Realizing the Full Potential of Social Safety Nets in Africa Kathleen Beegle,Aline Coudouel,Emma Monsalve,2018-07-02 Poverty remains a pervasive and complex phenomenon in Sub Saharan Africa Part of the agenda in recent years to tackle poverty in Africa has been the launching of social safety nets programs All countries have now deployed safety net interventions as part of their core development programs The number of programs has skyrocketed since the mid 2000s though many programs remain limited in size This shift in social policy reflects the progressive evolution in the understanding of the role that social safety nets can play in the fight against poverty and vulnerability and more generally in the human capital and growth agenda Evidence on their impacts on equity resilience and opportunity is growing and makes a foundational case for investments in safety nets as a major component of national development plans For this potential to be realized however safety net programs need to be significantly scaled up Such scaling up will involve a series of technical considerations to identify the parameters tools and processes that can deliver maximum benefits to the poor and vulnerable However in addition to technical considerations and at least as importantly this report argues that a series of decisive shifts need to occur in three other critical spheres political institutional and fiscal First the political processes that shape the extent and nature of social policy need to be recognized by stimulating political appetite for safety nets choosing politically smart parameters and harnessing the political impacts of safety nets to promote their sustainability Second the anchoring of safety net programs in institutional arrangements related to the overarching policy framework for safety nets the functions of policy and coordination as well as program management and implementation is particularly important as programs expand and are increasingly implemented through national channels And third in most countries the level and predictability of resources devoted to the sector needs to increase for safety nets to reach the desired scale through increased efficiency increased volumes and new sources of financing and greater ability to effectively respond to shocks This report highlights the implications which political institutional and fiscal aspects have for the choice and design of programs Fundamentally it argues that these considerations are critical to ensure the successful scaling up of social safety nets in Africa and that ignoring them could lead to technically sound but practically impossible choices and designs

**Democracy and Education** John Dewey, 1916 *Renewal of Life by Transmission* The most notable distinction between living and inanimate things is that the former maintain themselves by renewal A stone when struck resists If its resistance is greater than the force of the blow struck it remains outwardly unchanged Otherwise it is shattered into smaller bits Never does the stone attempt to react in such a way that it may maintain itself against the blow much less so as to render the blow a contributing factor to its own continued action While the living thing may easily be crushed by superior force it none the less tries to turn the energies which act upon it into means of its own further existence If it cannot do so it does not just split into smaller pieces at least in the higher forms of life but loses its identity as a living thing As long as it endures it struggles to use surrounding energies in its own behalf It uses light air moisture and the material of soil To say that it uses them is to say that it turns them into means of its own conservation As long as it is growing the energy it expends in thus turning the environment to account is more than compensated for by the return it gets it grows Understanding the word control in this sense it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up Life is a self renewing process through action upon the environment *The Philosophy of John*
