Sexing The Body: Gender Politics And The Construction Of Sexuality Anne Fausto-Sterling, 2000-02-10 Why do some people prefer heterosexual love while others fancy the same sex Is sexual identity biologically determined or a product of convention In this brilliant and provocative book the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced Drawing on astonishing real life cases and a probing analysis of centuries of scientific research Fausto Sterling demonstrates how scientists have historically politicized the body In lively and impassioned prose she breaks down three key dualisms sex gender nature nurture and real constructed and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and as such should not be forced to compromise their differences to fit a flawed societal definition of normality

Religious Boundaries for Sex, Gender, and Corporeality Alexandra Cuffel, Ana Echevarria, Georgios T. Halkias, 2018-10-09 The ambiguity concerning the interpretation of the physical body in religious thought is not peculiar to any given religion but is discernible in the scriptures practices and disciplines in most of the world's major religious traditions This book seeks to address the nuances of difference within and between religious traditions in the treatment and understanding of what constitutes the body as a carrier of religious meaning and or vindication of doctrine Bringing together an international team of contributors from different disciplines this collection addresses the intersection of religion gender corporeality and or sexuality in various Western and Eastern cultures The book analyses instances when religious meaning is attributed to the human body's physicality and its mechanics in contrast to imagined or metaphorical bodies In other cases it is shown that the body may function either as a vehicle or a hindrance for mystical knowledge The chapters are arranged chronologically and across religious orientations to offer a differentiated view on the body from a global perspective This collection is an exciting exploration of religion and the human body As such it will be of great interest to scholars in religious studies theology Islamic studies South Asian studies history of religions and gender studies

Body and Gender Roberta Sassatelli, Rossella Ghigi, 2023-12-11 Even though we often think

of bodies as natural and given or else as freely plastic objects bodies are both constructed and fundamental to our sense of self This book investigates the body as an essential vector of inequality shaped by institutions interaction and culture and how in turn it contributes to partly modify them Sassatelli and Ghigi show how the process of embodiment is at the same time naturalized and contested particularly evident in the case of gender Drawing on classical sociological research about modernity and contemporary studies that emphasize intersectionality the book looks at how the gendered body has been conceptualized with special attention to body politics the power of appearance and the representation of embodied identity It also considers the interplay between body sex and sexuality and the way gendered bodies intersect with other dimensions of social inequality such as race age class and disability This exploration of the rich field of sociological inquiry into the gendered body will be an invaluable read for all seeking to understand gender sexuality and embodiment in contemporary society

Sex, Gender and International Human Rights Law Giovanna Gilleri, 2023-12-01 This book investigates the relationship between sex and gender under international human rights law and how this influences the formation of individual subjects Combining feminist queer and psychoanalytical perspectives the author scrutinises the sexed gendered human rights discourse starting from the assumptions underpinning interpretations of sex gender and the related notions of gender identity sex characteristics and sexual orientation Human rights law has so far offered only a limited account of the diversity of sexed gendered subjectivities being based on a series of simplistic assumptions Namely that there are only two sexes and two genders sex is a natural fact and gender is a social construct gender is the metonymic signifier for women and gender power relations take the asymmetrical shape of male domination versus female oppression Against these assumptions dominative and subordinate postures interchangeably attach to femininities and masculinities depending on the subjects roles their positionalities and the situational meanings of their acts The limits of an approach to gender which is based on rigid binaries are evident in two case studies on the UN human rights treaty bodies vocabulary on medically unnecessary interventions upon intersex children and on the European Court of Human Rights narrative on sadomasochism This examination of the impact of human rights on gendered subjectivities will be of interest to scholars students and researchers in international law gender studies queer studies cultural studies critical race theory and psychoanalysis

Sexuality, Gender and Schooling Mary Jane Kehily, 2005-06-29 The sexuality of young people arouses controversy and remains a source of concern for parents teachers policy makers and politicians But what young people really think about sexuality and gender and how these issues impact upon their lives is often marginalized or overlooked Based upon extensive ethnographic research with young people and teachers *Sexuality Gender and Schooling* offers a telling and insightful account of how young people

acquire sexual knowledge and how they enact their understanding of their own gender. It highlights the ways in which young people's constructions of gender and sexuality are formed outside the school curriculum through engagements with various forms of popular culture such as teen magazines and television programmes and through same sex friendship groups. Offering a fresh perspective on a subject of perennial interest and concern, *Sexuality, Gender and Schooling* provides accounts from the inside, some of which may challenge and eclipse current approaches to sexuality education. It has significant implications for policy and practice in Personal Social and Health Education and is also an excellent introduction to key debates and issues in the study of gender and sexuality.

Handbook on Sex, Gender and Health M. Sivakami, Anjana Bhushan, Sabina Faiz Rashid, Kausar S. Khan, 2025-01-27 This Handbook is the first of its kind addressing gender issues in health in five countries of the South Asian Region namely Bangladesh, India, Pakistan and Sri Lanka. Adopting a social determinant of health perspective and an intersectionality and diversity lens, the Handbook illustrates the multi-layered complexities of gender health and well-being from the diverse perspectives and lived experiences in different South Asian countries. It includes studies on under-researched and often invisible marginalized populations such as LGBTQI populations, urban poor persons living with disability, migrant and conflict-affected populations. It represents the voices of the elderly, adolescents and young people. It goes beyond analyzing the problem of gender inequities in health and presents examples of gender transformative policies, programmes and social movement action. It is an essential resource for researchers, policy makers, students in public health and community-based organizations involved in research policies or programs related to sex work, public health, social justice and gender-based violence.

Challenging Popular Myths of Sex, Gender and Biology Malin Ah-King, 2013-11-27 This edited volume challenges popular notions of sex, gender and biology and features international transdisciplinary research. The book begins with an exploration of supposedly natural sexual differences, then looks at research in evolutionary biology and examines topics such as gender stereotypes in humans. The first chapters explore important questions: What are the fundamental sex differences? How do genes and hormones influence an individual's sex? Subsequent chapters concern topics including sex stereotypes in the field of sexual conflict, how the focus on genes in evolutionary biology disregards other means of inheritance and the development of Darwin's theory of sex differences. The last three chapters look at humans, discussing an interdisciplinary approach to the evolution of sex differences in body height, biological versus social constructive perspectives on the gendering of voices and nature/culture arguments in the current political debate on paternity leave in Norway.
