Reason And Passion:

The Trouble With Passion Cheryl Hall, 2013-01-22 Political theorists have long argued that passion has no place in the political realm where reason reigns supreme. But is this dichotomy between reason and passion sustainable? Does it underestimate the indispensable role of passion in a fully democratic society? Drawing upon Plato, Rousseau, and contemporary feminist theorists, Cheryl Hall argues that passion is an essential component of a just political community and that the need to educate passion together with reason is paramount. *Trouble with Passion* provides a compelling defense of the crucial place of passion in politics.

Custom and Reason in Hume Henry E. Allison, 2008-08-07 Henry Allison examines the central tenets of Hume's epistemology and cognitive psychology as contained in the *Treatise of Human Nature*. Allison takes a distinctive two-level approach. On the one hand, he considers Hume's thought in its own terms and historical context. So considered, Hume is viewed as a naturalist whose project in the first three parts of the first book of the *Treatise* is to provide an account of the operation of the understanding in which reason is subordinated to custom and other non-rational propensities. Scepticism arises in the fourth part as a form of metascepticism directed not against first-order beliefs but against philosophical attempts to ground these beliefs in the space of reasons. On the other hand, Allison provides a critique of these tenets from a Kantian perspective. This involves a comparison of the two thinkers on a range of issues including space and time, causation, existence, induction, and the self. In each case, the issue is seen to turn on a contrast between their underlying models of cognition. Hume is committed to a version of the perceptual model according to which the paradigm of knowledge is a seeing with the mind's eye of the relation between mental contents. By contrast, Kant appeals to a discursive model in which the fundamental cognitive act is judgment understood as the application of concepts to sensory data. Whereas regarded from the first point of view, Hume's account is deemed a major philosophical achievement, seen from the second, it suffers from a failure to develop an adequate account of concepts and judgment.

Hume, Passion, and Action Elizabeth Schmidt Radcliffe, 2018 David Hume's theory of action is well known for several provocative theses, including that passion and reason cannot be opposed over the direction of action. Elizabeth S. Radcliffe defends an original interpretation of Hume's views on passion, reason, and motivation which is consistent with other theses in Hume's philosophy, loyal to his texts, and historically situated. She challenges the now orthodox interpretation of Hume on motivation, presenting an alternative that situates Hume closer to Humeans than many recent interpreters have. Part of the strategy is to examine the thinking of the early modern intellectuals to whom Hume responds. Most of these thinkers insisted that passions lead us to pursue harmful objects unless regulated by reason, and most regarded passions as representations of good and evil which can be false. Understanding Hume's response to these claims requires appreciating his respective characterizations of reason and passion. The author argues that Hume's thesis that reason is practically impotent apart from passion is about beliefs generated by reason rather than about the capacity of reason. Furthermore, the argument makes sense of Hume's sometimes ridiculed

description of passions as original existences having no reference to objects The author also shows how Hume understood morality as intrinsically motivating while holding that moral beliefs are not themselves motives and why he thought of passions as self regulating contrary to the admonitions of the rationalists *Purpose with Passion & Compassion* Rodin JS Kumar,2024-12-25 Purpose with Passion Compassion In Search for Happiness A Flourishing Life is the second book by author and music composer Rodin JS Kumar It is about the search for Happiness and Living a Flourishing life It is about discovering our true calling accepting it and identifying ourselves with it It s about finding our purpose living it with passion and compassion and making the most of every step moment day and endeavour regardless of the challenges or monotony

David Broiles, 2012-12-06 This work is primarily concerned with Hume s arguments concerning the respective roles of reason and passion in moral decisions Thus the major part of the work deals with section I of Part I of Book III of the Treatise where Hume argues that moral distinctions are not derived from reason But in discussing this section I have had to take into account most of the other sections of Book III and some important ones from Book II of the Treatise and the Enquiry Concerning the Principles of Morals Omissions however are noticeable While I have gone into great detail on Parts I and II of the Treatise of Morals I have omitted any discussion of Part III I have not discussed everything Hume has to say on ethics or even everything in Book III of the Treatise I have placed certain limits on myself in writing this work I attempt to point out only what is central to Hume s ethics and this I believe to be the first section of Book III and to show how certain assumptions and conclusions of this section underlie the rest of Hume s considerations on ethics Thus I have tried to show that Hume s discussion of the artificial virtues necessarily follows from the assumptions and conclusions of section I But I leave it to the reader in his further study of Hume to apply my points to other sections of Hume that I have not discussed

Literature, Culture and Society Andrew Milner, 2017-09-19 As cultural studies has grown from its origins on the margins of literary studies it has tended to discard both literature and sociology in favour of the semiotics of popular culture. Literature Culture and Society makes a determined attempt to re-establish the connections between literary studies, cultural studies and sociology. Arguing against both literary humanism and sociological relativism, it provides a critical overview of theoretical approaches to textual analysis from hermeneutics to postmodernism and presents a substantive account of the capitalist literary mode of production. This second edition has been fully revised and rewritten with new sections including the impact of psychoanalysis and post-structuralism and the recent work of academics such as Franco Moretti. New case studies have been added in order to examine the intertextual connections between Genesis, Milton's Paradise Lost, Frankenstein in Mary Shelley's original and also in several film versions, Karel Capek's R.U.R., Fritz Lang's Metropolis, Ridley Scott's Blade Runner, The X-Files and Buffy the Vampire Slayer.

The Complete Poems of Sir Philip Sidney ... Philip Sidney, 1873

Locke: Political Essays John Locke, 1997 We know more about the development of John Locke's ideas than we do about almost any other philosopher's before modern times. This book brings together a comprehensive collection of the writings on politics and society that stand outside the canonical works which Locke published during his lifetime. In the aftermath of the Revolution of 1688 the three works by which he is chiefly known appeared: the Two Treatises of Government, An Essay Concerning Human Understanding and A Letter Concerning Toleration, and the themes raised in these works had been reflected upon over many years. Mark Goldie's edition makes possible the fullest exploration of the evolution of Locke's ideas concerning the philosophical foundations of morality and sociability, the boundary of church and state, the shaping of constitutions and the conduct of government and public policy.

Thinking about Feeling Robert C. Solomon, 2004-03-04

Philosophers since Aristotle have explored emotion and the study of emotion has always been essential to the love of wisdom. In recent years Anglo-American philosophers have rediscovered and placed new emphasis on this very old discipline. The view that emotions are ripe for philosophical analysis has been supported by a considerable number of excellent publications. In this volume Robert Solomon brings together some of the best Anglo-American philosophers now writing on the philosophy of emotion, with chapters from philosophers who have distinguished themselves in the field of emotion research and have interdisciplinary interests, particularly in the social and biological sciences. The reader will find a lively variety of positions on topics such as the nature of emotion, the category of emotion, the rationality of emotions, the relationship between an emotion and its expression, the relationship between emotion, motivation and action, the biological nature versus social construction of emotion, the role of the body in emotion, the extent of freedom and our control of emotions, the relationship between emotion and value, and the very nature and warrant of theories of emotion. In addition, this book acknowledges that it is impossible to study the emotions today without engaging with contemporary psychology and the neurosciences, and moreover engages them with zeal. Thus the essays included here should appeal to a broad spectrum of emotion researchers in the various

theoretical experimental and clinical branches of psychology in addition to theorists in philosophy philosophical psychology moral psychology and cognitive science the social sciences and literary theory **Judith S. Kaye in Her Own Words** Judith S. Kaye, 2019-06-01 In 1983 Judith S. Kaye in Her Own Words makes clear why she left such an enduring mark upon the court the nation and all who knew her The first section of the book Kaye's memoir focuses primarily on her years on the Court of Appeals the inner workings of the court and the challenges she faced as chief judge in managing a court system populated by hundreds of judges and thousands of employees The second section a carefully chosen selection of her written opinions and occasional dissents reveals how she guided the law in New York State for almost a quarter century with uncommon vision and humanity Her decisions cover every facet of New York and federal law and have often been quoted and followed nationally The final section of the book includes selections from her numerous articles and speeches which cover the field from common law jurisprudence to commercial law to constitutional analysis all with an eye to the future and above all how the law can best affect the everyday lives of people who come to court willingly or unwillingly including not least those most in need of the law An extraordinary woman jurist and leader who had a striking impact on the law and the administration of justice in New York State and beyond This collection is more than a simple record of a remarkable life It is a treasure not only for those of us who knew and admired Judith but for all who may seek to understand and appreciate the profound impact she had on the law the legal profession and the administration of justice from the Foreword by Honorable Janet DiFiore Cultural Software J. Balkin, 1998-01-01 In this book J. M. Balkin offers a strikingly original theory of cultural evolution a theory that explains shared understandings disagreement and diversity within cultures Drawing on many fields of study including anthropology evolutionary theory cognitive science linguistics sociology political theory philosophy social psychology and law the author explores how cultures grow and spread how shared understandings arise and how people of different cultures can understand and evaluate each other's views Cultural evolution occurs through the transmission of cultural information and know-how cultural software in human minds Balkin says Individuals embody cultural software and spread it to others through communication and social learning Ideology the author contends is neither a special nor a pathological form of thought but an ordinary product of the evolution of cultural software Because cultural understanding is a patchwork of older imperfect tools that are continually adapted to solve new problems human understanding is partly adequate and partly inadequate to the pursuit of justice Balkin presents numerous examples that illuminate the sources of ideological effects and their

contributions to injustice He also enters the current debate over multiculturalism applying his theory to problems of mutual understanding between people who hold different worldviews He argues that cultural understanding presupposes transcendent ideals and shows how both ideological analysis of others and ideological self criticism are possible
