Wisniewski, 2020-10-04 A readable guide to the art of looking at art There s an art to viewing art A sizable portion of the population regards art with varying degrees of reverence bewilderment suspicion contempt and intimidation Most people aren t sure what to do when standing before a work of art besides gaze at it for what they hope is an acceptable amount of time and even those who visit galleries and museums regularly aren t always as well versed as they wish they could be This book will help remedy that situation and answer many of the most frequently asked questions pertaining to the matter of art in general When was the first art made Who decides which art is for the ages What is art s purpose How do paintings get to be worth tens of millions of dollars Where do artists get their ideas And perhaps the most pressing question of all have human cadavers ever been used as art materials Yup The Art of Looking at Art addresses these and countless more of the issues surrounding this frequently misunderstood microcosm in a highly informative yet conversational tone History fascinating and altogether human backstories and information pertaining to every conceivable aspect of visual art are interwoven in twelve concise chapters providing all the information the average person needs to comfortably approach analyze and appreciate art Readers with a background in art will learn a few new things as well This beautiful full color book includes 45 full page reproductions      *Looking into Walt Whitman: American Art, 1850-1920* , 2006      **Paintings and**

**Sculptures: Where Do We Look First?** Magali Seille, Zoi Kapoula, 2023-05-16 The book presents three studies in which eye tracking data were collected at the Mus e des Beaux Arts in Rouen in June and July 2013 Overall the results of those three studies highlight the knowledge gained from the analysis of the very first saccade in a museum context when people look at paintings and statues The first study analyzes how viewers orient their first saccade on paintings This study shows that in a museum the first saccade is attracted toward the center of paintings This attraction toward the paintings center is found in all the subjects groups that we have studied Noteworthy this effect is significantly less pronounced in individuals who never visit museums It is among amateurs who often visit museums that the center attracts the most the first saccade Among experts painters or art history teachers and to a lesser extent among amateurs the pictorial composition largely determines the orientation of the first saccade We indeed found that as soon as the first saccade experts orient their gaze toward the main subject This phenomenon seems to be explained by the fact that experts immediately orient their gaze here measured as the first saccade toward the paintings location conveying the most meaning It can either be the center or a peripheral area depending on whether the paintings most meaningful subject is located centrally or peripherally The second study shows that the center does not attract the first saccade in 5 year old children This behavior appears later in 8 to 10 year old children

However noticeably the 8 10 year old children orient significantly less frequently their first saccade toward the paintings center as adults do and this is also true when one considers non expert adult viewers The results of the third study focus on statues and reveal a very different oculomotor behavior Indeed rather than looking at the center statues viewers exhibit a clear tendency to saccade first at the statues contours This stands in contrast with the behavior that we observe with paintings Our study concludes that statues trigger a specific oculomotor behavior The latter appears to be mostly driven by the physical presence that stone bodies incarnate The movement and the climax of this movement that sculptors manage to convey thus turn out to attract the gaze in a unique fashion The book concludes that the first saccade is a powerful indicator of the oculomotor behavior that greatly improves our comprehension of the unique relationship between a viewer and artworks

**Slow Painting** Helen Westgeest, 2020-10-29 The abundance of images in our everyday lives and the speed at which they are consumed seems to have left us unable to critique them To rectify this situation artists such as Daniel Richter Jaune Quick to See Smith and Artur Zmijewski have demonstrated that painting is brilliantly equipped to produce slow images that enable encourage and reward reflection In this book Helen Westgeest attempts to understand how various forms of slow painting can be used as tools to interrogate the visual mediations we encounter daily Painting was expected to disappear in the digital age but through interactive painting performances and painting like manipulated photographs and videos Westgeest shows how photography video and new media art have themselves developed the visual strategies that painting had already mastered Moreover the fleeting nature of digital mass media appears to have unlocked a desire for more physically stable and enduring pictures like paintings Slow Painting charts how in a world where the constant quest for speed can leave us exhausted the appeal of this slower medium has only grown
