Landless Households in Rural Europe, 1600-1900 Christine Fertig, Richard Paping, Henry French, 2022 First comparative study of landless households brings out their major role in European history and society The numbers of landless people those lacking formal rights to land or possessing only tiny smallholdings grew rapidly across post medieval Europe as rural population and economic growth divided landowners and farmers from increasingly landless rural workers But they have hitherto been relatively neglected a gap which this volume covering Scandinavia Germany Austria Netherlands Belgium Britain France and Spain from the sixteenth to the early twentieth centuries aims to fill making creative use of a diverse range of unexplored sources Instead of concentrating on the well documented cases of landholding peasants it

explores the many different experiences of the numerous rural landless. It explains how their households were formed often in the face of economic difficulties and official hostility; how all the members of a family contributed to its survival; how the landless related to other social groups and negotiated access to vital resources; and how they adapted as rural society was changed by war, politics, agrarian and industrial development, government policy, and welfare systems.

Gender in Scottish History Since 1700 Lynn Abrams, 2006-01-25. Scottish history is undergoing a renaissance. Everyone agrees that an understanding of our nation's history is integral to our experience of its present and the shaping of the future. But the story of Scotland's past is being told with little reference to gendered identities. Not only are women largely missing from these grand narratives, but men's experience has tended to be sublimated in intellectual, political, and economic agendas. Neither femininities nor masculinities have been given much of a place in Scotland's past or in the process of nation making. *Gender in Scottish History* offers a new perspective on Scotland's past since around 1700, viewing some of the main themes with a gendered perspective. It starts from the assumption that gender is integral to our understanding of the ways in which societies in the past were organised, and that national histories have a tendency to be gender blind. Each chapter engages

with one key theme from Scottish historiography asking what happens when women are added to the story and how the story changes when the meanings of gendered understandings and assumptions are probed Addressing politics culture religion science education work the family and identity Gender in Scottish History proposes an alternative reading of the Scottish past which is both inclusive and recognisable Human Population Dynamics Helen Macbeth,Paul Collinson,2002-06-20 In human populations biological social spatial ecological and economic aspects of existence are inextricably linked demanding a holistic approach to their study Many undergraduate and postgraduate courses now emphasise the value of studying human populations using theoretical frameworks and methodologies from different traditional disciplines Human Population Dynamics introduces such frameworks and methodologies whilst demonstrating how changes in human population structure can be addressed from several different academic perspectives As such the book contains contributions from world renowned researchers in demography social and biological anthropology genetics biology sociology ecology history and human geography In particular the contributors emphasise the lability of many population structures and boundaries as viewed from their area of expertise This text is aimed at undergraduate students graduates and academic researchers from any academic discipline which considers human populations *Rethinking the Great Transition* Peter L. Larson,2022 This case study of two rural parishes in County Durham England provides an alternate view on the economic development involved in the transition from medieval to modern partly explaining England s rise to global economic dominance in the seventeenth century Coal mining did not come to these parishes until the nineteenth century these are an example of agrarian expansion Low population favourable seigniorial administration and a commercialised society saw the emergence of large farms on the bishopric of Durham soon after the Black Death these secure copyhold and leasehold tenures were among the earliest known in England Individualism developed within a strong parish and village community that encouraged growth while enforcing conformity tenants had freedom to farm as they wished within limits Along with low rents this allowed for a swift expansion of agricultural production in the sixteenth century as population rose and then as the coal trade expanded rapidly The prosperity of these men is reflected in their lands livestock and consumer goods Yet not all shared in this prosperity as the poor and landless increased in number simply by population growth Through reformation and rebellion these and other parishes prospered without experiencing severe disruption or destruction In north eastern England agrarian development was an evolution and not a revolution This study shows England s economic development as a single narrative woven together from a collection of regional experiences at different times and at different speeds **Capital Women** Jan Luiten van Zanden,Tine De Moor,Sarah Carmichael,2019-02-14 This book demonstrates that women have been and key to understanding processes of development and explores the importance of greater gender equality for financial markets religious institutions and human capital formation *History of Everyday Life in Twentieth-Century Scotland* Lynn Abrams,2010-02-28 Over the twentieth century Scots lives changed in fast dramatic and culturally significant ways By

examining their bodies homes working lives rituals beliefs and consumption this volume exposes how the very substance of everyday life was composed tracing both the intimate and the mass changes that the people endured Using novel perspectives and methods chapters range across the experiences of work art and death the way Scots conceived of themselves and their homes and the way the old Scotland of oppressive community rules broke down from mid century as the country reinvented its everyday life and culture This volume brings together leading cultural historians of twentieth century Scotland to study the apparently mundane activities of people's lives traversing the key spaces where daily experience is composed to expose the controversial personal and national politics that ritual and practice can generate Key features Contains an overview of the material changes experienced by Scots in their everyday lives during the course of the century Focuses on some of the key areas of change in everyday experience from the way Scots spent their Sundays to the homes in which they lived from the work they undertook to the culture they consumed and eventually the way they died Pays particular attention to identity as well as experience

Similarity in Difference Christer Lundh, Satomi Kurosu, 2014-12-12 A study of marriage in preindustrial Europe and Asia that goes beyond the Malthusian East West dichotomy to find variation within regions and commonality across regions Since Malthus an East West dichotomy has been used to characterize marriage behavior in Asia and Europe Marriages in Asia were said to be early and universal in Europe late and non universal In Europe marriages were supposed to be the result of individual choices but in Asia decided by families and communities This book challenges this binary taxonomy of marriage patterns and family systems Drawing on richer and more nuanced data the authors compare the interpretations based on aggregate demographic patterns with studies of individual actions in local populations Doing so they are able to analyze simultaneously the influence on marriage decisions of individual demographic features socioeconomic status and composition of the household and local conditions and the interactions of these variables They find differences between East and West but also variation within regions and commonality across regions The book studies local populations in Sweden Belgium Italy Japan and China Rather than a simple comparison of aggregate marriage patterns it examines marriage outcomes and determinants of local populations in different countries using similar data and methods The authors first present the results of comparative analyses of first marriage and remarriage and then offer chapters each of which is devoted to the results from a specific country Similarity in Difference is the third in a prizewinning series on the demographic history of Eurasia following *Life under Pressure* 2004 and *Prudence and Pressure* 2009 both published by the MIT Press

After the Black Death Mark Bailey, 2021-02-11 The Black Death of 1348-9 is the most catastrophic event and worst pandemic in recorded history After the Black Death offers a major reinterpretation of its immediate impact and longer term consequences in England After the Black Death reassesses the established scholarship on the impact of plague on fourteenth century England and draws upon original research into primary sources to offer a major reinterpretation of the subject It studies

how the government reacted to the crisis and how communities adapted in its wake It places the pandemic within the wider context of extreme weather and epidemiological events the institutional framework of markets and serfdom and the role of law in reducing risks and conditioning behaviour The government's response to the Black Death is reconsidered in order to cast new light on the Peasants Revolt of 1381 By 1400 the effects of plague had resulted in major changes to the structure of society and the economy creating the pre conditions for England's role in the Little Divergence whereby economic performance in parts of north western Europe began to move decisively ahead of the rest of the continent After the Black Death explores in detail how a major pandemic transformed society and in doing so elevates the third quarter of the fourteenth century from a little understood paradox to a critical period of profound and irreversible change in English and global history
