The Fall of the House of Labor David Montgomery, 1987-08-28 This book studies the changing ways in which American industrial workers mobilised concerted action in their own interests between the abolition of slavery and the end of open immigration from Europe and Asia Sustained class conflict between 1916 and 1922 reshaped governmental and business policies but left labour largely unorganised and in retreat The House of Labor so arduously erected by working class activists during the preceeding generation did not collapse but ossified so that when labour activism was reinvigorated after 1933 the movement split in two These developments are analysed here in ways which stress the links between migration neighbourhood life racial subjugation business reform the state and the daily experience of work itself

Almost All Aliens Paul Spickard, Francisco Beltrán, Laura Hooton, 2022-09-15 Almost All Aliens offers a unique reinterpretation of immigration in the history of the United States Setting aside the European migrant centered melting pot model of immigrant assimilation Paul Spickard Francisco Beltrán and Laura Hooton put forward a fresh and provocative reconceptualization that embraces the multicultural racialized and colonially inflected reality of immigration that has always existed in the United States Their astute study illustrates the complex relationship between ethnic identity and race slavery and colonial expansion Examining the lives of those who crossed the Atlantic as well as those who crossed the Pacific the Caribbean and the North American Borderlands Almost All Aliens provides a distinct inclusive and critical analysis of immigration race and identity in the United States from 1600 until the present The second edition updates Almost All Aliens through the first two decades of the twenty first century recounting and analyzing the massive changes in immigration policy the reception of immigrants and immigrant experiences that whipsawed back and forth throughout the era It includes a new

Poston Jr.,David Yaukey,2013-11-11 Student interested in world populations and demography inevitably need to know China As the most populous country of the world China occupies a unique position in the world population system How its population is shaped by the intricate interplays among factors such as its political ideology and institutions economic reality government policies sociocultural traditions and ethnic divergence represents at once a fascinating and challenging arena for investigation and analysis Yet for much of the 20th century while population studies have developed into a mature science precise information and sophisticated analysis about the Chinese population had largely remained either lacking or inaccessible first because of the absence of systematic databases due to almost uninterrupted strife and wars and later because the society was closed to the outside observers for about three decades since 1949 Since the end of the Cultural Revolution things have dramatically changed China has embarked on an ambitious reform program where modernization became the utmost goal of societal mobilization China could no longer afford to rely on imprecise census or survey information for population related studies and policy planning nor to remaining closed to the outside world Both the gathering of more precise information and access to such information have dramatically increased in the 1980s Systematic observations analyses and reporting about the Chinese population have surfaced in the population literature around the globe *Empress San Francisco* Abigail M.
