**Marx's Construction of Social Theory** J. Barbalet, 2015-04-17 This study first published in 1983 explores the connections between Marx's philosophy and his empirical analysis of society and state by showing the different meanings of many of Marx's concepts as their role in his theory changes and the theory itself develops. Beginning with an examination of Marx's search for a sound epistemological basis on which to build a social theory, Dr Barbalet then gives an analysis of the way in which Marx continually modifies the concepts he uses and continues with an examination of the different functions they are given in different theoretical settings. Various nuances of Marx's thought, often obscured by the simplistic early/late dichotomy, are revealed by Dr Barbalet's close attention to the progressive transformation of Marx's concepts and by his scrupulous analysis of them in not only their textual but also their theoretical context. Finally, the book examines the manner in which Marx's construction of social theory by its very nature means that some material is replaced by other theoretical

fabric as the theoretical structure itself is in different ways dismantled and reorganised as Marx's thought evolves and develops.

*Marx and Mead* Tom Goff, 2014-08-13 It has often been suggested that a resolution of issues generated by the sociological study of ideas might be reached through a synthesis of specific insights to be found in the works of Karl Marx and George Herbert Mead. The present study originated in an investigation of this hypothesis, particularly as it bears on the central issue of sociological relativism. The author began by delineating the specific problems such a synthesis might resolve and in the process became aware that the nature and depth of differences separating the sociology of knowledge and its critics have never been fully analysed or understood. This volume therefore opens with a clarification of these differences, a clarification which leads to considerable redefinition of the problem as it has traditionally been understood by critics and proponents of the discipline alike. The author points out in particular that it is less a debate than a thoroughgoing contradiction which characterizes the literature dealing with the inadequacies of various formulations of the sociology of knowledge. In consequence, the study of Marx and Mead presented here is not simply yet another effort to discover a perspective which will satisfy the particular demands of the critics. Rather, it argues that an adequate perspective, fully consistent with the central insight of the discipline, that knowledge is radically social in character, is to be found in a synthesis of elements in the perspectives of Marx and Mead.

**Explorations in Social Theory** George Ritzer,2001-04-10 George Ritzer is one of the leading social and cultural commentators of the present day In this essential new book he considers some of the main tendencies in contemporary social theory Included here are Ritzer s latest reflections on the uses and misuses of metatheory According to Ritzer sociology is a multiparadigm science The differences and intensities of rivalries between paradigms are often very confusing for students and even for professional sociologists This book seeks to find a way out of the confusion by sketching out the lineaments of a new integrated sociological paradigm and demonstrates how this paradigm can be applied It shows the various ways in which Ritzer has developed rationalization theory to shed light on professional integration the shape of consumer culture hyperrationality and the state of sociology today     Classical Sociological Theory George Ritzer,Jeffrey

Stepnisky,2016-12-27 Now with SAGE Publishing and co authored by one of the foremost authorities on sociological theory George Ritzer and Jeffrey Stepnisky s Classical Sociological Theory Seventh Edition provides a comprehensive overview of the major theorists and schools of sociological thought from the Enlightenment roots of theory through the early 20th century The integration of key theories with biographical sketches of theorists and the requisite historical and intellectual context helps students to better understand the original works of classical authors as well as to compare and contrast classical theories New to this Edition In Ch 1 Colonialism is now discussed as a major social force in development of modern society In Ch 2 there is an expanded discussion of the historical significance of Early Women Founders and the contributions of W E B Du Bois The chapter on Du Bois Ch 9 includes new material about his intellectual influences New contemporary commentary about Durkheim has been added to Ch 7 Ch 9 includes new material from recently translated later writings of George Simmel providing new context for his overall theory Addition of Historical Context boxes throughout text Sections on contemporary applications of classical theory have been added to each chapter     **Karl Marx's Theory of Ideas** John

Torrance,1995-05-04 Marx s undeveloped ideas about how society presents a misleading appearance which distorts its members understanding of it have been the subject of many conflicting interpretations In this book John Torrance takes a fresh un Marxist approach to Marx s texts and shows that a more precise coherent and cogent sociology of ideas can be extracted from them than is generally allowed The implications of this for twentieth century capitalism and for recent debates about Marx s conceptions of justice morality and the history of social science are explored The author argues that Marx s theory of ideas is sufficiently independent of other parts of his thought to provide a critique and explanation of those

defects in his own understanding of capitalism which allowed Marxism itself to become by his own definition an ideology

**Marx and Mead** Tom Goff, 2014-08-13 It has often been suggested that a resolution of issues generated by the sociological study of ideas might be reached through a synthesis of specific insights to be found in the works of Karl Marx and George Herbert Mead The present study originated in an investigation of this hypothesis particularly as it bears on the central issue of sociological relativism The author began by delineating the specific problems such a synthesis might resolve and in the process became aware that the nature and depth of differences separating the sociology of knowledge and its critics have never been fully analysed or understood This volume therefore opens with a clarification of these differences a clarification which leads to considerable redefinition of the problem as it has traditionally been understood by critics and proponents of the discipline alike The author points out in particular that it is less a debate than a thorough going contradiction which characterizes the literature dealing with the inadequacies of various formulations of the sociology of knowledge In consequence the study of Marx and Mead presented here is not simply yet another effort to discover a perspective which will satisfy the particular demands of the critics Rather it argues that an adequate perspective fully consistent with the central insight of the discipline that knowledge is radically social in character is to be found in a synthesis of elements in the perspectives of Marx and Mead

*From Neo-Marxism to Democratic Theory* Andrew Arato, 2016-09-16 The essays in this volume trace an intellectual odyssey a search for a genuinely critical theory The book begins with the question of why the Frankfurt School as well as other neo Marxist and post Marxist analysts both in the West and in dissident circles in the East failed to produce a critical theory of Soviet socialism or to establish a dynamic relationship with contemporary social movements As the political struggle in Eastern Europe intensified the author of this book disengaged from his own efforts to reconstruct a critical Marxism Instead he attempts a reconstruction of democratic theory based on civil society rather than class categories and with a critical relevance not only to the transition from state socialism but more generally to the universal goal of emancipation
