Reborn Buildings:

Buildings Reborn Barbaralee Diamonstein, Barbaralee Diamonstein-Spielvogel, 1978 Before and after pictures of buildings which have been renovated for different uses from what they originally had with brief descriptions of the projects In alphabetical order by city **Building Adaptation** James Douglas, 2006-08-11 As existing buildings age nearly half of all construction activity in Britain is related to maintenance refurbishment and conversions Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry Given its importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future especially in the developed parts of the world Building Adaptation Second Edition is intended as a primer on the physical changes that can affect older properties It demonstrates the general principles techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or refurbishment The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings It deals with any work to a building over and above maintenance to change its capacity function or performance

Rehabilitation of Historic Buildings Frederic Ellsworth Kley, 1980 **Old Buildings, New Forms** Françoise Bollack, 2013-11-12 It is clear that working with historic structures is both more environmentally sustainable and cost effective than new architecture and construction and many believe that the best design occurs at the intersection of old and new Françoise Astorg Bollack presents 28 examples gathered in the United States and throughout Europe and the Middle East Some are well known Mass MOCA Market Santa Caterina in Barcelona Neues Museum in Berlin and others are almost anonymous But all demonstrate a unique and appropriate solution to the problem of adapting historic structures to contemporary uses This survey of contemporary additions to older buildings is an essential addition to the architectural literature I have always loved old buildings An old building is not an obstacle but instead a foundation for continued action Designing with them is an exhilarating enterprise adding to them grafting inserting knitting new pieces into the existing built fabric is endlessly stimulating Françoise Astorg Bollack **From Buildings and Loans to Bail-Outs** David L.

Mason, 2004-07-05 For most Americans the savings and loan industry is defined by the fraud ineptitude and failures of the 1980s However these events overshadow a long history in which thrifts played a key role in helping thousands of households buy homes First appearing in the 1830s savings and loans then known as building and loans encourage their working class members to adhere to the principles of thrift and mutual co operation as a way to achieve the American Dream of home ownership This book traces the development of this industry from its origins as a movement of a loosely affiliated collection of institutions into a major element of America's financial markets It also analyses how diverse groups of Americans including

women ethnic Americans and African Americans used thrifts to improve their lives and elevate their positions in society Finally the overall historical perspective sheds new light on the events of the 1980s and analyses the efforts to rehabilitate the industry in the 1990s

Reborn Buildings Arian Mostaedi, 2003 The lack of space in big cities and the desire to preserve old architecture of great value help to explain the continuing desire to retrieve spaces of the past as locations for new dwellings The adaptation of the conditions of the old building to present day living needs demands delicate technical and documentary work by the architect This volume explores a variety of ideas for reconditioning historical spaces for domestic use complete with plans and pictures of the original state the development of the project and the final result in which a suggestive fertile dialogue is struck between past and present

Building Lives Neil Harris, 1999-01-01 Drawing on sources including Masonic manuals tourist guidebooks and religious texts this illustrated study explores the rites of building passage over the past 150 years The author suggests that architecture is a performing art as well as a fine art

Understanding Building Stones and Stone Buildings John Hudson, John Cosgrove, 2019-04-24 This book covers the wide spectrum of subjects relating to obtaining and using building stones starting with their geological origin and then describing the nature of granites volcanics limestones sandstones flint metamorphic stones breccias and conglomerates with emphasis being placed on how to recognise the different stones via the many illustrated examples from Great Britain and other countries The life of a building stone is explained from its origin in the quarry through its exposure to the elements when used for a building to its eventual deterioration The structure of stone buildings is then discussed with explanations of the mechanics of pillars lighthouses and walls arches bridges buttresses and roof vaults plus castles and cathedrals The sequence of the historical architectural styles of stone buildings is explained from the early days through to postmodern buildings Special attention is paid to two famous architects the Roman Vitruvius and the English Sir Christopher Wren who designed and supervised the construction of St Paul's Cathedral in London To demonstrate many of the concepts presented two exemplary stone buildings are described in detail the Albert Memorial in London and Durham Cathedral in northern England The former building is interesting because it is comprised of a cornucopia of different building stones and the latter building because of its architecture and sandstone decay mechanisms In the final Chapter ruined stone buildings are discussed the many reasons for their decay and the possibility of their rebirth via digital recording of their geometry The book has over 350 pages and is illustrated with more than 450 diagrams and colour photographs of both the various stones and the associated stone buildings Readers knowledge of the subject will be greatly enhanced by these images and the related explanatory text A wide ranging references and bibliography section is also included

Faith Buildings in the City of London Billy Hurley Reading, 2025-06-20 The square mile of the City of London today has 46 Faith Buildings each a treasure house of art and architecture and each with its own distinct character and story Through previously unpublished archival images and a compelling narrative that demystifies their architectural history this book asks what do we want these buildings to be what

and who are they for and why should we care about them By exploring them through the seasons we are invited to get to know these precious places better and to consider the fundamental question what is it that makes space sacred The most elusive and emotive of architectural qualities atmosphere is used uniquely here to address this question and to better understand the significance of this fascinating group Uncovering their personalities histories and architectural qualities the reader is invited to take a journey of reflection and discovery and to see through fresh eyes a set of spaces handed to us by the ancestors that reside in and encapsulate our shared collective memories and that have been there all along hidden in plain sight and waiting for you just one step away from the busy city streets Housing and Planning References ,1979
