**Confronting Capitalism in the 21st Century** Marc

Silver,2019-06-04      **Fetishism and the Theory of Value** Desmond McNeill,2020-11-12 This book demonstrates the continuing relevance of Marx's critique of the capitalist system in which value is simply equated with market price. It includes chapters specifically on the environment and financialisation and presents Marx's qualitative theory of value and the associated concept of fetishism in a clear and comprehensive manner. Section I demonstrates how fetishism developed in Marx's writing from a journalistic metaphor to an analytical device central to his critique. In Section II commodity fetishism is distinguished from other forms of money capital and interest bearing capital. There follows an analysis of Marx's complex attempt to distinguish his argument from that of Ricardo and Samuel Bailey. The section ends with a discussion of the ontological status of value as a social rather than a natural phenomenon. Section III considers the merits of understanding value by analogy with language and critically assesses the merits of structural Marxism. Section IV challenges Marx's emphasis solely on production and considers also exchange and consumption as social relations. Section V critically assesses recent Marx inspired literature relating to the two key crises of our time: finance and the environment and identifies strong similarities between the key analytical questions that have been debated in each case.      *Marx200: The Significance of Marxism in the 21st Century* John McDonnell, Vijay Prashad, 2019-06-03 Marx200 examines the significance of Marxism for today. Leading scholars and activists from different countries including Cuba, India and the UK show that Marx's ideas provide us with the analysis we need to understand our world in order to change it. The book is based on a conference mark the 200th anniversary of Karl Marx's birth.      **Marx's Associated Mode of Production** Paresh Chattopadhyay, 2016-07-30 This book aims to restore Marx's original emancipatory idea of socialism conceived as an association of free individuals centered on working people's self emancipation after the demise of capitalism. Marxist scholar Paresh Chattopadhyay argues that Marx's and Engels's ideas have been deliberately warped with misinterpretation not only by those who resent these ideas but more consequentially by those who have come to power under the banner of Marx calling themselves communists. This book challenges those who have inaccurately revised Marx's ideas justify their own pursuit of political power.      *Marx's Wager* Thomas Kemple, 2022-10-13 Marx's masterpiece *Capital* Das Kapital ignored or misread as well as selectively and creatively interpreted by the generation of social scientists that came after him. Emile Durkheim, Max Weber and Georg Simmel attempt to supplement what they call historical materialism or to engage in debates about socialism through their readings of *The Communist Manifesto* and occasional *Capital*. Although these and other classical sociologists did not have access to most of Marx's published and unpublished works as we do today, each is concerned with revising and refining Marx's unfinished critique of political economy. Despite their differences with Marx and with one another, they share his concern with how empirically detailed and scientifically valid knowledge of the social world may inform historical struggles for a more human world. This commitment can be called Faustian after the title character of the poet J. W. von Goethe's tragic epic of modernity insofar as Marx and the classical sociologists hope to translate theory into practice while making a pact or wager.

with the diabolical social political and economic forces of the modern world      **Aristotle, Adam Smith and Karl Marx**

Spencer J. Pack, 2010-01-01 a very valuable introduction to Aristotle's economics History of Economic Ideas Spencer Pack is completely at home with the difficult works of Aristotle Adam Smith and Karl Marx To walk with him through their writings is to discover that they are surprisingly helpful in understanding the modern world of computers credit crunches religious differences international conflicts and unemployment due to oversaving in China and undersaving in America One is left after reading them with growing admiration for the giants of past intellectual history This is only one lesson that Pack teaches in this illuminating book Mark Blaug University of London and University of Buckingham UK This is an unusually ambitious and unpretentious work And it is successful Pack effectively compares the ideas of each of the three great men without forcing those of one upon the others The topics are exchange value money capital character government and change which the author considers to be the fundamental issues in 21st century political economy Pack is especially successful in utilizing a wide spectrum of secondary including contemporary sources to enrich the analysis of the expected primary sources Student readers will be exposed to the opportunities and problems of variation in interpretation The author has studiously avoided insinuating and privileging his own views and naively repeating well worn and misleading if not also erroneous ideology laden positions Warren J Samuels Michigan State University US Spencer Pack has written a most illuminating and insightful book Beginning from Aristotelian foundations Pack focuses our attention on an essential economic and moral issue the difference between value in use and value in exchange From this vantage point he evaluates the arguments of Smith and Marx demonstrating how their theories both drawing on Aristotle unfold into a general analysis of capitalism His account forces us to think deeply about the nature of capitalist society I recommend it highly John F Henry University of Missouri Kansas City US Spencer Pack compares and contrasts Aristotle's Smith's and Marx's theoretical systems on six fundamental issues exchange value money capital character government and change This book also provides insights on issues concerning the continuing development of world money saving managerial capitalism corrupt governments and various secular and religious movements for social change      *Marx, Alienation and Techno-Capitalism* Lelio Demichelis, 2022-08-05 In this book translated into English for the first time Lelio Demichelis takes on a modern perspective of the concept process of alienation This concept much more profound and widespread today than first described and denounced by Marx has largely been forgotten and erased Using the characters of Narcissus Pygmalion and Prometheus the author reinterprets and updates Marx Nietzsche Anders Foucault and in particular critical theory and the Frankfurt School views on an administered society where everything is automated and engineered manifest today in algorithms AI machine learning and social networking showing that in a world where old and new forms of alienation come together man is increasingly led to delegate i e alienate sovereignty freedom responsibility and the awareness of being alive      Marx, Spinoza and Darwin Mauricio Vieira Martins, 2022-10-09 Marx Spinoza and Darwin presents a common thread in its argument it shows how these authors

certainly with differences among themselves consolidated a field of investigation that does not resort to transcendent or religious premises in approaching the phenomena they analyze Thus when Spinoza declared that the will of God is the sanctuary of ignorance when Marx provocatively maintained that criticism of religion is the premise of all criticism or when Darwin polemicized against a millennial creationist approach all were taking a stand that invited us to view our world through a secular and immanent lens In addition to this common thread Martins discusses other issues present in the works of these thinkers for instance the space that exists for human subjectivity from a Marxist perspective which is not to be confused with philosophical objectivism men and women are encouraged to act in the world With this conceptual background the concluding chapters of the book address the proliferation of some less examined Christian fundamentalisms in contemporary world presenting an explanatory hypothesis for the phenomenon
