**Tearing the Social Fabric** Pádraig Risteard Carmody, 2001. As the second most industrially developed economy in Sub-Saharan Africa, World Bank officials argued that Zimbabwe could be the first African country to succeed with economic liberalization. However, the experience of structural adjustment was disastrous as it led to widespread deindustrialization. In contrast to predictions, a World Bank International Monetary Fund program led to the collapse of industries it was meant to promote: textiles, clothing, and footwear. This book examines the reasons behind this seeming paradox through an in-depth case study of the experience of textiles, clothing, and footwear sub-sectors in Zimbabwe under structural adjustment. Economic liberalization failed because it did not relate to the local economic context. This failure led to autonomous development of the trade and financial sectors to the detriment of production. The economic crisis that resulted is a critical factor behind recent political instability and the current crisis of governance in Zimbabwe. Pádraig Carmody argues that alternatives must be based on a better understanding of the local politico-economic context in Zimbabwe.

*Contending Issues in African Development* Obioma M. Iheduru, 2001-02-28. Taking a forward-looking approach, this book critically examines the issues and dynamics central to Africa's problematic development and situates these issues within the continent's unique cultural, political, economic, and social milieu. Moving away from a simple litany of problems bedeviling Africa's economy, the book is the culmination of several scholars' efforts to identify specific causative factors. Each chapter delineates a specific issue, demonstrates the role it plays in overall development, and speculates on probable ways to meet the challenges it poses. The major conceptual and epistemological constructs considered include the tamed African State, social capacity, management of change, reconceptualized gender roles, and economic integration. Although the contributors' various approaches diverge and disagree, the epistemological variations contribute cumulatively to an understanding of the issues at the root of Africa's slow pace of development. While traversing the spectrum of issues that affect development, the book uniquely points out that the management of change is pivotal to fostering development. The authors' efforts provide a useful base for future research and help to chart a course of action leading to success in the 21st century.

Corruption, Politics and Development H. Marquette, 2003-11-04. In 1997, the World Bank announced a strategy to help its borrowers combat corruption, despite earlier claims that work of this kind violated the Bank's non-political mandate. Despite many attempts to

reshape corruption as an economic issue rather than a political one the non political mandate has never been satisfactorily addressed Heather Marquette argues that the Bank should focus in its strengths and avoid the more controversial components of its anti corruption programme which threaten its credibility
