Reasons For Believing:

50 Reasons People Give for Believing in a God Guy P. Harrison, 2009-09-18 Many books that challenge religious belief from a skeptical point of view take a combative tone that is almost guaranteed to alienate believers or they present complex philosophical or scientific arguments that fail to reach the average reader This is undoubtedly an ineffective way of encouraging people to develop critical thinking about religion This unique approach to skepticism presents fifty commonly heard reasons people often give for believing in a God and then raises legitimate questions regarding these reasons showing in each case that there is much room for doubt Whether you re a believer a complete skeptic or somewhere in between you ll find this review of traditional and more recent arguments for the existence of God refreshing approachable and enlightening From religion as the foundation of morality to the authority of sacred books the compelling religious testimony of influential people near death experiences arguments from Intelligent Design and much more Harrison respectfully describes each rationale for belief and then politely shows the deficiencies that any good skeptic would point out As a journalist who has traveled widely and interviewed many highly accomplished people quite a number of whom are believers the author appreciates the variety of belief and the ways in which people seek to make religion compatible with scientific thought Nonetheless he shows that despite the prevalence of belief in God or religious belief in intelligent people in the end there are no unassailable reasons for believing in a God For skeptics looking for appealing ways to approach their believing friends or believers who are not afraid to consider a skeptical challenge this book makes for very stimulating reading *Reasons for Belief* Norman L. Reasons to Believe Scott Hahn, 2007-05-08 This book unravels mysteries corrects misunderstandings and offers thoughtful straightforward responses to common objections about the Catholic faith Bestselling author Scott Hahn a convert to Catholicism has experienced the doubts that so often drive discussions about God and the Church In the years before his conversion he was first a nonbeliever and then an anti Catholic clergyman In REASONS TO BELIEVE he explains the how and why of the Catholic faith drawing from Scripture his own struggles and those of other converts as well as from everyday life and even natural science Hahn shows that reason and revelation nature and the supernatural are not opposed to one another rather they offer complementary evidence that God exists But He doesn't merely exist He is someone and He has a personality a personal style that is discernible and knowable Hahn leads readers to see that God created the universe with a purpose and a form a form that can be found in the Book of Genesis and that is there when we view the natural world through a microscope through a telescope or through our contact lenses At the heart of the book is Hahn's examination of the ten keys to the kingdom the characteristics of the Church clearly evident in the Scriptures As the story of creation discloses the world is a house that has a Father a palace where the king is really present God created the cosmos to be a kingdom and that kingdom is the universal Church fully revealed by Jesus Christ
