Perspectives On Suicide:

Thinking about Suicide David Lester, 2004 The book of suicidal behaviour has been truly interdisciplinary Scholarly papers on suicide have appeared in anthropological biological criminal justice economic law literature medical nursing pharmacological philosophical psychiatric psychological religious social work sociological and thanatological journals as well as those devoted to specific topics such as drug addiction and gambling Although this book do not explain suicide they may further our understanding of the behaviour by portraying it in all of its complexities By examining the behaviour from different perspectives people reading this book will be challenged to broaden their view and thereby devise new theories and research approaches for studying suicide The goal of this book therefore is to the reader to think about suicide in ways not considered before

Life Span Perspectives of Suicide A.A. Leenaars, 1991-01-31 In recent years a great deal of interest has been focused on suicide in the elderly and in the young However in line with modern trends in psychology sociology psychiatry anthropology and other human health fields interest has now shifted to suicide across the life span from childhood through adulthood to old age This book has been conceptualized within this developing tradition There are various ways in which life's timelines can be conceptualized Developmental theory we believe should be open ended This has widened and will continue to widen our understanding of many complicated human acts including suicide Though suicide is in many ways the same across the entire life span understanding the time lines in the suicidal process is imperative To do so however is we believe challenging In this volume we attempt to engage in the process of understanding suicide from a developmental perspective To do this we have been fortunate to obtain the cooperation of a highly competent group of contributors One interesting footnote to our list of authorities is that they represent suicidologists from across the life span a few who are at the beginning of their careers a large number in their middle years and a few who are in the Indian summer of their professional lives

Perspectives on Suicide James T. Clemons, 1990 Lifelines Ellen L. Bassuk, Stephen C. Schoonover, Andrew Gill, 2012-12-06 Suicide is a source of endless disquiet One of the few fatal consequences of psychiatric illness it is a threat to patients and a vexation to therapists that puts clinical judgment to the ultimate test It arouses countertransference reactions of unusual intensity helplessness and guilt when the suicide is successful anxiety and anger when it is used as a manipulative tool For as Samuel Johnson was aware when he commented that many commit suicide as a passionate man will stab another it is not only an escape from hopeless despair but an expression of the most violent rage To all those who care for suicidal patients this book will come as a welcome guide Each of the authors represented here brings a wealth of clinical experience to bear on the subject under discussion The psychological and biological determinants of depression are simply and clearly delineated to provide a basis for understanding the processes underlying suicide for judging its likelihood and for preventing its occurrence Detailed descriptions of the variety of psychological and pharmacological treatments of the suicidal patient are complemented by extensive discussions of the several settings in

which such patients will be encountered whether these be an in patient unit an out patient clinic a medical ward an emergency room or a private office *Media and Suicide* Thomas Niederkrotenthaler, Steven Stack, 2017-07-28 Somewhere in the world in the next forty seconds a person is going to commit suicide Globally suicides account for 50 percent of all violent deaths among men and 71 percent for women Despite suicide prevention programs therapy and pharmacological treatments the suicide rate is either increasing or remaining high around the world Media and Suicide holds traditional and emergent media accountable for influencing an individual s decision to commit suicide Global experts present research historical analysis theoretical disputes including discussion on the Werther and Papageno effects and policy regarding the media s impact on suicide They answer questions about the effects of different types of media and storytelling show how the impact of social media can be diminished discuss internet bullying mass shootings and mass suicides show the effects of recovery stories and much more The editors also present examples of suicide policy in the United States Switzerland the United Kingdom Ireland and Hong Kong on how to best communicate reporting guidelines to decrease the copycat effect especially in less developed nations where most of the world s nearly one million suicides occur each year Although there is much work to be done to prevent media influenced suicide this innovative volume will contribute a large piece to this complex puzzle **UNDERSTANDING SUICIDE** ,2018 *The Economy and Suicide* David Lester, Bijou Yang, 1997 Economy Suicide Economic Perspectives On Suicide **Life Span Perspectives of Suicide** A.
