Reforming the International Financial System for Development Jomo Kwame Sundaram,2011-01-17 The 1944 Bretton Woods conference created new institutions for international economic governance Though flawed the system led to a golden age in postwar reconstruction sustained economic growth job creation and postcolonial development Yet financial liberalization since the 1970s has involved deregulation and globalization which have exacerbated instability rather than sustained growth In addition the failure of Bretton Woods to provide a reserve currency enabled the dollar to fill the void which has contributed to periodic massive U S trade deficits Our latest global financial crisis in which all these weaknesses played a part underscores how urgently we must reform the international financial system Prepared for the G24 research program a consortium of developing countries focused on financial issues this volume argues that such reforms must be developmental Chapters review historical trends in global liquidity financial flows to emerging markets and the food crisis identifying the systemic flaws that contributed to the recent downturn They challenge the effectiveness of recent policy and suggest criteria for regulatory reform keeping in mind the different circumstances capacities and capabilities of various economies Essays follow ongoing revisions in international banking standards the improved management of international capital flows the critical role of the World Trade Organization in liberalizing and globalizing financial services and the need for international tax cooperation They also propose new global banking and reserve currency arrangements

Reform Of The International Monetary System And Internationalization Of The Renminbi Ruogu Li,2015-11-09 This book argues that only by reforming the international monetary system can we prevent financial crises in the future and the internationalization of the Renminbi China s national currency will be an important step in the process Just as the old saying goes An old building needs to be demolished before a new one can be erected in its place there will be no construction without destruction The commencement of the dismantling of the old monetary system is also the beginning of the construction of the new one Contrary to Western rhetoric which portrays China as part of the cause of the recent financial crisis the author contends that China is actually a victim of the current unjust international economic and monetary system To address the imbalance and break the dollar dominated international monetary system the author calls for the internationalization of the Renminbi and diversification of the international monetary system Written by one of the foremost financial practitioners in China this book is thought provoking and provides a unique Chinese perspective on how the international monetary system should be reformed what the future system should look like and the role China should play in the process It is a required reading for anyone interested in understanding China s own vision in its rise in the global political economic and financial systems
