Longman Geography Contexts Students Longman Secondary Geography:

Environmental and Geographical Education for Sustainability Zijian Li, Michael Williams, 2006 Geography environment sustainability culture and education standing alone or in any combination provide the ingredients for a variety of stews They are all difficult to define and they generate endless debates for theoreticians and practitioners about their meaning and significance The editors have divided the chapters that follow into two parts in an effort to unit these diverse disciplines Part 1 is concerned with cultural foundations and curriculum issues related to geographical and environmental education for sustainability Part 2 comprises a series of chapters presenting education for sustainability in the contexts of national cultures *Science Education in International Contexts* May M. H. Cheng, Winnie W. M. So, 2011-10-23 This book presents an international perspective on examining and putting into practice new innovations in science education The chapters are organized into three parts each of which addresses a key area in science education research Part I of this book Students conceptual understanding of science addresses issues related to the identification of students science concepts and the influence of everyday understandings on the construction of science concepts Part II Making science concepts plausible for students addresses the pedagogical concerns of teachers in making science ideas plausible and logical for their students Part III Science teacher learning reports on science teacher learning in Australia and Hong Kong The focus is on the interaction between research and implementation or how theory can be realized in classroom practice with contributions from both non Western and non English speaking contexts and Western and English speaking countries Taken together the papers have a common focus on the relationship or integration of theory and practice in science education They demonstrate a concern to address education reform directions putting into practice recommendations from science education research and improving the quality of science education The contributors of this book come from seven different areas around the world These contributions have been essential in making the discussions in this book multi perspective and relevant to an international audience thus allowing it to emerge to join the international discourse on improving science education The studies reported in this book provide insights for future research addressing science education reform directions students learning needs and different classroom contexts The discussions and the findings reported are relevant to science educators teachers student teachers graduate students in education curriculum developers and those responsible for education policy

The Making Of The Curriculum Ivor F Goodson, 2002-11-01 The first edition of *The Making of Curriculum* was published in 1988 and reviewers hailed it as a seminal work in the field In that work Goodson explored a number of aspects of the so called traditional subjects and described the way they develop over time to a point where they can be promoted as academic disciplines He showed that the claim to be academic was in fact the result of a substantial political contest covering a century or more The traditional subject was in short invented The first edition of this book provided a series of challenging insights for those desiring to make sense of the current debate over schooling In this new and extended second edition Bill

Pinar adds an illuminating introduction and Goodson brings his argument up to date with a discussion of the National Curriculum a contemporary initiative in the making of curriculum

Space, Place and Scale in the Study of Education Lorraine Symaco, Colin Brock, 2017-10-02 The term space is inherently geographical Educational provision and activity takes place within spaces ranging from a room at home or in a school to a campus to an administrative area which could be a state within a country a whole country or a group of countries Such

spaces are known as geographical surfaces Within these spaces the process of learning and teaching takes place at particular points that are often nodes in a network which may be formal such as a group of schools or universities or non formal such as in cyberspace Understanding what goes on depends on the scale at which it is observed ranging from individuals to global outreach Altogether this constitutes the geography of educational reality This comprehensive volume includes a theoretical background plus a sample of situations including school level policy and administration inequitable access education hubs and small states It offers an introduction to a relatively neglected member of the family of education foundation disciplines the geography of education This book was originally published as a special issue of Comparative Education Discourse in Content and Language Integrated Learning (CLIL) Classrooms Christiane Dalton-Puffer, 2007-09-27 The label CLIL stands for classrooms where a foreign language English is used as a medium of instruction in content subjects This book provides a first in depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms It examines teacher and student talk at secondary school level from different discourse analytic angles taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context which in turn conditions the ways in which students experience use and learn the target language The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners appropriation of a foreign language as a medium of learning *Victorian Science in Context* Bernard Lightman, 2008-07-31 Victorians were fascinated by the flood of strange new worlds that science was opening to them Exotic plants and animals poured into London from all corners of the Empire while revolutionary theories such as the radical idea that humans might be descended from apes drew crowds to heated debates Men and women of all social classes avidly collected scientific specimens for display in their homes and devoured literature about science and its practitioners *Victorian Science in Context* captures the essence of this fascination charting the many ways in which science influenced and was influenced by the larger Victorian culture Contributions from leading scholars in history literature and the history of science explore questions such as What did science mean to the Victorians For whom was Victorian science written What ideological messages did it convey The contributors show how practical concerns interacted with contextual issues to mold Victorian science which in turn shaped much of the relationship between modern science and culture *Handbook of Historical Studies in Education* Tanya Fitzgerald, 2020-04-03 This book offers an in depth historiographical and comparative analysis of prominent theoretical and methodological debates in the field Across each of the sections contributors will draw on specific case studies to illustrate the origins debates and tensions in the field and overview new trends directions and developments Each section includes an introduction that provides an overview of the theme and the overall emphasis within the section In addition each section has a concluding chapter that offers a critical and comparative analysis of the national case studies presented As a Handbook the

emphasis is on deeper consideration of key issues rather than a more superficial and broader sweep The book offers researchers postgraduate and higher degree students as well as those teaching in this field a definitive text that identifies and debates key historiographical and methodological issues The intent is to encourage comparative historiographical perspectives of the nominated issues that overview the main theoretical and methodological debates and to propose new directions for the field

Routledge Revivals: Schooling Ordinary Kids (1987) Phillip Brown, 2018-02-01 Originally published 1987 Schooling Ordinary Kids looks at the invisible majority of ordinary working class pupils The book explains why these pupils are now at the centre of a major educational crisis surrounding the soaring rates of youth

unemployment The book is a timely examination of educational inequalities unemployment and the new vocationalism
Drawing extensively the study of schools in the urban centre of South Wales the book highlights the need for an alternative
politics of education if we were to meet the educational challenge of the late twentieth century The new vocationalism is
revealed here as a policy for inequality both politically and in the classroom **British Book News** British Council, 1991
