sacred is not merely acknowledged but made present through ritualized actions that require tangible participatory engagement Even if the virtual realm were acknowledged as real and retained both the bodily presence of the faithful and the Divine Presence the rite would still be ineffective Virtuality prevents the proper enactment of the rite rendering it ineffective At its core the ritual form is performative embodied and consecratory It requires physical presence material elements and a structured sequence of gestures symbols and words that together make the divine encounter possible Their absence in virtual spaces disrupts ritual form compromising its sacramental function

Reality and Negation - Kant's Principle of Anticipations of Perception Marco Giovanelli, 2010-11-18 Kant in the Critique of pure reason only dedicates a few pages to the principle of Anticipations of Perception and only a few critical studies are outspokenly dedicated to this issue in recent critical literature But if one considers the history of post Kantian philosophy one can immediately perceive the great importance of the new definition of the relationship between reality and negation which Kant's principle proposes Critical philosophy is here radically opposed to the pre critical metaphysical tradition Reality no longer appears as absolutely positive being which excludes all negativity from itself and negation is not reduced to being a simple removal the mere absence of being Instead reality and negation behave as an equally positive something in respect to one another such that negation is itself a reality that is actively opposed to another reality Such a definition of the relation between reality and negation became indispensable for post Kantian Philosophy and represents a central aspect of Kantian inspired philosophy in respect to Leibnizian metaphysics The present work therefore departs from the hypothesis that the essential philosophical importance of the Anticipations of Perception can only be fully measured by exploring its impact in the Post Kantian debate

Inside Reality Dr. Thomas Stark, There are those such as scientists who see only the outside of reality its appearance its surface its phenomenal aspect They are blind to the inside the substance the foundation the noumenal aspect They dismiss it as non existent or illusion or epiphenomenon Scientists are those that believe that phenomena have no underlying noumena What you see is what you get Seeing is believing Everything is appearance Nothing is concealed There are no hidden variables and no unobservables The scientific method says Observe That works only if everything is observable If there are foundational unobservables science is catastrophically wrong and has cut itself off from the truth The only truth it can furnish is that of surfaces and appearances with no substance Those who truly want to understand reality must become masters of both perspectives inside and outside noumenon and phenomenon and see how they relate communicate and interact

Satan and the Problem of Evil Gregory A. Boyd, 2025-08-04 Where does evil come from If there is a sovereign creator God as Christian faith holds is this God ultimately responsible for evil Does God's sovereignty mean that God causes each instance of sin and suffering How do Satan his demons and hell fit into God's providential oversight of all creation and history How does God interact with human intention and action If people act freely does God know in particular every human decision before the choice is made In this important book Gregory A Boyd mounts a thorough response to these ages old

questions which remain both crucial and contentious both practical and complex In this work Boyd defends his scripturally grounded trinitarian warfare theodicy presented in *God at War* with rigorous philosophical reflection and insights from human experience and scientific discovery Critiquing the classical Calvinist solution to the problem of evil he advocates an alternative understanding of the sovereignty of the trinitarian God and of the reality of Satan that sheds light on our fallen human condition While all may not agree with Boyd's conclusions *Satan and the Problem of Evil* promises to advance the church's discussion of these critical issues

Kant & Phenomenology Tom Rockmore, 2011-01-22 Phenomenology together with Marxism pragmatism and analytic philosophy dominated philosophy in the twentieth century and Edmund Husserl is usually thought to have been the first to develop the concept His views influenced a variety of important later thinkers such as Heidegger and Merleau Ponty who eventually turned phenomenology away from questions of knowledge But here Tom Rockmore argues for a return to phenomenology's origins in epistemology and he does so by locating its roots in the work of Immanuel Kant Kant and Phenomenology traces the formulation of Kant's phenomenological approach back to the second edition of Kant's *Critique of Pure Reason* In response to various criticisms of the first edition Kant more forcefully put forth a constructivist theory of knowledge This shift in Kant's thinking challenged the representational approach to epistemology and it is this turn Rockmore contends that makes Kant the first great phenomenologist He then follows this phenomenological line through the work of Kant's idealist successors Fichte and Hegel Steeped in the sources and literature it examines Kant and Phenomenology persuasively reshapes our conception of both of its main subjects

How We Became Human, Julio Moreno, 2014-03-06 *How We Became Human* A Challenge to Psychoanalysis tackles the question of what distinguishes human beings from other animals By interweaving psychoanalysis biology physics anthropology and philosophy Julio Moreno advances a novel thesis human beings are faulty animals in their understanding of the world around them This quality renders humans capable of connecting with inconsistencies those events or phenomena that their logic cannot understand The ability to go beyond consistency is humans distinctive trait It is the source of their creativity and of their ability to modify the environment they inhabit On the basis of this connective associative interplay Moreno proposes a new approach to the links human beings create amongst themselves and with the world around them This theory focuses on a key question What is the difference between human beings and the other animals From this perspective Moreno seeks to reformulate many of the classic psychoanalytic psychological and anthropological postulates on childhood links and psychic change

The Reality - Fiction Opposition in Children's Literature Adrian Zagler, 2011 Bachelor Thesis from the year 2010 in the subject English Language and Literature Studies Literature grade 1 University of Graz language English abstract Since the 1970s scholarly interest in children's literature has grown and numerous studies looking into the complexity and thematic and structural depth of the texts have been published Simultaneously the notion of metareferentiality has sparked interest among scholars from various disciplines Metareferentiality though not unique to the twentieth and the twenty first centuries is said to be one of the key cultural phenomena of our time And yet these two fields of interest namely children's literature and metareferentiality have only very rarely been studied in the same context Metareferential elements in children's books are often seen as phenomena of dream worlds Thus they allow a traditional non critical reading in which the metareferential elements do not necessarily trigger medial awareness in the readers but can be explained logically and within the framework of the represented story worlds Consequently the epistemological status of reality would not be threatened by these texts However as this paper aims to prove such a reading for instance of the Alice stories *Die Unendliche Geschichte* and *The Book of Lost Things* although

undeniably possible falls short of the true scope of the texts As will be shown all four books address the question of the status of fiction with reference to its opposition to reality albeit in different ways In their treatment of the subject they are clearly metafictional texts with epistemological and ontological concerns that require experienced readers to fully grasp their messages Nevertheless they are still publicly perceived as children s literature and are enjoyed by children and adults alike After some general remarks on the genre of children s literature and on metareferentiality this paper focuses on a particular form of metarefere
