It provides thoughtful reflections on the new struggles and opportunities instructors face in teaching gender and sex during what has been called the post feminist era. Building off its predecessor *Teaching Race and Anti Racism in Contemporary America*, this book offers complementary classroom exercises for teachers that foster active and collaborative learning. Through reflecting on the gendered dimensions of the current political economic and cultural climate as well as presenting novel lesson plans and classroom activities, *Teaching Gender and Sex in Contemporary America* is a valuable resource for educators.

Resources in Education, 2000 Gender Studies in Architecture Dörte Kuhlmann, 2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic, poststructuralist, and constructivist discourses, this book provides a comprehensive introduction to the problematics of gender and power in architectural and urban design. Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the underrepresentation of women in the planning profession to the integration of gender issues to the curriculum. The particular strengths of the book lie in its inclusiveness and critical analysis. It is not a partisan defence of feminism or any other theory, but a critical introduction to the issues relating to gender. Moreover, the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice. With its broad range and balanced analysis of different theories, the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment.

Teaching Sexuality and Religion in Higher Education Darryl W. Stephens, Kate Ott, 2020-04-19 This volume combines insights from secular sexuality education, trauma studies, and embodiment to explore effective strategies for teaching sexuality and religion in colleges, universities, and seminaries. Contributors to this volume address a variety of sexuality-related issues, including reproductive rights, military prostitution, gender fidelity, queerness, sexual trauma, and veiling from the perspective of multiple religious faiths. Christian, Jewish, and Muslim scholars present pedagogy and classroom strategies appropriate for secular and religious institutional contexts. By foregrounding a combination of perspective transformation and embodied learning as a means of increasing students' appreciation for the varied social, psychological, theological, and cultural contexts in which attitudes to sexuality develop, the volume posits sexuality as a critical element of teaching about religion in higher education. This book will be of great interest to graduate and postgraduate students, researchers, academics, and libraries in the fields of Religious Studies, Religious Education, Gender Sexuality, Religion Education, and Sociology of Religion.
