Real Space Cowboys:

The Real Space Cowboys Ed Buckbee, Wally Schirra, 2005 In 1959 seven U S military fighter pilots were selected to train as America's first astronauts Alan Shepard Gordon Cooper Gus Grissom John Glenn Scott Carpenter Wally Schirra and Deke Slayton would become known as the Mercury Seven M7 These men who had jockeyed for the best flying jobs in the military began competing for rides on rockets Most would eventually vie for the ultimate ride to the moon The author Ed Buckbee who has enjoyed a 40 year association with the U S manned space flight program follows these brave men who pioneered the U S space program Through time and personal friendships he captures dreams of flying higher faster and farther than any one in the known universe Readers are invited behind the scenes to witness the competition between chimpanzees and astronauts and the conflict between NASA engineers designing capsules and those who would pilot them Through this book readers feel the collective will of a nation to defeat the Russians in an all out space race via an American team of 400 000 engineers technicians astronauts and support personnel who performed as if the country were at war The eras of Mercury Gemini and Apollo these were times of nobility and humility but also times of arrogance tension and from time to time humour Gotcha's were commonplace astronaut pranks and a dubious answer to the question Are you a turtle resulted in a healthy bar tab But what of our first space heroes after the Apollo program was completed Accepting the call of Project Mercury meant a lifetime commitment Their work continued with motivational programs for youth through the U S Space Camp programs public programs at institutions such as the Smithsonian's National Air and Space Museum the U S Space 30th Anniversary Documentary on Skylab Gotcha film about Alan Shepard Space Camp Documentary Reach For The Stars 1997 Panel Discussion at Pensacola with Armstrong Shepard Lovell Aldrin 2002 Panel Discussion at Pensacola with the Mercury Astronauts Gotcha Documentary The Lighthouse Never Fails U S Space Documentary The Flight of Freedom 7 Mercury Astronauts Documentary The First Gotcha film of Apollo 12 **Apollo 1** Ryan S. Walters, 2021-05-25 On January 27 1967 astronauts Gus Grissom Ed White and Roger Chaffee climbed into a new spacecraft perched atop a large Saturn rocket at Kennedy Space Center in Florida for a routine dress rehearsal of their upcoming launch into orbit then less than a month away All three astronauts were experienced pilots and had dreams of one day walking on the moon But little did they know nor did anyone else that once they entered the spacecraft that cold winter day they would never leave it alive The Apollo program would be perilously close to failure before it ever got off the ground But rather than dooming the space program this tragedy caused the spacecraft to be completely overhauled creating a stellar flying machine to achieve the program's primary goal putting man on the moon Apollo 1 is a candid portrayal of the astronauts the disaster that killed them and its aftermath In it readers will learn How the Apollo 1 spacecraft was doomed from the start with miles of uninsulated wiring and tons of flammable materials in a pure oxygen atmosphere along with a hatch that wouldn't open How due to political pressure the government contract to build the Apollo 1 craft went to a bidder with an inferior plan How public opinion polls

were beginning to turn against the space program before the tragedy and got much worse after Apollo 1 is about America fulfilling its destiny of man setting foot on the moon It s also about the three American heroes who lost their lives in the tragedy but whose lives were not lost in vain **Aurora 7** Colin Burgess,2015-08-28 TO A NATION enthralled by the heroic exploits of the Mercury astronauts the launch of Lt Cmdr Scott Carpenter on NASA s second orbital space flight was a renewed cause for pride jubilation and celebration Within hours that excitement had given way to stunned disbelief and anxiety as shaken broadcasters began preparing the American public for the very real possibility that an American astronaut and his spacecraft may have been lost at sea In fact it had been a very close call Completely out of fuel and forced to manually guide Aurora 7 through the frightening inferno of re entry Carpenter brought the Mercury spacecraft down to a safe splashdown in the ocean In doing so he controversially overshot the intended landing zone Despite his efforts Carpenter s performance on the MA 7 mission was later derided by powerful figures within NASA He would never fly into space again Taking temporary leave of NASA Carpenter participated in the U S Navy s pioneering Sealab program For a record 30 days he lived and worked aboard a pressurized habitat resting on the floor of the ocean becoming the nation s first astronaut aquanaut explorer Following extensive research conducted by noted spaceflight historian Colin Burgess the drama filled flight of Aurora 7 is faithfully recounted in this engrossing book along with the personal recollections of Scott Carpenter and those closest to the actual events Space Enterprise Phillip Harris,2009-12-29 In Space Enterprise Living and Working Offworld Dr Philip Harris provides the vision and rationale as to why humanity is leaving its cradle Earth to use space resources as well as pursuing lunar industrialization and establishing offworld settlements As a management space psychologist Dr Harris presents a behavioral science perspective on space exploration and enterprise In this his 45th book Phil has completely revised and updated the two previous editions of this classic placing new emphasis on the need for more synergy and participation by the private sector He not only provides a critical review of what is happening in the global space community but offers specific strategies for lunar economic development The author analyzes the human factors in contemporary and future space developments especially relative to the deployment of people aloft This user friendly volume offers numerous photographs diagrams exhibits and case studies **Freedom 7** Colin Burgess,2013-09-27 Inevitably there are times in a nation s history when its hopes fears and confidence in its own destiny appear to hinge on the fate of a single person One of these pivotal moments occurred on the early morning of May 5 1961 when a 37 year old test pilot squeezed himself into the confines of the tiny Mercury spacecraft that he had named Freedom 7 On that historic day U S Navy Commander Alan Shepard carried with him the hopes prayers and anxieties of a nation as his Redstone rocket blasted free of the launch pad at Cape Canaveral hurling him upwards on a 15 minute suborbital flight that also propelled the United States into the bold new frontier of human space exploration This book tells the enthralling story of that pioeering flight as recalled by many of the participants in the Freedom 7 story including Shepard himself with anecdotal details and tales never before

revealed in print Although beaten into space just three weeks earlier by the Soviet cosmonaut Yuri Gagarin Alan Shepard s history making mission aboard Freedom 7 nevertheless provided America s first tentative step into space that would one day see its Apollo astronauts including Alan Shepard walk on the Moon

Inventing the American Astronaut Matthew H. Hersch,2012-10-08 Who were the men who led America s first expeditions into space Soldiers Daredevils The public sometimes imagined them that way heroic military men and hot shot pilots without the capacity for doubt fear or worry However early astronauts were hard working and determined professionals organization men who were calm calculating and highly attuned to the politics and celebrity of the Space Race Many would have been at home in corporate America and until the first rockets carried humans into space some seemed to be headed there Instead they strapped themselves to missiles and blasted skyward returning with a smile and an inspiring word for the press From the early days of Project Mercury to the last moon landing this lively history demystifies the American astronaut while revealing the warring personalities raw ambition and complex motives of the men who were the public face of the space program

To a Distant Day Chris Gainor,2020-04-01 Insightful instructive and definitely worth the read Greg Andres Journal of the Royal Astronomical Society of Canada As someone who has been teaching a course on space exploration for many years and has visited most of NASA s space centers I have found plenty of new and valuable material in To a Distant Day I recommend the book to all who wish to know more about the conditions people and discoveries between 1890 and 1960 that led to the space age Pangratios Papacosta Physics Today Although the dream of flying is as old as the human imagination the notion of rocketing into space may have originated with Chinese gunpowder experiments during the Middle Ages Rockets as both weapons and entertainment are examined in this engaging history of how human beings acquired the ability to catapult themselves into space Chris Gainor s irresistible narrative introduces us to pioneers such as Konstantin Tsiolkovsky Robert Goddard and Hermann Oberth who pointed the way to the cosmos by generating the earliest wave of international enthusiasm for space exploration It shows us German engineer

Wernher von Braun creating the V 2 the first large rocket which though opening the door to space failed utterly as the wonder weapon it was meant to be From there Gainor follows the space race to the Soviet Union and the United States giving us a close look at the competitive hysteria that led to Sputnik satellites space probes and finally human flight into space in 1961 As much a story of cultural ambition and personal destiny as of scientific progress and technological history To a Distant Day offers a complete and thoroughly compelling account of humanity s determined efforts sometimes poignant sometimes amazing sometimes mad to leave the earth behind
