**The Holy Land in Transit** Steven Salaita, 2015-02-01 Steven Salaita's ambitious and thought provoking work compares the dynamics of settler colonialism in the United States related to Native Americans with the circumstances in Israel related to the Palestinians revealing the way in which politics influences literary production. The author's original approach is based not on similarities between the two disparate settler regions but rather on similarities between the rhetoric employed by early colonialists in North America and that employed by Zionist immigrants in Palestine. Meticulously examining histories, theories and literary depictions of colonialism and its interethnic dialects, Salaita identifies the commonalities in the myths employed by both groups as well as the counter discourse cultivated in the literature of resistance by native peoples. He complements his analysis with personal observations of Palestinians in Lebanese refugee camps where he encountered a sympathetic perception of American Indians. *The Holy Land in Transit* presents one of the first intercommunal studies to assess the ways in which indigenous authors react to analogous colonial dynamics. With great perception and energy, the author offers a fresh contribution to an emerging frame of reference for historical, political, literary and cultural investigation.

**Rockburst in Extra-Thick Coal Seam Mining: Mechanism and Prevention** Sitao Zhu, Fuxing Jiang, Xiufeng Zhang, Jinhai Liu, 2024-08-02 This book provides a detailed introduction to the mechanism of rockburst in extremely thick coal seam mining and explores the mechanical mechanism on why the critical depth of rockburst in extremely thick coal seam mining is significantly smaller than that in thin to thick coal seams. It also proposes targeted monitoring, warning and treatment technologies. The prevention and control of coal mine rockburst is a global problem attracting engineers and scientists from various disciplines such as mining geology, geophysics and civil engineering to conduct research. This book provides multiple case studies of rockburst accidents in mining of ultra thick coal seams and provides a detailed analysis of the mechanisms and treatment technologies of each rockburst accident. It aims at graduate students, researchers and on site engineers who are interested in the mechanism of rockburst occurrence, monitoring, early warning and treatment technology. The translation was done with the help of artificial intelligence. The present version has been revised technically and linguistically by the authors in collaboration with a professional translator.
