Reshaping European Defense:

Reshaping European Defence Trevor Taylor, 1994 Members of the European Strategy Group present a study of how Great Britain France Germany and Italy the Big Four and the Netherlands one of the most important smaller powers are reviewing their armed forces Preliminary lessons for the comparative exercise are drawn *Reshaping the European Union* Klaus Weber, Henning Ottmann, 2018-01-29 Das Buch schlägt eine tiefgreifende Reform der EU vor Defekte der EU werden identifiziert Die Vorschläge basieren auf den Konzepten begrenzter Supranationalität und einer ausgewogenen Sicht des Nationalstaats Die EU wird vor allem gebraucht für Frieden Wohlstand Kompensation der relativ geringen Größe und begrenzten Macht ihrer Mitgliedstaaten und zur Bewahrung grundlegender Prinzipien der westlichen Zivilisation Eine ausgewogene Sicht des Nationalstaats bedeutet Erhaltung der Vorteile des gut gestalteten Nationalstaats im Vergleich zur EU sowie Vermeidung von Nationalismus und Krieg Das Buch schlägt auch eine Neugestaltung der EU Rechtsetzung und der EU Verträge eine untergeordnete Rolle der Europäischen Kommission einen Court of Appeal und eine geänderte Zusammensetzung der Europäischen Zentralbank vor Möglichkeiten des Überlebens der Eurozone werden diskutiert Bei praktischer Realisierung dieser Vorschläge könnte sich die EU zukünftig in einem besseren Zustand befinden **Europe**

Defense Shift Michael Davis, AI, 2025-03-12 Europe Defense Shift examines Europe's increasing focus on military independence amidst shifting global dynamics It explores the historical context of European defense cooperation noting past attempts at military integration and analyzing the current political climate that fuels the need for a stronger more self-reliant European defense posture The book highlights how factors like transatlantic tensions and the perceived decline of American influence are driving this shift The book argues that Europe is re-evaluating its security dependencies due to both internal and external pressures While complete independence from the U.S. is unlikely soon the trend towards greater strategic autonomy is deemed irreversible Europe Defense Shift begins by examining the historical foundations of European defense structures progresses to analyzing current challenges and opportunities and culminates in exploring practical applications including policy recommendations This book provides a unique perspective by combining historical analysis with contemporary political and technological assessments It bridges the gap between academic theory and practical policymaking offering valuable insights into European Politics International Relations and the evolving landscape of European Security **Securitizing Balance of Power Theory** Ilai Z. Saltzman, 2012 Securitizing Balance of Power Theory A Polymorphic Reconceptualization by Ilai Z. Saltzman presents a cutting edge attempt to re-conceptualize one of the fundamental concepts of International Relations theory balance of power theory by examining insights from historical analysis of interwar and post Cold War cases The Handbook of European Defence Policies and Armed Forces Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of

national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

European Defence Policy Frédéric Mérand, 2008-05-22 This book explains the creation of the European Union s Security and Defence Policy to this day the most ambitious project of peacetime military integration Whether hailed as a vital step in the integration of Europe or berated as a wasteful threat to U S power European citizens are increasingly interested in the common defence policy Today European Defence is more popular than the European Union itself even in Great Britain Mérand addresses the fundamental challenge posed by military integration to the way we think about the state in the 21st Century Looking back over the past 50 years he shows how statesmen diplomats and soldiers have converged towards Brussels as a natural solution to their concerns but also as something worth fighting over The actors most closely associated to the formation of nation states are now shaping a transgovernmental security and defence arena As a result defence policy is being denationalized Exploring the complex relations between the state the military and citizenship in today s Europe Mérand argues that European Defence is a symptom but not a cause of the transformation of the state This book is an original contribution to the theory of European integration Drawing on the work of Pierre Bourdieu Mérand develops a political sociology of international relations which seeks to bridge institutionalism and constructivism His careful study of practices social representations and power structures sheds new light on security and defence cooperation but also on European cooperation more generally

Reshaping Europe Kim R. Holmes, Jay P. Kosminsky, 1990 *The Politics and Economics of Defence Industries* Efraim Inbar, Benzion Zilberfarb, 2013-09-13 This volume provides a policy relevant analysis of the complex web of contemporary economic trends political developments and strategic considerations that are shaping the contours of the new post Cold War world market for weaponry

Handbook of Public Policy in Europe H. Compston, 2004-10-01 The Handbook of Public Policy in Europe

provides an invaluable overview of the content of public policy across the full range of policy areas in Britain France and Germany It is designed to be used by students experts and practitioners both to help compare public policy across different policy areas and countries and as a source of information on individual policy areas Each chapter describes the nature of public policy in a particular area makes detailed comparisons of selected aspects and outlines recent developments Detailed Internet references are also provided

The EU's Strategic Dilemma in the Ukraine War Viktor Jakupec, 2025-08-21 As the war in Ukraine enters its fourth year this book critically examines the strategies employed by the European Union EU and the United States US in their support of Ukraine It examines how sanctions military aid and diplomacy have shaped the conflict and considers whether these efforts are falling short Through political economic and strategic analysis it explores the EU's internal divisions the changing role of US leadership under a second Trump administration and the increasing risk of Ukraine being marginalised in global negotiations The author questions whether the EU's reliance on sanctions and fragmented military support has weakened its own position more than that of Russia Providing a realist perspective on the war's broader geopolitical consequences and the uncertain future of European security this book challenges dominant narratives

The Shaping of Foreign Policy William Zimmerman, 2017-07-12 How are foreign policy decisions made This volume shows the various approaches to answer this question In their introduction Jacobson and Zimmerman make clear the goals and techniques of the comparative analysis of foreign policy behavior and following this they provide seven basic essays exemplifying with variations the principal approaches used to explain foreign policy behavior the systemic the environmental the societal the governmental and the idiosyncratic or psychological Jan F Triska and David D Finley illustrate the systemic approach as applied to Soviet American relations Harold and Margaret Sprout then deal with the significance of the physical environment in the study of international politics Two essays follow by respectively Karl W Deutsch and Gabriel A Almond representing the merger of international and comparative studies in this field The contribution by Henry A Kissinger examines the relationship of certain governmental systems to foreign policy behavior The editors introduction and selections reflect excitingly and accurately the state of the art of comparative foreign policy analysis and place before the reader in clear and compact form the continuing dialogue among scholars about one of the most controversial areas in the study of political processes

The Cambridge History of the European Union: Volume 2, European Integration Inside-Out Mathieu Segers, Steven Van Hecke, 2023-11-09 Volume II examines the history of the European Union from an inside out perspective focusing on the internal developments that shaped the European integration process Split into three parts Part I covers the principles that have defined European integration exploring the treaties and their changes through time with Brexit being a core milestone Part II considers the different instruments within the architecture of European integration with special focus on the development of policies the euro and enlargement Part III concentrates on the various narratives surrounding European integration in particular the concepts goals and ideas that both spoke and failed to speak to the hearts

and minds of Europeans This includes the *longue durée* concept peace European culture the absence of religion prosperity and a lack of solidarity and democracy *Reconsidering Europeanization* Florian Greiner, Peter Pichler, Jan Vermeiren, 2022-08-01 This pertinent and highly original volume explores how ideas of Europe and processes of continental political socio economic and cultural integration have been intertwined since the nineteenth century Applying a wider definition of Europeanization in the sense of becoming European it will pay equal attention to counter processes of disentanglement and disintegration that have accompanied slowed down or displaced such trends and developments By focusing on the practices agents and experience of Europeanization the volume strives to bring together the history of ideas and the history of human actions and conduct two approaches that are usually treated separately in the field of European studies *Friendly Rivals* Wallace J. Thies, 2015-03-27 Viewing the behavior of NATO members through the prism of bargaining theory reveals them as states intent on obtaining the benefits of membership at the least cost to themselves This book shows how NATO members use a variety of strategies and tactics to try to get the better of each other without wrecking an alliance that realizes their shared goals and from which they all benefit The book examines the original design of the alliance patterns of bargaining during the Cold War and post Cold War periods how their rivalries impact members domestic policies of defense and welfare and what this history suggests about NATO's future prospects Recent interventions in the Balkans and the Middle East make this virtually a playbook for following current events *The Stratified State* William M. Dugger, William T. Waller Jr, 2019-07-26 These essays in the purest tradition of political economy consider three major themes from the multiple relationships between the state and the economy duality myth and crisis The state is a complex mix of dualisms the welfare versus the warfare state the agency of both social integration and exploitation and public versus private institutions The editors aim to distinguish true from false dualisms Myths in modern society are important as they enables whites to dominate blacks men to dominate women warplanners to dominate peacemakers the rich to dominate the poor The editors consider the myth that the state and the market are separate the state as a single monolithic structure and that we can all identify and share in a national interest The crisis of the state is the third major theme The state is in crisis because we have no fully developed theory of the state because its welfare and warfare functions are undergoing profound change The essays are all written from the point of view of radical institutionalism and emphasise the need for increased participation in the policymaking and policy evaluating processes of the state *The World Reshaped* Richard Cobbold, 2016-07-27 *The World Reshaped* Fifty Years after the War in Europe looks at the way the world has evolved since the end of the Second World War The book focuses on Europe commemorating the end of the War and the seemingly inevitable transition into the Cold War the break up of the Soviet Union and projections into the future The contributions each with their own perspectives trace many of the dominant themes of the history of Europe of the last fifty years and look forward to the next millennium *The Future of Europe* Frances K. Scott, 2001 In support of the Academy Assembly the

Directorate of Libraries Dean of the Faculty produces a special bibliography of Air Force Academy library materials relevant to the current year's theme. The theme for the 2001-2002 academic year is The Future of Europe Integration or Fragmentation. This year's bibliography number 98 in the library's Special Bibliography Series was prepared by Frances K. Scott, Social Sciences Bibliographer and Reference Librarian, who has prepared the annual Academy Assembly bibliography for the past ten years.

Trade, Foreign Policy and Defence in EU Constitutional Law Panos Koutrakos, 2001-03. This book examines how the increasing interdependence between trade and foreign policy can be managed within the legal framework of the European Union. In the context of the legally distinct characteristics of the European Community and the Common Foreign and Security Policy, it analyses the problems underpinning the regulation of three areas: sanctions against third countries, armaments, and exports of dual use goods. The focus is on whether the constitutional order of the European Union may address these problems while performing a variety of functions ensuring the consistency and coherence of its external relations, preserving the *acquis communautaire* and respecting the right of the Member States to conduct their foreign policy as fully sovereign subjects of international law. The book concludes that the interactions between trade and foreign policy may be regulated in a legally sensible and realistic way within the current structure of the European Union. The recent developments regarding the defense and security identity of the European Union and the debate over the nature of an enlarged Union make this book all the more topical.

British Foreign Policy Laurence Martin, John C. Garnett, 1997-01-01. Has the 20th century been one of steady decline for British foreign policy? Can there be a distinct British foreign policy in an age of regionalism and globalization? This study challenges perceptions of irrevocable decline and suggests a more balanced assessment of Britain's strengths and weaknesses. As high politics, including security concerns, diminish in importance, economic and commercial concerns increasingly seem to dictate foreign policy. On the assumption that what the population seeks is a combination of physical security, prosperity, and what could be termed moral self-approbation, this study suggests ways in which Britain could capitalize on its influence and assets to promote its interests. A framework is provided for thinking about British foreign policy at a time when globalization, multinational companies, NGOs, the European Union, and other factors increasingly constrain the freedom of government and the traditional role of the foreign office.

Transatlantic Diplomacy and the Use of Military Force in the Post-Cold War Era M. Wintz, 2010-10-11. This book is an analysis and a set of tools of analysis to explain and understand why, when, where, and how the United States and its major NATO allies will agree or disagree on a collective policy regarding using military force abroad.
