Abell,1992-04-01 **The Creation: Its Infinite Features and Finite Realms Volume I** Jack Hetrick,2014-09-19 In the last decade of the twentieth century A D a discovery was made of a body of knowledge which it is believed has important implications for the future of man In 1996 it was discovered that many cultural artifacts produced by man since about 30 000 B C possess an unusual symbolism This symbolism as we shall see has a mathematical component associated with it that finds expression in the form of alignments and points of alignments Because of this the interpretation of this symbolism is not entirely subjective but has an objective aspect to it as well In *The Creation Its Infinite Features and Finite Realms* artifacts of man that possess this unusual symbolism are referred to as inspired sources They are called inspired because the symbolism present in these artifacts is believed to be inspired by the Creator and they are called sources because the increments of knowledge transmitted by the symbolism of these artifacts are sources of knowledge

Derong Chen explores Chinese philosophy through a comprehensive study and critical analysis of Feng Youlan's new metaphysics proposing a systematic analysis of meaning that differs from the approach of the comparative linguistic analysis that A C Graham and Chad Hasen employed in their studies of Chinese philosophy This detailed analysis of Feng Youlan's new metaphysics demonstrates that Feng's system is not the completely Westernized philosophical system many scholars identify it as nor is it the pure logical and analytical system Feng himself intended to construct Rather the essence and characteristics of the new metaphysics at the core of Feng's philosophical system expose his philosophy as a continuation of the Chinese philosophical tradition in a new era This approach is most applicable to scholars of comparative philosophy and of any era of Chinese philosophy

What is Present Reality Vipin Gupta, 2021-02-16 What is present reality is an incredibly profound but straightforward exposition of the limits of science Every scientist wishes that someone will falsify the world crafted using the present body of scientific methods one day One such world comprises the manifold versions of relativity theories measuring $E=mc^2$ Suppose one deified scientist had not mathematically derived the value of energy in this way In that case today's scientists will not bind their understanding to the

light serviced by the deified leader scientist traded and squared by them as a devoted follower Evidently when one conceives energy as mc^2 its value without the presence of the leader deity is zero This landmark work grounded in India's ancient cultural metaphysics challenges the present reality of what we know and believe to be true whether about divinity or spirituality or the universe of objects or subjects or us as a person A unique feature is the precise quantification of the lightless energies of both the present reality as well as the varying paradigms and doctrines working on modifying that It is a part of a series of twelve books that democratizes the ability to understand our present reality beyond those who are experts in modern science and use this understanding for personal as well as societal well being The beta reviewers note This is unbelievable work that would change the way life is seen and lived and Looking forward to this being a massive success Dr Vipin Gupta has a Ph D in managerial science and applied economics from the Wharton School of the University of Pennsylvania He is a gold medalist from the Post graduate Program of the Indian Institute of Management Ahmedabad India He is a Professor of sensible management and appropriate science at the Jack H Brown College of Business and Public Administration California State University San Bernardino USA

Philosophy, God and Motion Simon Oliver, 2006-04-07 In the post Newtonian world motion is assumed to be a simple category which relates to the locomotion of bodies in space and is usually associated only with physics This book shows this to be a relatively recent understanding of motion and that prior to the scientific revolution motion was a broader and more mysterious category applying to moral as well as physical movements Simon Oliver presents fresh interpretations of key figures in the history of western thought including Plato Aristotle Aquinas and Newton examining the thinkers handling of the concept of motion Through close readings of seminal texts in ancient and medieval cosmology and early modern natural philosophy the book moves from antique to modern times investigating how motion has been of great significance within theology philosophy and science Particularly important is the relation between motion and God following Aristotle traditional doctrines of God have understood the divine as the unmoved mover while post Holocaust theologians have suggested that in order to be compassionate God must undergo the motion of suffering The text argues that there may be an authentically theological as well as a natural scientific understanding of motion This volume will prove a major contribution to theology the history of Christian thought and to the growing field of science and religion
