Responding to Human Rights Violations, 1946-1999 Katarina Tomaševski, 2021-10-05 This volume maps out the response of states to human rights violations It covers the period 1946 1999 and offers a complete and unmatched record for this period Its starting point is that such responses are not established and accepted state practice Traditional if unwritten norms of states behaviour developed through centuries of silence and inaction the prevalent reaction to human rights violations by another state remains the absence of any response Furthermore this book probes into evidence of active and passive complicity by reviewing aid to countries in which violations have been taking place and diplomatic initiatives undertaken to shield violators from public opprobrium Since international law is generated through state practice the book highlights the ongoing tussle between the pre 1946 heritage of silence and inaction and the 1946 1999 haphazard pattern of responses to violations

Democracy and Development R.C. Bhardwaj, K. Vijayakrishnan, 2018-10-26 Published in 1998 The question of whether democracy and development are allies or adversaries has long been debated and with the triumph of the democratic spirit worldwide the relationship between democracy and development has once again come to attract much attention globally The collapse of the Soviet Union and the developments in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development In February 1996 the Commonwealth

Striking a Balance Alan Fowler, 2013-10-11. At a time of rapid global change, development NGOs are having to scale up their impact, diversify their activities, respond to long-term crises, and improve their performance on all fronts. *Striking a Balance* offers both analysis and a practical guide to how NGOs can fulfil these demanding expectations. Written for all those involved with NGO work, the book describes the objectives of sustainable, people-centred development and the process required to achieve it, focusing on the five factors which determine effectiveness: suitable organisational design, competent leadership and human resources, appropriate external relationships, mobilisation of high-quality finance, and the measurement of performance coupled to learning for leverage. In each, the book explains the capacities needed and how they can be assessed and improved. Effectiveness calls for NGOs which retain their non-profit values, establish the right type of professionalism, manage dilemmas, and balance choices to continually reflect the priorities, rights, and needs of those who give them legitimacy: people who are poor and marginalised. This book provides a reference of current and future practices which will help NGOs to do so.

Perspectives on European Development Cooperation Olav Stokke, Paul Hoebink, 2012-10-12. Events of the past twenty years, including the Cold War and the War on Terror, have meant that the environments of international development co-operation have changed extensively, with dramatic consequences for development policies and North-South relations in general. *Perspectives on European Development Cooperation* takes stock of such changes, describing and analyzing the new European development agenda, including the role of the European Union. Essays by prominent authorities in the field examine the development policies of individual donor countries and focus on the principles and objectives governing aid strategies and the performances of these policies. This book will be of interest to students of development studies and those involved in determining development policy.
