Svrcek,Donald P.

Mahoney,Brent R. Young,2000-05-02 A hands on teaching and reference text for chemical engineers In writing this book the authors have focused exclusively on the vast majority of chemical engineering students who need a basic understanding of practical process control for their industrial careers Traditionally process control has been taught using non intuitive and highly mathematical techniques Laplace and frequency domain techniques Aside from being difficult to master in a one semester course the traditional approach is of limited use for more complex process control problems encountered in the chemical processing industries When designing and analyzing multi loop control systems today industry practitioners employ both steady state and dynamic simulation based methodologies These real time methods have now all but replaced the traditional approach *A Real Time Approach to Process Control* provides the student with both a theoretical and practical introduction to this increasingly important approach Assuming no prior knowledge of the subject this text introduces all of the applied fundamentals of process control from instrumentation to process dynamics PID loops and tuning to distillation multi loop and plant wide control In addition students come away with a working knowledge of the three most popular dynamic simulation packages The text carefully balances theory and practice by offering students readings and lecture materials along with hands on workshops that provide a virtual process on which to experiment and from which to learn modern real time control strategy development Features The first and only textbook to use a completely real time approach Gives students the opportunity to understand and use HYSYS software Carefully designed workshops tutorials have been included to allow students to practice and apply the theory Includes many worked examples and student problems VISIT THE

**Precision agriculture** John Stafford, Armin Werner, 2024-01-08

Precision Agriculture presents the latest scientific results from worldwide research field studies and practical application. The book contains peer reviewed papers that were presented at the 4th European Conference on Precision Agriculture. The papers focus on precision agriculture research containing interdisciplinary site analysis integrative measures and management strategies as well as on practical applications. The economic and environmental effects of implementing the precision agriculture concept are featured in many of them. The unique feature of the fourth conference was that it was held in parallel with the 1st European Conference on Precision Livestock Farming; the links between both technologies were drawn and the possible interactions between them were shown for the first time. The potential is to integrate both technologies to encompass the whole farm. Peer reviewed papers from the Precision Livestock conference are presented in a companion proceedings. *Precision Livestock Farming: A Real-Time Approach to Process Control, 3rd Edition* Brent Young, Donald Mahoney, William Svrcek, 2014. With resources at a premium and ecological concerns paramount, the need for clean, efficient and low cost processes is one of the most critical challenges facing chemical engineers. The ability to control these processes, optimizing one, two or several variables, has the potential to make more substantial savings in time, money and resources than any other single factor. Building on the success of the previous editions, this new third edition of *A Real Time Approach to Process Control* employs both real industry practice and process control education without the use of complex or highly mathematical techniques, providing a more practical and applied approach. Updated throughout, this edition includes a brand new chapter on Model predictive Control (MPC). Now includes wireless and web based technologies. Covers bio related systems. Details the new multivariable control measure developed by the authors. Includes PowerPoint slides and solutions to Workshop problems on the accompanying website <http://www.wiley.com/go/svrcek/realtime3e>. **A Real-time Approach to Distillation Process Control** Brent R.
