Disability Research Simoni Symeonidou, Karen Beauchamp-Pryor, 2013-11-19 Purpose Process and Future Direction of Disability Research brings together the collective experience of an international network of early career researchers who set out to discuss the complexity of researching disability As newcomers to the research process the researchers detail their apprehensions about embarking on doctoral research together with the struggles they experienced along the way and importantly the motivation that drove them to complete their projects Contributors present an open and honest reflection on their research experience Interests motives and values which underpinned the direction of their research projects are explored questioning whether their beliefs were subsequently challenged changed or validated Research decisions were driven by a range and combination of personal experience of disability and professional experience of working with disabled people The influence of personal and professional approaches within research is addressed along with subsequent dilemmas Ideological battles are detailed which include the place of the social model of disability in research and the oppressive nature of doing disability research The researchers identify and examine their experience throughout the process of analysis writing up and presenting data and question how far their data resulted in confusions or conclusions Contributors explore their moral and political position as researchers and the potential influence on the validity of their findings Issues about dissemination and the impact of their findings are also considered Future research aims and challenges are identified with each contributor critically questioning the unfinished business that their research has involved Essential reading recommended for students and supervisors engaged in disability studies and inclusive education **Disability, Human**

Rights and Society , *Researching Disability Sport* Ben Powis,James Brighton,P. David Howe,2022-12-12 Marking a new direction for disability sport scholarship this book explores cutting edge issues and engages creatively with contemporary approaches to research in this important emerging discipline Featuring contributions from leading and up and coming scholars around the world the book s wide ranging chapters offer novel perspectives on the relationship between theory method and empiricism in disability sport research and highlight how researchers can be both innovative and informed when entering the field It also explores methodological considerations when conducting disability sport research including social cultural and political reflections of the research process from disabled and non disabled academics This much needed resource supports disability sport scholars in developing a conceptual grounding in the subject and establishes a space for intersectional accounts of sport and physical activity which challenge homogenous understandings of disability This book is essential reading for any student or researcher working in disability sport adapted physical activity or adapted physical education and a valuable reference for anybody with an interest in the sociology of sport disability studies cultural studies the body or research methodology *Social Research and Disability* Ciaran Burke,Bronagh Byrne,2020-12-29 Social Research and Disability argues that the contemporary rules of sociological methods outlined in numerous research methods texts make a number of assumptions concerning the researcher including ambulant sight hearing and speech In short the disabled researcher is not considered when outlining the requirements of particular methods Drawing upon these considerations the volume emphasizes how disabled researchers negotiate the empirical process in light of disability whilst retaining the scientific rigour of the method It also considers the negative consequences arising from disabled researchers attempts at passing and the benefits that can emerge from a reflexive approach to method This innovative and original text will for the first time bring together research active academics who identify as being disabled to consider experiences of being disabled within a largely ableist academy as well as strategies employed and issues faced when conducting empirical research The driving force of this volume is to provide the blueprints for bringing how we conduct social research to the same standards and vision as how the social world is understood multi faceted and intersectional To this end this edited collection advocates for a sociological future that values the presence of disabled researchers and normalises research methods that are inclusive and accessible The interdisciplinary focus of Social Research and Disability offers a uniquely broad primary market This volume will be of interest not only to the student market but also to established academics within the social sciences *The Handbook of Social Research Ethics* Donna M. Mertens,Pauline E. Ginsberg,2009 Brings together international scholars across the social and behavioural sciences and education to address those ethical issues that arise in the theory and practice of research within the technologically advancing and culturally complex world in which we live
