The Culture of Islam Lawrence Rosen,2004-04-01 Having worked for several decades in North Africa anthropologist Lawrence Rosen is uniquely placed to ask what factors contribute to the continuity and changes characterizing the present day Muslim world In The Culture of Islam he brings his erudition and his experiences to illuminating key aspects of Muslim life and how central tenets of that life are being challenged and culturally refashioned Through a series of poignant tales from the struggle by a group of friends against daily corruption to the contest over a saint s identity from nostalgia for the departed Jews to Salman Rushdie s vision of doubt in a world of religious certainty Rosen shows how a dazzling array of potential changes are occurring alongside deeply embedded continuity a process he compares to a game of chess in which infinite variations of moves can be achieved while fundamental aspects of the game have had a remarkably enduring quality Whether it is the potential fabrication of new forms of Islam by migrants to Europe creating a new Euro Islam as Rosen calls it the emphasis put on individuals rather than institutions or the heartrending problems Muslims may face when their marriages cross national boundaries each story and each interpretation

offers a window into a world of contending concepts and challenged coherence The Culture of Islam is both an antidote to simplified versions of Islam circulating today and a consistent story of the continuities that account for much of ordinary Muslim life It offers in its human stories and its insights its own contribution as the author says to the mutual understanding and forgiveness that alone will make true peace possible *Roald Hoffmann on the Philosophy, Art, and Science of Chemistry* Jeffrey Kovac, Michael Weisberg, 2012-01-16 Nobel laureate Roald Hoffmann's contributions to chemistry are well known Less well known however is that over a career that spans nearly fifty years Hoffmann has thought and written extensively about a wide variety of other topics such as chemistry's relationship to philosophy literature and the arts including the nature of chemical reasoning the role of symbolism and writing in science and the relationship between art and craft and science In *Roald Hoffmann on the Philosophy Art and Science of Chemistry* Jeffrey Kovac and Michael Weisberg bring together twenty eight of Hoffmann's most important essays Gathered here are Hoffmann's most philosophically significant and interesting essays and lectures many of which are not widely accessible In essays such as *Why Buy That Theory* *Nearly Circular Reasoning* *How Should Chemists Think The Metaphor* *Unchained Art in Science and Molecular Beauty* we find the mature reflections of one of America's leading scientists Organized under the general headings of *Chemical Reasoning and Explanation* *Writing and Communicating Art and Science* *Education and Ethics* these stimulating essays provide invaluable insight into the teaching and practice of science *Attention Equals Life* Andrew Epstein, 2016-06-01 Poetry has long been thought of as a genre devoted to grand subjects timeless themes and sublime beauty Why then have contemporary poets turned with such intensity to documenting and capturing the everyday and mundane Drawing on insights about the nature of everyday life from philosophy history and critical theory Andrew Epstein traces the modern history of this preoccupation and considers why it is so much with us today *Attention Equals Life* argues that a potent hunger for everyday life explodes in the post 1945 period as a reaction to the rapid unsettling transformations of this epoch which have resulted in a culture of perilous distraction Epstein demonstrates that poetry is an important and perhaps unlikely cultural form that has mounted a response and even a mode of resistance to a culture suffering from an acute crisis of attention In this timely and engaging study Epstein examines why a compulsion to represent the everyday becomes predominant in the decades after modernism and why it has so often sparked genre bending formal experimentation With chapters devoted to illuminating readings of a diverse group of writers including poets associated with influential movements like the New York School language poetry and conceptual writing the book considers the variety of forms contemporary poetry of everyday life has taken and analyzes how gender race and political forces all profoundly inflect the experience and the representation of the quotidian By exploring the rise of experimental realism as a poetic mode and the turn to rule governed everyday life projects *Attention Equals Life* offers a new way of understanding a vital strain at the heart of twentieth and twenty first century literature It not only charts the evolution of a significant concept in cultural theory and

poetry but also reminds readers that the quest to pay attention to the everyday within today's frenetic world of smartphones and social media is an urgent and unending task
