Parsaei, Thomas R. Hanley, S.S. Kolli, 2012-12-06 During the last two decades a tremendous growth in the popularity and applications of computers in manufacturing has occurred Computer aided design computer aided manufacturing flexible manufacturing systems group technology and many others are considered by many manufacturing executives as the most promising technologies and philosophies that if successfully implemented can reduce costs and enable the US manufacturing companies to become more competitive in the global market In the computer integrated manufacturing environment the

decision processes are often more involved The decision makers are frequently required to have access to a vast amount of data to support and analyze their complex decision problems at strategic and tactical levels Decision support systems are often referred to as computer based information technologies that allow the decision makers to interactively communicate and solve the decision problems Manufacturing Decision Support Systems is intended to report the latest developments and address the central issues in this area This volume consists of 14 refereed chapters written by leading researchers from academia and industry

Performance Measurement Luca Quagini,Stefano Tonchia,2010-08-24 Business Intelligence BI and Performance Management PM the development and delivery of business insight for users and the management of execution based on that insight are two solution types that promise to bring great value to enterprises Yet most organizations haven't yet realized the elusive benefits of these two important disciplines The reasons for this are manifold However the primary causes are the culture of the organization and its leadership This is a topic which I've addressed at length in my latest book Profiles in Performance Business Intelligence Journeys and the Roadmap for Change The culture and leadership of the organization determines the importance and strategic intent surrounding the use of BI and PM Sadly most organizations lack the motivation to embrace transparency and accountability or to align with the strategy of the organization enabling execution and coordination in unison with the mission However once an organization and its leadership are ready to take a step towards real change creating an environment of openness sharing and alignment with BI and PM as its centerpiece the next question then becomes one of how and where to begin Even with great strategic intent missteps in the development and deployment of BI and PM can cause disillusionment and disappointment lending support to the naysayers of the organization and leading to failure and abandonment of these critical programs

Using Performance Information to Facilitate Decisionmaking in Transportation Logistics James Shuler,2009-09-08 This book assesses whether and to what extent senior logistics executives use performance information when making logistics related decisions The research examines the performance management and measurement systems and processes within three major government organizations determines what conditions if any affect logistics processes and how the organizations measure them and explores whether senior officials use this information in their decisionmaking Case studies were conducted on the United States Department of Defense DOD the United States Postal Service USPS and the United States Department of Energy DOE Based on 12 critical practices that the United States General Accounting Office has identified for federal agencies to use in assessing compliance with the Government Performance and Results Act of 1993 GPRA 28 evaluation factors were used to assess the use of performance information at four logistical levels within each agency

Understanding Organizations and Management Through Triangle Analysis and Performance James Shuler,2006 There is a lack of understanding of how management within organizations make decisions and how these decisions are motivated based on the organization's structure People within and outside of the organizational structure always want to understand how and why these decisions

are made to better position themselves The purpose of this book is to help the reader understand organizations and management their structure and behavior and the decisions that are made within The new information that this book offers the readers is a simplified system for understanding the decision process at the various levels within the organization This book introduces triangle analysis as a simple process that everyone can use to understand organizations how they work and how decisions are made Clinical Technologies: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2011-05-31 This multi volume book delves into the many applications of information technology ranging from digitizing patient records to high performance computing to medical imaging and diagnostic technologies and much more
