Reforming The Schools For Teachers:

Professionalism and Community Karen Seashore Louis, Sharon D. Kruse, 1995-03-24 Authors Louis and Kruse examine the question Why do some school communities succeed and others fail They take a look at five urban schools that have been attempting restructuring for several years enough time to show results They describe how the development of a professional community or the lack thereof impacts the implementation of change and how teachers efforts at professionalism can positively affect the process Focusing on the structural social and human conditions of schooling the authors describe how to form a professional community Using their extensive research on professionalism they develop a framework for evaluating the elements of community and then use the framework to present a cross case analysis of various schools in the study Professionalism and Community is a potent source of information for all policymakers and school leaders who are committed to long term effective change It reveals a significant reason why so many well intentioned well planned reforms fail in spite of individual commitment and the heroic efforts of the participants By observing those who have gone before readers can learn important lessons from this study and discover the keys to making their own reform efforts work *Reforming Teacher Education* Sheila Nataraj Kirby, Jennifer Sloan McCombs, Heather Barney, Scott Naftel, 2006-09-15 Teachers for a New Era TNE is one of the latest efforts aimed at teacher education reform Eleven institutions participate in TNE which emphasizes evidence based decisionmaking collaboration between education and arts and sciences faculty and teaching as an academically taught clinical practice profession The authors studied the 11 TNE sites to examine the process by which reform will result in highly qualified teachers capable of producing improvements in student learning **Reforming Teaching and Teacher Education** Eija Kimonen, Raimo Nevalainen, 2017-03-21 What are the prerequisites for reforming education and how can these reforms be seen in school development and culture How should teacher education support this reform process What are the principles and practices underlying the functioning of the schools of tomorrow These questions are examined in this unique volume The authors in this book argue that the central function of teacher education and education in general is to respond to the challenges brought on by the twenty first century According to this approach the competencies and skills needed in the future are not merely a new addition to school activities but rather something requiring a comprehensive reform of school culture encompassing teacher education curricula and teaching methods Such a fundamental process of change in the action and thinking models used by schools would be an effort to achieve a complete transformation the result of which would be schools developing into organizations that are both creative and imbued with a strong sense of community A central attribute is that the creation of new knowledge is not just restricted to the classroom but also takes place in out of school environments This would link learning to its natural context eventually leading to an ideal instruction that is actively problem oriented holistic and life centered This reform minded volume is divided into three parts The first part focuses on the reform processes in teacher education the second on the reforms of pedagogics at schools

and teacher education institutions and the third on the processes of reculturing schools New prospects for active schools in the United States and Europe as well as in Japan and China are discussed **Extending Educational Reform** Amanda Datnow, Lea Hubbard, Hugh Mehan, 2005-11-02 In an effort to improve student achievement thousands of US schools have adopted school reform models devised externally by universities and other organizations Such models have been successful in improving individual schools or groups of schools but what happens when educational reform attempts to extend from one school to many Through qualitative data from several studies this book explores what happens when school reform goes to scale Topics covered include why and how schools are adopting reforms the influence of the local context and wider constraints on the implementation of reform teachers and principals as change agents in schools the evolution of reform design teams the implementation sustainability and expiration of reform and its impact on educational change Each chapter concludes with guidelines for policy and practice This book will be of interest to educational leaders and staff developers educational researchers and policy makers in the US and internationally **Reforming the Schools--for Teachers** John W.
