Reason And Freedom In Sociological Thought:

Reason and Freedom in Sociological Thought (RLE Social Theory) Frank Hearn, 2020-08-26 How has reason believed since the Enlightenment to be the ally of freedom in the search for a better more humanly satisfying world been reduced to a technical rationality that has actually impoverished the bases of human freedom What might be the options and obligations for sociologists who wish to restore reason to its proper status Working within the tradition of C Wright Mills and Jurgen Habermas Frank Hearn sets out to answer these questions He surveys the treatment of the relation between reason and freedom in both the classical tradition especially the writings of Saint Simon Comte Durkheim Marx Weber and Freud and an increasingly significant segment of social thought and criticism and for example in the contrasting visions of Daniel Bell and Christopher Lasch He then analyses both the concrete social and historical forms of expression taken by what Mills calls rationality without reason and their impact on individual autonomy and the freedoms associated with democratic politics Finally he develops Mills's and Habermas's claims that the cultivation of democratic publics and a critical social theory committed to a vibrant public life are indispensable to the protection and revitalization of the values of reason and freedom and of the practices they entail This book updates and enriches Mills's influential argument by demonstrating its affinity with critical theory by showing its contributions to a critical understanding of the classical tradition and by showing its implications for contemporary social political and economic developments

Systemic Racism in South Africa Rupert Taylor, 2024-12-06 This book takes a critical macro level political sociological perspective to understanding South African politics and society Applying systemic racism theory to South Africa the author argues that South African society through its exclusionary social mechanisms has assumed a systemically racist form that deeply compromises questions of truth and justice Constitutive of and embedded in the structure of South African society racism has a reach and a durability that runs deep through the successive stages of segregationism apartheid and liberal democracy Showing the limits of the rule of law in a racist society the author offers a theoretically informed interpretation as to why the national liberation struggle has fallen short of its promise to deliver a better life for all and as to why truth and justice remain so deeply compromised in South Africa today The arguments advanced are supported by over thirty semi structured interviews conducted by the author with high profile South African politicians jurists and intellectuals as well as by using Truth and Reconciliation Commission hearing transcripts both public and top secret This thought provoking book is driven by the imperative to offer a compelling and sustained argument for taking a systemic racism approach to interpreting South Africa for scholars and students of sociology political science race and ethnic studies law and South African history

History and Freedom Theodor W. Adorno, 2014-11-05 Despite all of humanity's failures futile efforts and wrong turnings in the past Adorno did not let himself be persuaded that we are doomed to suffer a bleak future for ever One of the factors that prevented him from identifying a definitive plan for the future course of history was his feelings of solidarity with the victims and losers As for the future the course of events was to remain open ended instead of finality he remained committed to a Heideggerian like openness This trace of the messianic has what he called the colour of the concrete as opposed to mere abstract possibility Early in the 1960s Adorno gave four courses of lectures on the

road leading to Negative Dialectics his magnum opus of 1966 The second of these was concerned with the topics of history and freedom In terms of content these lectures represented an early version of the chapters in Negative Dialectics devoted to Kant and Hegel In formal terms these were improvised lectures that permit us to glimpse a philosophical work in progress The text published here gives us an overview of all the themes and motifs of Adorno s philosophy of history the key notion of the domination of nature his criticism of the existentialist concept of a historicity without history and finally his opposition to the traditional idea of truth as something permanent unchanging and ahistorical **Book Review Digest** ,2001-12
