**"Landscape Imagery, Politics, and Identity in a Divided Germany, 1968-1989"** Catherine Wilkins, 2017-07-05 Landscape Imagery Politics and Identity in a Divided Germany 1968-1989 explores the communicative relationship between German landscape painting and the viewing public that developed in the wake of the student revolutions of the late 1960s The book demonstrates that contrary to some historical thinking more similarities than differences characterized the sociopolitical concerns of East and West Germans during the late Cold War Era and that it was these shared issues that were reflected in the revival of the Romantic painting genre Catherine Wilkins focuses on recovering the agency of the individual artist and in revising historiography with sensitivity to narration from below Interdisciplinary in nature art historians can benefit from the study's analysis of images and artists not widely known outside of Germany Additionally the consolidation of statistics and data regarding German postwar cultural policy are

relevant for political and cultural historians The author contributes to the ongoing multidisciplinary debates regarding Histoire Crois in arguing that a clear dichotomy between East Germany and West Germany did not exist but rather that the residents of both nations shared a concern over some of the same issues of the period and memory studies by using images as primary historical sources able to be employed in the recovery of potentially subversive memory and identity Issues related to gender relations environmentalism and spiritual belief are addressed by Wilkins with appeal for scholars working with those particular themes Poststructuralist and literary theorists as well can find arguments supporting an alternative means of writing history through artworks and private memories *Post-Ecologist Politics* Ingolfur Blühdorn, 2012-10-12

**Nature** Thomas M. LEKAN, Thomas M Lekan, 2009-06-30 One of the most powerful nationalist ideas in modern Europe is the assertion that there is a link between people and their landscape Focusing on the heart of German romanticism the Rhineland Thomas Lekan examines nature protection activities from Wilhelmine Germany through the end of the Nazi era to illuminate the relationship between environmental reform and the cultural construction of national identity In the late nineteenth century anxieties about national character infused ecological concerns about industrialization spurring landscape preservationists to protect the natural environment In the Rhineland s scenic rivers forests and natural landmarks they saw Germany as a timeless and organic nation rather than a recently patchworked political construct Landscape preservation also served conservative social ends during a period of rapid modernization as outdoor pursuits were promoted to redirect class conscious factory workers and unruly youth from crass materialism to the German homeland Lekan s examination of Nazi environmental policy challenges recent work on the green Nazis by showing that the Third Reich systematically subordinated environmental concerns to war mobilization and racial hygiene This book is an original contribution not only to studies of national identity in modern Germany but also to the growing field of European environmental history Table of Contents Introduction 1 Nature s Homelands The Origins of Landscape Preservation 1885 1914 2 The Militarization of Nature and Heimat 1914 1923 3 The Landscape of Modernity in the Weimar Era 4 From Landscape to Lebensraum Race and Environment under Nazism 5 Constructing Nature in the Third Reich Conclusion Abbreviations Notes Sources Acknowledgments Index Writing squarely within the idiom of the invented tradition and the imagined nation Thomas Lekan argues that in the wake of belated unification and at a time of rapid industrialization the German landscape came to be seen as a touchstone of national identity He questions the idea that those engaged in landscape preservation were simply antimodern and he challenges both scholars who have seen a straightforward continuity from pre 1933 preservationist

sentiment to Nazism and those who have made exaggerated claims for the Third Reich as the progenitor of modern green politics This is a welcome contribution to the literature on local and national identity joining works by Celia Applegate and Alon Confino and on the environmental history of modern Germany Both scholarly and original *Imagining the Nation in Nature* is an impressive achievement David Blackbourn Harvard University This important and timely book contributes to our understanding of German identity as well as to modern concepts of environmentalism and nature Lekan's valuable contribution elucidates the modern technocratic and therapeutic vision of preservation that linked Weimar and the Third Reich His analysis of Nazi bio nature is significant and thought provoking Alon Confino University of Virginia

**Social Movements in Global Politics** David West,2014-01-30 Social Movements in Global Politics is a timely new account of the unconventional extra institutional activities of social movements In the face of impending global crises and stubborn conflicts a conventional view of politics risks leaving us confused and fatalistic feeling powerless because we are unaware of all that can be achieved by political means By contrast a variety of recent social movements ranging from those of women gays and lesbians and anti racists to environmentalists the Occupy movement and the Arab Spring demonstrate the enormous potential of political action beyond the institutional sphere of politics At the same time religious fundamentalists racial supremacists and ultra nationalists make clear that movements are not necessarily progressive and are often at odds with one another West highlights the many ways in which national and global institutions depend on a broader context of extra institutional action or what is in effect the formative dimension of politics He explores some of the major contributions of social movements from

the genealogy of liberal democratic nation states sixties radicalism and the new social movements to the politics of sexuality gender and identity the politicization of nature and climate and alter globalization The book also considers current theoretical approaches and sets out the basis for a critical theory of social movements This is a fresh and original account of social movements in politics and will be essential reading for any students and scholars interested in the challenges and the unpredictable potential of political action
