The Paradox of Relevance Carol J.

Greenhouse, 2011-05-05 Selected by Choice magazine as an Outstanding Academic Title Between 1990 and 1996 the U S Congress passed market based reforms in the areas of civil rights welfare and immigration in a series of major legislative initiatives These were announced as curbs on excessive rights and as correctives to a culture of dependency among the urban poor stock images of racial and cultural minorities that circulated well beyond Congress But those images did not circulate unchallenged even after congressional opposition failed In *The Paradox of Relevance* Carol J Greenhouse provides a political and literary history of the anthropology of U S cities in the 1990s where below the radar New Deal liberalism with its iconic bond between society and security continued to thrive *The Paradox of Relevance* opens in the midst of anthropology s so called postmodern crisis and the appeal to relevance as a basis for reconciliation and renewal The search for relevance leads outward to the major federal legislation of the 1990s and the galvanic political tensions between rights and market based reforms Anthropologists efforts to inform those debates through relevant ethnography were highly patterned revealing the imprint of political tensions in shaping their works central questions and themes as well as their organization narrative techniques and descriptive practices In that sense federal discourse dominates the works demonstrations of ethnography s relevance however the authors simultaneously resist that dominance through innovations in their own literariness in particular drawing on diasporic fiction and sociolegal studies where these articulate more agentic meanings of identity and difference The paradox of relevance emerges with the realization that in the context of the times affirming the relevance of ethnography as value neutral science required the textual practices of advocacy and art
