Recent History:

Doing Recent History Claire Bond Potter, Renee C. Romano, 2012-04-25 Recent history the very phrase seems like an oxymoron Yet historians have been writing accounts of the recent past since printed history acquired a modern audience and in the last several years interest in recent topics has grown exponentially With subjects as diverse as Walmart and disco and personalities as disparate as Chavez and Schlafly books about the history of our own time have become arguably the most exciting and talked about part of the discipline Despite this rich tradition and growing popularity historians have engaged in little discussion about the specific methodological political and ethical issues related to writing about the recent past The twelve essays in this collection explore the challenges of writing histories of recent events where visibility is inherently imperfect hindsight and perspective are lacking and historiography is underdeveloped Those who write about events that have taken place since 1970 encounter exciting challenges that are both familiar and foreign to scholars of a more distant past including suspicions that their research is not historical enough negotiation with living witnesses who have a very strong stake in their own representation and the task of working with new electronic sources Contributors to this collection consider a wide range of these challenges They question how sources like television and video games can be better utilized in historical research explore the role and regulation of doing oral histories consider the ethics of writing about living subjects discuss how historians can best navigate questions of privacy and copyright law and imagine the possibilities that new technologies offer for creating transnational and translingual research opportunities Doing Recent History offers guidance and insight to any researcher considering tackling the not so distant past

Discursive Processes of Intergenerational Transmission of Recent History M. Achugar, 2016-04-12 Debates about how to remember politically contested or painful pasts exist throughout the world As with the case of the Holocaust in Europe and Apartheid in South Africa South American countries are struggling with the legacy of state terrorism left by the 1970s dictatorships Coming to terms with the past entails understanding the role different social actors played in those events as well as what those event mean for us today Young people in these situations have to learn about painful historical events over which there is no national consensus This book explores discursive processes of intergenerational transmission of recent history through the case of the Uruguayan dictatorship The main themes of the book are the discursive construction of social memory and intergenerational transmission of contested pasts through recontextualization resemitization and intertextuality

Contemporary history on trial Harriet Jones,Kjell Ostberg,Nico Randeraad,2024-07-30 Is it right for historians to serve as expert witnesses to past events Since the end of the Cold War a series of heated and politicised debates across Europe have questioned the truth about painful episodes in the twentieth century From the Holocaust to Srebrenica inquiries and fact finding commissions have become a common device employed by governments to deal with the pressure of public opinion State sponsored programmes of education and research attempt to encourage a common moral understanding of the lessons we learn from these painful memories Contemporary historians have increasingly been drawn into these efforts since 1989 in the courtroom in the media on commissions as advisers In a series of thoughtful essays written by leading historians from across Europe this volume considers the ethics and responsibilities that this new role entails For anyone concerned with the role of the historian in contemporary society and how we arrive at a public understanding of history this book is essential reading

Memory and Representation in Contemporary Europe Dr Siobhan Kattago,2013-01-28 Why do certain places and not others symbolically capture the past and freeze time Likewise why does the process of memory as a fluid and changing activity seem to prevent its own solidification Memory and Representation in Contemporary Europe

reflects not only on the persistence of the past as a theme linked to modernity media and time but also discusses the politics of memory within a changing Europe Drawing on the theoretical work of Hannah Arendt Isaiah Berlin and Zygmunt Bauman Siobhan Kattago uses examples from both Germany and Estonia in order to address the multiple layers of Europe's totalitarian past Through reflecting on the legacy of totalitarianism and the revolutions of 1989 it becomes clear that the issue is less of whether one should remember but rather how to internalize the various lessons of the past for the future of Europe Memory and Representation in Contemporary Europe thus offers the reader occasions upon which to take stock of different but overlapping contours of past and present in contemporary Europe

Modern Grammars of Case

John M. Anderson,2006-06-22 This book addresses fundamental issues in linguistic theory including the relation between formal and cognitive approaches the autonomy of syntax the content of universal grammar and the value of generative and functional approaches to grammar It focuses on the grammar of case relations signalled by morphological case prepositions and word order Part I offers a critical history of modern grammars of case focussing on the last four decades and setting this in the context of earlier including ancient developments The subjects considered include the evolution of ideas concerning deep structure and semantic and grammatical relations and arguments for the maintenance of the traditional central position of case in the grammar In parts

II and III Professor Anderson examines the category of case and central unresolved issues in the grammar of case. The latter include questions relating to the idea of an ontologically based grammar particularly the degree to which syntactic categories and relationships are grounded in meaning and the notion of linguistic creativity. This involves a consideration of the way in which cases may be identified and whether their distribution is determined through semantics. The book sheds new light on the interactions between meaning and grammar and on the structure and development of lexical and grammatical systems. The argument and its far reaching consequences will be of wide interest to linguists, philosophers and others seeking to understand the workings of language.

A Modern Guide to Citizen's Basic Income Malcolm Torry, 2020-06-26. Debate on the desirability, feasibility and implementation of a Citizen's Basic Income: an unconditional, nonwithdrawable and regular income for every individual is increasingly widespread among academics, policymakers and the general public. There are now numerous introductory books on the subject and others on particular aspects of it. This book provides something new. It studies the Citizen's Basic Income proposal from a variety of different disciplinary perspectives: the economics of Citizen's Basic Income, the sociology of Citizen's Basic Income, the politics of Citizen's Basic Income and so on. Each chapter discusses the academic discipline and relevant aspects of the debate and asks how the discipline enhances our understanding and how the Citizen's Basic Income debate might contribute to the academic discipline.
