Reform and Change in Higher Education James Mauch, Paula Sabloff, 2018-10-10 Originally published in 1995 Reform and Change in Higher Education is composed of 9 essays originally presented at a symposium International Perspectives on the Relationship Between Governments and Universities and a UNESCO Forum of Experts on Strengthening Capacities for Research in Higher Education Papers explore how government policy affects universities and how universities influence government This collection presents case studies of educational reform and change in 10 nations focusing on the changing role of government involvement in higher education The book deals comparatively with planned change in systems of higher education initiated by central governments and with the character and dynamics of state university relationships both collectively and individually **University Reform** Philip G. Altbach, 1980 **Reforms in Higher Education** Keith Watson, Celia Modgil, Sohan Modgil, 1997-01-01 This text addresses the reforms in the financial and administrative structure of higher education government intervention in introducing new managerial techniques and quality audits and the implications of these changes for both academics and administrators It is one of a series of four volumes which look at the educational dilemmas facing governments professional educators and practising administrators in the current climate in education The issues are addressed from international and comparative perspectives Reforms in Higher Education Keith Watson, 1996-12-05 This text addresses the reforms in the financial and administrative structure of higher education government intervention in introducing new managerial techniques and quality audits and the implications of these changes for both academics and administrators It is one of a series of four volumes which look at the educational dilemmas facing governments professional educators and practising administrators in the current climate in education The issues are addressed from international and comparative perspectives *State and Market in Higher Education Reforms* Hans G. Schuetze, Germán Álvarez Mendiola, Diane Conrad, 2012-09-05 Universities have never been static Even so it is fair to say they have experienced a most radical transformation in the past twenty years During this period the role and responsibility of the state generally have been broadly limited while allowing market forces private ownership and control more influence But even where the state is still the main provider or funder it relies increasingly on market mechanisms for example contractual relations between state and institutions competition among providers for resources and external assessment of outputs which means the results or impact of what universities do in particular teaching and research The new terminology speaks of price and competition inputs and outputs resources cost and benefits demand and supply provider and customer consumers and investors quality control and accountability Education and post secondary education especially are increasingly seen as matters for markets Formal post secondary education becomes a service commercialized and traded across national borders This volume on changing relationship between state and market contains besides an introductory analytic overview of the issues accounts from different countries regions and thematic perspectives Chapter authors describe and analyze

government reforms and other developments that have directly or indirectly affected this relationship Although the geographical focus is on North America especially Mexico South East Asia and Europe the phenomenon is not limited to these regions and countries but worldwide *Effects of Higher Education Reforms: Change Dynamics* Martina Vukasović, Peter Maassen, Monika Nerland, Bjørn Stensaker, 2012-12-09 Higher education is in transition On the one hand over the last decades it has become politically and economically more important and thus also an object of reforms On the other hand higher education has become less special and is no longer able to justify its unique governance arrangements This volume presents a collection of contributions that go beyond reform agendas as such and focus on the effects of reforms at all relevant levels in higher education systems It is organised in four themes education research governance and academic profession with a variety of levels of analysis theoretical perspectives methodological approaches and geographical foci The topics in focus include the possible impact of latest national and European initiatives changes in the primary processes education and research on the levels of institutions professions and for individuals as well as higher education dynamics in contexts often overlooked in the literature e g Africa The aim is to take stock of the growing knowledge basis with respect to higher education with a special focus on the influence of reforms on the key aspects of higher education Globalisation and Higher Education Reforms Joseph Zajda, Val Rust, 2016-02-12 This volume explores the interrelationship between ideology the state and higher education reforms setting it in a global context It examines some of the major higher education reforms and policy issues in a global culture particularly in the light of recent shifts in quality and standards driven education and policy research In doing so the book provides a comprehensive picture of the intersecting and diverse discourses of globalisation and policy driven reforms in higher education Representing scholarly research on major discourses in the field of higher education reforms the book draws upon recent studies in the areas of globalisation equality and the role of the state in higher education reforms It critiques the neo liberal ideological imperatives of current higher education and policy reforms and illustrates the way that shifts in the relationship between the state and higher education policy affect current trends in higher education reforms Individual chapters critically assess the dominant discourses and debates on higher education and policy reforms Using diverse comparative education paradigms from critical theory to historical comparative research the chapters focus on globalisation ideology and higher education reforms and examine both the reasons and outcomes of higher education reforms and policy change Anyone who has been involved in higher education over the past few decades cannot fail to be affected by the impact of globalisation and neo liberal policies on universities and society at large In Globalisation and Higher Education Reforms the 15th volume of the series Globalisation Comparative Education and Policy Research Joseph Zajda and Val Rust present chapters on education reform in the USA and in international contexts that highlight the inroads that neo liberalism has made into policy making at higher education institutions The chapters also illustrate the way universities have been reinventing themselves to meet the demands of a knowledge society in which corporate values of

efficiency performance and managerialism drive the agenda What are the effects of internationalisation on higher education in the universities of today With chapters from internationally respected scholars from around the globe this book seeks to address the many issues of the new reality in higher education This is a welcome accessible volume for all those concerned with research policy making and curriculum development Professor Suzanne Majhanovich Western University *Policy Analysis of Structural Reforms in Higher Education* Harry de Boer,Jon File,Jeroen Huisman,Marco Seeber,Martina Vukasovic,Don F Westerheijden,2016-11-09 This book addresses the complex phenomenon in higher education of structural reforms in higher education systems Across the globe governments initiate comprehensive reforms of their higher education systems because they want their models to be the best and to excel at what they do This regularly requires governments to change the higher education landscape to achieve their set objectives Changes can include merger processes the introduction of a new sector of higher education or a new type of higher education institution or excellence initiative This book explores the current understanding of how successful such comprehensive reforms have been through an examination of eleven reform cases in European countries For each reform the different phases of the policy process policy objectives design implementation policy tools and evaluation are systematically described and analysed to provide an overview of the factors that contribute to the success or failure of the reforms **Current Issues in Higher Education** Stanley D. Murphy,John Eddy,1998 A collection of 13 studies based on research into ongoing changes in higher education in the US They cover leadership wellness and health programs student services administration curriculum technology athletics diversity volunteer service and international issues Discussion questions for each study are appended for use in a graduate education course Annotation copyrighted by Book News Inc Portland OR **Pruning The Ivy** Milton Leontiades,2007-04-01 Higher education in America is the best in the world but it is also desperately in need of reform Lacking effective competition and insulated from market forces universities have created a model fundamentally at odds with free market principles In a system few outsiders comprehend universities uniquely are run for the benefit of faculty Increasingly top universities have come to resemble closed academic societies Admission is by way of a Ph D degree Mastery of abstract research for its own sake is the route to promotion and advancement Teaching is of incidental importance for tenure the goal of every academic Achieving tenure assures long term employment without mandatory retirement plus freedom from inhibitions on speech or actions Faculty share governance with an administration although faculty lack managerial skills or responsibility for their recommendations Politically conformist faculty think one way and recruit newcomers who think alike Given time institutions that do not attract strong leaders or demand accountability from faculty are destined to underperform Cracks in the seams of the current system are emerging in out of control costs and greater competition Lacking normal measures of efficiency or productivity universities costs tend to spiral higher with future escalation a given The trends are clear but not yet ominous Without reform America s universities are coasting Can reforms take hold before a crisis is reached Only if strong voices

demand it Reform from universities that are characterized by intellectual inbreeding and self regulation cannot be expected Assuring future generations of a quality education is the collective responsibility and duty of the citizenry Based on an inside out view of universities this book provides the ammunition for such a campaign It provides the information and stimulus for reform for legislators community leaders academics and average citizens
