Recent Revolutions in Anthropology Maxine P. Fisher, 1986-01-01 Examines the different areas of concern in the field of anthropology and surveys recent theories on such topics as sex roles communication with primates and cultural change

Why we need a revolution in the Social sciences: A post-colonial perspective Sujay Rao Mandavilli, 2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children s day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990 s even the mid 1980 s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question s own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors

The Consciousness Revolutions Shimon Edelman, 2023-04-06 This book is about all things consciousness great and small It starts by pointing to the key characteristic of consciousness without realizing which it cannot be understood like everything else about the mind it is fundamentally a kind of computation Among many other matters this explains how it is that we share some aspects of consciousness with bacteria how it can arise in artificial machines and not just living ones how the empty cocoon of the self that it spins ends up pretending to be the butterfly and how consciousness dooms this virtual butterfly to the splendor and the suffering of being awake and aware Unlike most other

books on consciousness this one includes a discussion of some possible ways whereby we pinned like butterflies by our species history and socioeconomic circumstances can awake to our collective predicament and join forces to do something about it It should be of interest to all readers who care about the nature of our lived experience and about our survival which depends on developing critical consciousness of our dire situation and the social dynamics that shape it **Missing the Revolution** Jerome H. Barkow, 2006 The naturalizing perspective of Darwinian thought has become one of the major intellectual currents of our time pervading contemporary understandings of human nature and society Unfortunately many social scientists in sociology psychology and sociocultural anthropology have failed to engage with it Barkow asks his fellow social scientists to put aside their all too common preconceptions and stereotypes of the biological and to consider a powerful argument that is far different from that of those who once invoked a vocabulary of genes and Darwin as a justification for genocide He argues that the theoretical perspective that has been so successful when applied to the behavior of every other animal species can be applied just as successfully to our own and that the real debate is about how to apply it BOOK JACKET

Thinking about Society: Theory and Practice Ian Jarvie, 2012-12-06 I C Jarvie was trained as a social anthropologist in the center of British social anthropology the London School of Economics where Bronislaw Malinowski was the object of ancestor worship Jarvie's doctorate was in philosophy however under the guidance of Karl Popper and John Watkins He changed his department not as a defector but as a rebel attempting to exorcize the ancestral spirit He criticized the method of participant observation not as useless but as not comprehensive it is neither necessary nor sufficient for the making of certain contributions to anthropology rather it all depends on the problem situation And so Jarvie remained an anthropologist at heart who in addition to some studies in rather conventional anthropological or sociological molds also studied the tribe of social scientists but also critically examining their problems especially their overall rather philosophical problems but not always so a few of the studies included in this volume exemplify his work on specific issues whether of technology or architecture or nationalism in the academy or moviemaking or even movies exhibiting excessive sex and violence These studies attract his attention both on account of their own merit and on account of their need for new and powerful research tools such as those which he has forged in his own intellectual workshop over the last two decades **Revolution Beyond the Event** Charlotte Al-Khalili, Narges Ansari, Myriam Lamrani, Kaya Uzel, 2023-05-02 Revolution Beyond the Event brings together leading international anthropologists alongside emerging scholars to examine revolutionary legacies from the MENA region Latin America and the Caribbean It explores the idea that revolutions have varied afterlives that complicate the assumptions about their duration pace and progression and argues that a renewed focus on the temporality of radical politics is essential to our understanding of revolution Approaching revolution through its relationship to time the book is a critical intervention into attempts to define revolutions as bounded events that act as sequential transitions from one political system to another It pursues an ethnographically driven rethinking of the temporal horizons that are at stake in revolutionary

processes arguing that linear views of revolution are inextricably tied to notions of progress and modernity Through a careful selection of case studies the book provides a critical perspective on the lived realities of revolutionary afterlives challenging the liberal humanist assumptions implicit in the modern idea of revolution and reappraising the political agency of people caught up in revolutionary situations across a variety of ethnographic contexts [Fashion and the Consumer Revolution in Contemporary Russia](#) Olga Gurova,2014-10-24 This book explores how clothing consumption has changed in Russia in the past 20 years as capitalism has grown in a postsocialist state bringing with it a consumer revolution It shows how there has been and continues to be a massive change in the fashion retail market and how ideal lifestyles portrayed in glossy magazines and other media have contributed to the consumer revolution as have shifts in the social structure and everyday life Overall the book which includes the findings of extensive original research including in depth interviews with consumers relates changes in fashion and retail to changing outlooks identities and ideologies in Russia more generally The mentioned changes are also linked to the theoretical concept of fashion formed in postsocialist society *The French Revolution and Its Legacy* Camil Francisc Roman,2025-06-30 This book offers an interpretation of the French Revolution and modern democracy arguing that the revolution gave rise to a democratic power that is liminal by nature and therefore unlimited unaccountable on principle and the basis for a state religion of continuous transformation It demonstrates these claims by focusing on the universally adulated but little understood sacred motto *libert egalit fraternit* and on the sacrifice and role of Louis XVI in the revolution Analysing the revolutionary process by which representative democratic government took the shape of political metamorphosis the book shows that modern democracy does not represent the people but refers to the representation of representation and the existential condition of permanent displacement The present study will appeal to scholars from across the social political and human sciences with an interest in the French Revolution modern democracy political modernity contemporary politics and the history of art **Revolution and Disenchantment** Fadi A. Bardawil,2020-04-10 Fadi A Bardawil explores the hopes for and disenchantments with Marxism Leninism in the writings and actions of revolutionary intellectuals within the 1960s Arab New Left [A Revolution in Fragments](#) Mark Goodale,2019-11-22 The years between 2006 and 2015 during which Evo Morales became Bolivia s first indigenous president have been described as a time of democratic and cultural revolution world renewal Pachakuti reconstituted neoliberalism or simply the process of change In *A Revolution in Fragments* Mark Goodale unpacks these various analytical and ideological frameworks to reveal the fragmentary and contested nature of Bolivia s radical experiments in pluralism ethnic politics and socioeconomic planning Privileging the voices of social movement leaders students indigenous intellectuals women s rights activists and many others Goodale uses contemporary Bolivia as an ideal case study with which to theorize the role that political agency identity and economic equality play within movements for justice and structural change **Politics of Culture in Iran** Nematollah Fazeli,2006-08-21 This first full length study of the history of Iranian anthropology charts the

formation and development of anthropology in Iran in the twentieth century The text examines how and why anthropology and culture became part of wider socio political discourses in Iran and how they were appropriated and rejected by the pre and post revolutionary regimes The author highlights the three main phases of Iranian anthropology corresponding broadly to three periods in the social and political development of Iran the period of nationalism lasting approximately from the constitutional revolution 1906 11 and the end of the Qajar dynasty until the end of Reza Shah s reign 1941 the period of Nativism from the 1950s until the Islamic revolution 1979 the post revolutionary period In addition the book places Iranian anthropology in an international context by demonstrating how Western anthropological concepts theories and methodologies affected epistemological and political discourses on Iranian anthropology

Martyrs and Tricksters Walter Armbrust, 2019-08-06 An important look at the hopeful rise and tragic defeat of the Egyptian Revolution of 2011 The Egyptian Revolution of 2011 began with immense hope but was defeated in two and a half years ushering in the most brutal and corrupt regime in modern Egyptian history How was the passage from utmost euphoria into abject despair experienced not only by those committed to revolutionary change but also by people indifferent or even hostile to the revolution In *Martyrs and Tricksters* anthropologist and Cairo resident Walter Armbrust explores the revolution through the lens of liminality initially a communal fellowship where everything seemed possible transformed into a devastating limbo with no exit To make sense of events Armbrust looks at the martyrs trickster media personalities public

spaces contested narratives historical allusions and factional struggles during this chaotic time Armbrust shows that while martyrs became the primary symbols of mobilization no one took seriously enough the emergence of political tricksters Tricksters appeared in media not the vaunted social media of a Facebook revolution but television and they paved the way for the rise of Abd al Fattah al Sisi In the end Egypt became a global political vanguard but not in the way the revolutionaries intended What initially appeared as the gateway to an age of revolution has transformed the world over into the age of the trickster Delving into how Egyptians moved from unprecedented exhilaration to confusion and massacre Martyrs and Tricksters is a powerful cultural biography of a tragic revolution **A Revolution of Rules** Erica Bornstein,2025-08-12

What is it about nonprofits that inspires so many to passionately support their agendas and others to adamantly seek their control In India laws regulating the nonprofit sector were dramatically reformed between 2010 2020 reconfiguring relationships between corporations nonprofits and the government Thousands of nonprofits including powerful NGOs lost their ability to receive foreign funding and in 2015 dozens more were put on a state sponsored watch list While many assume that nonprofits are defined by the causes they champion A Revolution of Rules demonstrates that the nonprofit form is shaped primarily through its regulation in a dynamic process of democratic and political negotiation Erica Bornstein argues that the scrutiny of nonprofits in India must be understood in a wider global context of political judicialization and regulatory reform She examines how members of nonprofit organizations are the unsung heroes of democracy as they navigate a shrinking stage for rights based work and struggle to protect civil society The protagonists featured in this book include nonprofit workers lawyers accountants philanthropists and civil servants who conduct their work on the sidelines at workshops in modest offices through report writing and petitions To understand nonprofits and their relationship to democracy in the world Bornstein asserts one must look to the deceptively unassuming sites of struggle over the nonprofit form and its regulation The Paleobiological Revolution David Sepkoski,Michael Ruse,2015-03-04

The Paleobiological Revolution chronicles the incredible ascendance of the once maligned science of paleontology to the vanguard of a field With the establishment of the modern synthesis in the 1940s and the pioneering work of George Gaylord Simpson Ernst Mayr and Theodosius Dobzhansky as well as the subsequent efforts of Stephen Jay Gould David Raup and James Valentine paleontology became embedded in biology and emerged as paleobiology a first rate discipline central to evolutionary studies Pairing contributions from some of the leading actors of the transformation with overviews from historians and philosophers of science the essays here capture the excitement of the seismic changes in the discipline In so doing David Sepkoski and Michael Ruse harness the energy of the past to call for further study of the conceptual development of modern paleobiology
