by the latest generation of scholars with ties to Athens. All of the contributors were students of Professor Camp in Greece and their essays are dedicated to him in gratitude for his profound influence on their lives and careers.
