

THE 5 THEMES OF GEOGRAPHY

The Five Themes of Geography make it EASY to analyze any place on Earth!

LOCATION

Where on Earth is it?

Give exact or absolute locations by using latitude and longitude. Give relative locations by describing what's nearby. For example, New York City is on the east coast of the United States.

PLACE

What are its characteristics? What's it like? What makes it unique?

New York City is home to the Statue of Liberty, the Empire State Building and millions of diverse people.

MOVEMENT

How do people, goods, and ideas get from place to place?

Many New Yorkers ride the subway, reading the *New York Times* on the way.

HUMAN / ENVIRONMENT INTERACTION

How do the people change the environment? How does the environment affect how people live?

In 2012, Hurricane Sandy caused a lot of damage in New York.

REGIONS

How is it divided into areas of similar characteristics? What other places does it share characteristics with?

New York is divided into five boroughs. Wall Street is a financial "region" in NY.

Manufacturers' Record, 1919 *Ethics in Everyday Places* Tom Koch, 2022-11-01 An exploration of moral stress distress and injuries inherent in modern society through the maps that pervade academic and public communications worlds In *Ethics in Everyday Places* ethicist and geographer Tom Koch considers what happens when as he puts it you do everything right but know you've done something wrong The resulting moral stress and injury he argues are pervasive in modern Western society Koch makes his argument from the ground up from the perspective of average persons and through a revealing series of maps in which issues of ethics and morality are embedded The book begins with a general grounding in both moral stress and mapping as a means of investigation The author then examines the ethical dilemmas of mapmakers and others in the popular media and the sciences including graphic artists journalists researchers and social scientists Koch expands from the particular to the general from mapmaker and

journalist to the readers of maps and news He explores the moral stress and injury in educational funding poverty and income inequality Why aren't we angry that one in eight fellow citizens lives in federally certified poverty transportation modeling seen in the iconic map of the London transit system and the hidden realities of exclusion and U S graft organ transplantation This uniquely interdisciplinary work rewrites our understanding of the nature of moral stress distress and injury and ethics in modern life Written accessibly and engagingly it transforms how we think of ethics personal and professional amid the often conflicting moral injunctions across modern society Copublished with Esri Press **Ordinary Matters** Lorraine Sim,2016-10-20 The first major interdisciplinary study of the ordinary in modernist women's literature and photography that demonstrates how their alternative vision of the everyday extends and often complicates that of their male contemporaries as well as contemporary everyday life theory ENC Focus ,2000 *Mathematics & Science in the Real World* ,2000 *Narrating the Multispecies World* Michaela Fenske,2025-04-17 In present times we are increasingly witnessing a loss of life especially among animals and plants Some species are becoming extinct while others struggle to adjust to new habitats Human beings are looking for strategies to overcome the effects of climate change and mass extinction The contributors to this volume reflect on how the current problems affect the living world Artists and scholars from around the world share their views on the changes and challenges produced by the effects of the ecological crises in a variety of regions While some of their stories concern loss others offer hope by suggesting new ideas for living together in sustainable harmony within a multispecies world **The Scottish Educational Journal** ,1961 **Wild Things** Judy Attfield,2020-08-20 What do things mean What does the life of everyday objects reveal about people and their material worlds Has the quest for the real thing become so important because the high tech world of total virtuality threatens to engulf us This pioneering book bridges design theory and anthropology to offer a new and challenging way of understanding the changing meanings of contemporary human object relations The act of consumption is only the starting point of object's lives Thereafter they are transformed and invested with new meanings and associations that reflect and assert who we are Defining designed things as things with attitude differentiates the highly visible fashionable object from ordinary artefacts that are too easily taken for granted Through case studies ranging from reproduction furniture to fashion and textiles to clutter the author traces the connection between objects and authenticity ephemerality and self identity Beyond this she shows the materiality of the everyday in terms of space time and the body and suggests a transition with the passing of time from embodiment to disembodiment **Communication in Everyday Life** Steve Duck,David T. McMahan,2016-12-01 Explore fundamental communication concepts theories and skills aimed at helping students apply communication skills to their personal and professional lives with a thematic integration of the relational perspective and a focus on demonstrating its direct relevance to their own everyday communication **What the World Might Look Like** Susie O'Brien,2024-05-14 The idea of resilience is everywhere these days offering a framework for thriving in volatile times Dominant resilience stories

share an attachment to a mythologized past thought to hold clues for navigating a future that is understood to be full of danger These stories also uphold values of settler colonialism and white supremacy What the World Might Look Like examines the way resilience thinking has come to dominate the settler colonial imagination and explores alternative approaches to resilience writing that instead offer decolonial models of thought The book traces settler colonial resilience stories to the rise of resilience science in the 1970s and 1980s illustrating how the discipline supports the projects of white supremacy and colonialism Working to unravel the blanket of common sense that shrouds the idea of resilience the book is equally cautious of settler colonial antiresilience stories that invoke the idea of death as an antidote to unbearable life Susie O'Brien argues that although the dominant narratives of resilience are problematic resilience itself is neither inherently good nor inherently bad Appreciating the significance of resilience stories requires asking what worlds and what communities they are meant to preserve Looking at the fiction of Alexis Wright David Chariandy and Leanne Betasamosake Simpson O'Brien points to the potential of Black and Indigenous thinking around resilience to figure decolonial possibilities for planetary flourishing Exposing the complexities and limits of resilience What the World Might Look Like questions the concept of resilience highlighting how Black and Indigenous novelists can offer different decolonial ways of thinking about and with resilience to imagine things otherwise

Design and Feminism Joan Rothschild, Alethea Cheng, 1999 The distinction between the spaces considered public and private or work and home is becoming more blurred Our streets parks dwellings and tools are designed to a one size fits all standard and the responses of the design community to meet diverse needs have been mixed at best Design and Feminism offers feminist critiques of these inadequate design standards and suggest ideas projects and programs for change
