Marx And Human Nature:

Marx and Human Nature Norman Geras, 2016-02-02 Marx did not reject the idea of a human nature He was right not to do so That is the conclusion of this passionate and polemical new work by Norman Geras In it he places the sixth of Marx's Theses on Feuerbach under rigorous scrutiny He argues that this ambiguous statement widely cited as evidence that Marx broke with all conceptions of human nature in 1845 must be read in the context of Marx's work as a whole His later writings are informed by an idea of a specifically human nature that fulfills both explanatory and normative functions The belief that Marx's historical materialism entailed a denial of the conception of human nature is Geras writes an old fixation which the Althusserian influence in this matter has fed upon Because this fixation still exists and is misguided it is still necessary to challenge it One hundred years after Marx's death this timely essay combining the strengths of analytical philosophy and classical Marxism rediscovers a central part of his heritage *Nature, Human Nature, and Society* Paul Heyer, 1982-09-29

Estrangement Isidor Wallimann, 1981-02-27 *Marx, the Body, and Human Nature* John Fox, 2016-04-29 Marx the Body and Human Nature shows that the body and the broader material world played a far more significant role in Marx's theory than previously recognised It provides a fresh take on Marx's theory revealing a much more open dynamic and unstable conception of the body the self and human nature **Marxism and Human Nature** Sean Sayers, 2013-01-11 Is there such a thing as human nature Here Sean Sayers defends the controversial theory that human nature is in fact an historical phenomenon He gives an ambitious and wide ranging defence of the Marxist and Hegelian historical approach and engages with a wide range of work at the heart of the contemporary debate in social and moral philosophy [Marx and the Missing Link: "Human Nature"](#) W Peter Archibald, 1989-10-24 [Marx, the Body, and Human Nature](#) John Fox, 2014-01-14 Marx the Body and Human Nature shows that the body and the broader material world played a far more significant role in Marx's theory than previously recognised It provides a fresh take on Marx's theory revealing a much more open dynamic and unstable conception of the body the self and human nature **History, Revolution, and Human Nature** Joseph Bien, 1984

Dialectics of Human Nature in Marx's Philosophy M. Tabak, 2012-07-16 A scholarly exploration of Marx's thought without any favorable or critical ideological agendas this book opposes the compartmentalization of Marx's thought into various competing doctrines such as historical materialism dialectical materialism and different forms of economic determinism

[Karl Marx's Economics](#) John Cunningham Wood, 1993 **Marx and the New Individual (RLE Marxism)** Ian Forbes, 2015-04-17 In what is the first sustained analysis of Marx's attitude to the puzzle of the individual in history and society this book first published in 1990 challenges received views on the importance of class analysis and the place of a theory of human nature in Marx's thought The radical possibilities of individual agency in society are explored within a Marxian framework and without recourse to the current fashions of methodological individualism or rational choice theory In the context of the apparent antagonism between collectivist and individualist approaches to political explanation and social

change the author establishes that a New Individual of singular importance for the understanding of contemporary society can be identified For the first time the Grundrisse provides the basis of a major analysis of Marx s thoughts on the individual By illustrating the nature of the connections between collective existence and individual experience Ian Forbes makes an important contribution towards the revitalization of socialist thought He also develops a valuable counterpoint to rational actor models of politics and liberal theories of justice alike by establishing the importance of a political theory that values human agency as much as it understands social and historical processes *Marx, Marxism, and Human Nature* Caleb Berkemeier,2012 Human beings possess a stable human nature that has been formed over millions of years of evolutionary history Through the mechanism of natural selection phenotypic traits and behaviors have evolved for the sole purpose of ensuring the survival of the organism that carries genetic information This means that there is interspecific genetic continuity across evolutionary history Two types of continuity that will be discussed are aggression and sexual dimorphism both of which can be understood as stable aspects of human nature that influence how humans behave The thesis then discusses the Marxist humanist appropriation of the term human nature as a semantic mystification intended to reconcile Marx with the biological sciences Marx is much less clear on human nature and even in his early humanist writings his conception of human nature is thoroughly social and incompatible with evolutionary theory The Marxist humanists attempt to find human nature in biological limitation and human needs but these conceptions are far too meager to be considered a robust account of human nature The thesis then discusses the anti humanism of the Marxist philosopher Louis Althusser In opposition to the Marxist humanists Althusser believes that the writings of Marx post 1845 are his definitive statement on human nature Althusser argues that Marx established the science of historical materialism by removing humans from the center of the historical process and instead focusing on the non human elements of the historical process itself Althusser is concerned with the universal applicability of historical materialism just as the Marxist humanists are concerned with the universalism of human emancipation The thesis argues that their universalism although limited is an accurate way of perceiving commonalities across the human species but true universalism can only be understood when applied to human nature in the context of evolutionary history **Herbert Marcuse and the Crisis of Marxism** Douglas Kellner,1984-01-01 This book provides a critical overview of the entirety of Marcuse s work and discusses his enduring importance Kellner had extensive interviews with Marcuse and provides hitherto unknown information about his road to Marxism his relations with Heidegger and Existentialism his involvement with the Frankfurt School and his reasons for appropriating Freud in the 1950s In addition Kellner provides a novel interpretation of the genesis and structure of Marcuse s theory of one dimensional society of the development of his political theory and of the role of aesthetics in his critical theory **Marxism and Morality** Nicholas Churchich,2022-01-01 Karl Marx promised in the preface to his Economic and Philosophic Manuscripts of 1844 that he would write an independent pamphlet on ethics Although he never did so in his later writings he discussed

morality extensively Later commentators were more concerned with other aspects of Marx's thought and largely neglected this area As a result Nicholas Churchich's exposition of Marx's thoughts on morality has become the standard work on the subject Thoroughly researched well reasoned and balanced in its argument *Marxism and Morality* presents a comprehensive and critical analysis of Marx's and Engel's ideas on morality and ethics analysing both strengths and weaknesses Churchich examines morality in its bourgeois and proletarian forms the origin and development of moral ideas moral values and standards egoism and altruism He explores the role of religion and science in communist ethics and discusses the ends and means in the struggle for a classless society Praised by those on both sides of the political divide for his objectivity Churchich's approach remains the definitive evaluation of the ethical arguments of Marxism *Marxism and Alienation* Nicholas Churchich,1990 An exposition and critique of the views of Marx and Marxists in which Marx's views are compared with other views and are explored in terms of theories causes and the transcendence of alienation self alienation and self realization and economic religious philosophic scientific social and political alienation **Marxism, the Millennium and Beyond** M. Cowling,P. Reynolds,2000-10-31 This collection investigates the state of play in studies informed by Marxism Among other contributions it includes an essay on state theory by Bob Jessop a discussion of fundamental socialist values using analytical Marxism by Alan Carling **Marx's Ethical Vision** Vanessa Christina Wills,2024 A central debate among scholars of Marx concerns whether Marxism has a moral content or is totally amoral perhaps either because it embraces a strict economic determinism or because it nihilistically sides with the proletariat without offering any objective justification for that stance Philosopher Vanessa Christina Wills argues that Marx does articulate an ethical perspective that is present throughout his writings both the more obviously humanistic and philosophical early writings and his later economic and more empirically grounded studies such as *Capital* The purposiveness of labor gives rise to a normativity already inherent in the present state of things one that can guide us in knowing what sort of world we should build and that further prepares us to build it *The Development of Marx's Conception of Human Nature* Frederick Michael Gordon,1976 **Karl Marx's Social and Political Thought** Bob Jessop,Russell Wheatley,1999 **The First Marx** Peter Lamb,Douglas Burnham,2018-11-15 Marx's early work is well known and widely available but it usually interpreted as at best a kind of stepping stone to the Marx of *Capital* This book offers something completely different it reconstructs from his first writings spanning from 1835 to 1846 a coherent and well rounded political philosophy The influence of Engels upon the development of that philosophy is discussed This it is argued was a philosophy that Marx could have presented had he put the ideas together as he hinted was his eventual intention Had he done so this first Marx would have made an even greater contribution to social and political philosophy than is generally acknowledged today Arguments regarding revolutionary change contradiction and other topics such as production alienation and emancipation contribute to a powerful analysis in the early works of Marx one which is worthy of discussion on its own merits This analysis is distributed among a range of books papers letters and other writings and is

gathered here for the first time Marx's work of the period was driven by his commitment to emancipation. Moreover, as is discussed in the conclusion to this book, his emancipatory philosophy continues to have resonance today. This new book presents Marx in a unique new light and will be indispensable reading for all studying and following his work.
