Residential Open Building Stephen H. Kendall, Jonathan Teicher, 2010-04-29 Residential Open Building the result of a CIB Task Group Open Building Implementation provides a state of the art review of open building fundamental principles recent developments and international coverage of current projects on both the public and private arena Open Building is a highly flexible and economical method of building which has far reaching advantages for urban designers architects contractors developers and end users

Residential Architecture as Infrastructure Stephen H. Kendall, 2021-11-29 This edited collection provides an up to date account by a group of well informed and globally positioned authors of recently implemented projects public policies and business activities in Open Building around the world Countless residential Open Building projects have been built in a number of countries some without knowledge of the original theory and methods These projects differ in architectural style building industry methods economic system and social aims National building standards and guidelines have been promulgated in several countries Finland China Japan Korea providing incentives and guidance to Open Building implementation Businesses in several countries have begun to deliver advanced FIT OUT systems both for new construction and for retrofitting existing buildings demonstrating the economic advantages of the responsive independent dwelling This book also argues that the open building approach is essential for the reactivation of the existing building stock for long term value because in the end it costs less The book discusses these developments in residential architecture from the perspective of an infrastructure model of built environment This model enables decision makers to manage risk and uncertainty while avoiding a number of problems often associated with large fast moving projects such as separation and distribution of design tasks and responsibility and the ensuing boundary frictions Residential Architecture as Infrastructure adds to the Routledge Open Building Series and will appeal to architects urban designers researchers and policy makers interested in this international review of current projects policies and business activities focused on Open Building implementation

Satellite-Based Census of Residential Buildings: Application for Climate Risk Assessment Andinet Woldemichael, Iyke Maduako, 2024-09-20 Housing represents the largest asset and liability in the form of mortgages on most national balance sheet For most households it is their largest investment and when mortgages are required also represents the largest component of household debt It is also directly tied to financial markets both the mortgage market and insurance sector Although many countries have a rich set of housing censuses and statistics others have large data gap in this area and therefore struggle to formulate effective policies This paper proposes an approach to

construct a global census of residential buildings using opensource satellite data Such a layer can be used to assess the extent these buildings are exposed to climate hazards and how their production and consumption in turn affect the climate The approach we propose could be scaled globally combining existing layers of building footprints climate and socioeconomic data It adds to the ongoing effort of compiling spatially explicit and granular climate indicators to better inform policies As a case study we compute selected indicators and estimate the extent of residential properties exposure to riverine flood risk for Kenya

Construction and Building Research Carmen Llinares-Millán,Igor Fernández-Plazaola,Francisco Hidalgo-Delgado,María Montserrat Martínez-Valenzuela,Francisco Javier Medina-Ramón,Inmaculada Oliver-Faubel,Isabel Rodríguez-Abad,Andrea Salandin,Rafael Sánchez-Grandia,Isabel Tort-Ausina,2014-01-31 Many areas of knowledge converge in the building industry and therefore research in this field necessarily involves an interdisciplinary approach Effective research requires strong relation between a broad variety of scientific and technological domains and more conventional construction or craft processes while also considering advanced management processes where all the main actors permanently interact This publication takes an interdisciplinary approach grouping various studies on the building industry chosen from among the works presented for the 2nd International Conference on Construction and Building Research The papers examine aspects of materials and building systems construction technology energy and sustainability construction management heritage refurbishment and conservation The information contained within these pages may be of interest to researchers and practitioners in construction and building activities from the academic sphere as well as public and private sectors

The Short Works of John Habraken Stephen H. Kendall,John R. Dale,2023-03-31 This book offers for the first time access to the chronological arc of John Habraken s writing in a single collection Few architects or scholars have so consistently and patiently pursued such a humane and culturally vital set of radical questions related to the behaviour of the built environment as N John Habraken From the publication of his first book in 1960 he has quietly helped redraw the map of architectural research education practice design methods and theory His insights lead us to a better understanding of how the built field works contributing to the development of methods enabling professionals to contribute to its coherence and resilience Following an introductory essay by the editors placing Habraken s work in context this collection is organized in two sections and further organized around a number of specific themes The Built Field Role of the Architect Control Sharing Forms Examples of Ways of Doing Open Building Tools and Cultivating the Built Environment A series of interviews with the author enable him to reflect on his journey of inquiry research advocacy and teaching and the relationship between ways of seeing and ways of doing Offering theoretical perspectives and methodological ways forward this book will be of interest to architects planners and urban designers tackling the challenges of the contemporary built environment that Habraken identifies as well as educators and students

Improvement of Buildings' Structural Quality by New Technologies

Christian Schauer, 2005-01-20 Around 100 scientists from 21 countries contributed to the four years of assembled works contained in this volume. Launched in May 2000, the aims of this cooperative action were to develop, combine and disseminate new technical engineering technologies to improve the quality of urban buildings, to propose new technical solutions to architects and planners to reduce the disturbance caused by construction in urban areas and improve urban quality of life. This publication is the final report of COST C12 and includes datasheets of key information related to mixed building technology, structural integrity under exception actions and urban design. *Civil, Architecture and Environmental Engineering Volume 1* Jimmy C.M. Kao, Wen-Pei Sung, 2017-07-12 The 2016 International Conference on Civil Architecture and Environmental Engineering ICCAE 2016, November 4-6, 2016, Taipei, Taiwan, is organized by China University of Technology and Taiwan Society of Construction Engineers, aimed to bring together professors, researchers, scholars and industrial pioneers from all over the world. ICCAE 2016 is the premier forum for the presentation and exchange of experience, progress and research results in the field of theoretical and industrial experience. The conference consists of contributions promoting the exchange of ideas between researchers and educators all over the world. **Civil, Architecture and Environmental Engineering** Jimmy C.M. Kao, Wen-Pei Sung, 2017-04-24 This two-volume work contains the papers presented at the 2016 International Conference on Civil Architecture and Environmental Engineering ICCAE 2016 that was held on 4-6 November 2016 in Taipei, Taiwan. The meeting was organized by China University of Technology and Taiwan Society of Construction Engineers and brought together professors, researchers, scholars and industrial pioneers from all over the world. ICCAE 2016 is an important forum for the presentation of new research developments, exchange of ideas and experience, and covers the following subject areas: Structural Science, Architecture Engineering, Building Materials, Materials Science, Construction Equipment, Mechanical Science, Environmental Science, Environmental Engineering, Computer Simulation, Computer and Electrical Engineering. *Building Dynamics* Branko Kolarevic, Vera Parlac, 2015-06-12 Buildings are increasingly dynamic, equipped with sensors, actuators and controllers; they self-adjust in response to changes in the external and internal environments and patterns of use. Building Dynamics asks how this change manifests itself and what it means for architecture as buildings, weather programs, change envelopes, adapt, interiors are reconfigured, systems replaced. Contributors including Chuck Hoberman, Robert Kronenburg, David Leatherbarrow, Kas Oosterhuis, Enric Ruiz Geli and many others explore the changes buildings undergo and the scale and speed at which these occur, examining which changes are necessary, useful, desirable and possible. The first book to offer a coherent, comprehensive approach to this topic, it draws together arguments previously only available in scattered form. Featuring the latest technologies and design approaches used in contemporary practice, the editors provide numerous examples of cutting-edge work from leading designers and engineering firms working today. An essential text for students taking design studio classes or courses in theory or technology at any level, as well as professionals interested in the latest mechatronic technologies and design techniques.

Complex Housing Julia Williams Robinson, 2017-09-18 Winner of the 2021 ARCC Book Award Complex Housing introduces an architectural type called complex housing common to the Netherlands and found in other Northern European countries Eight fully illustrated case studies show successful approaches to designing for density which reflect values such as long term planning a right to housing and access to light and air The case studies demonstrate a wide range of applications including a mixture of urban and suburban sites various numbers of dwelling units low to high density approaches different architectural styles and organizational strategies that can be adopted in projects elsewhere More than 350 color images

The Architecture of Persistence David Fannon, Michelle Laboy, Peter Wiederspahn, 2021-08-24 The Architecture of Persistence argues that continued human use is the ultimate measure of sustainability in architecture and that expanding the discourse about adaptability to include continuity as well as change offers the architectural manifestation of resilience Why do some buildings last for generations as beloved and useful places while others do not How can designers today create buildings that remain useful into the future While architects and theorists have offered a wide range of ideas about building for change this book focuses on persistent architecture the material spatial and cultural processes that give rise to long lived buildings Organized in three parts this book examines material longevity in the face of constant physical and cultural change connects the dimensions of human use and contemporary program and discusses how time informs the design process Featuring dozens of interviews with people who design and use buildings and a close analysis of over a hundred historic and contemporary projects the principles of persistent architecture introduced here address urgent challenges for contemporary practice while pointing towards a more sustainable built environment in the future The Architecture of Persistence Designing for Future Use offers practitioners students and scholars a set of principles and illustrative precedents exploring architecture's unique ability to connect an instructive past a useful present and an unknown future

Design Quality in New Housing Matthew Cousins, 2009-06-02 This book addresses the need for an in depth study into design quality in new housing The wider implications of policy and design are examined through a series of case studies of new housing projects in the UK and the Netherlands Dutch interdisciplinary design and modern methods of construction are widely considered to be of the highest quality from which much can be learned and understood This new guide offers architects the best practice for the design policy and construction of new homes The author considers proposals for the Thames Gateway and government incentives to create better quality housing including the 60 000 house and design reviews The wider implications of skills and training of architects planners design professionals and those parties involved in housing are also addressed

Best Practices for Effecting the Rehabilitation of Affordable Housing David Listokin, 2006 Department of Defense Housing Facility, Novato, Disposal and Reuse, 1997 *Design for Adaptability in Mass Housing* Guopeng Li, 2020-11-05

Before discussing the research itself in greater depth it is beneficial at this stage to introduce the background to the research To do so the chapter is divided into four parts The first part of the chapter summarises terminologies associated with

adaptability and goes on to define and elaborate on the meaning of adaptability in this research study The second part of this chapter defines mass housing the development of mass housing and its problems are also illustrated In the third part as the key solution for addressing housing occupants requirements and accommodating changes the importance of adaptability in improving overall housing quality particularly from a social financial and environmental point of view is outlined The sustainability of adaptability is also discussed Even though studies of adaptability have been developed structurally functionally technically and financially adaptability still occupies a marginal position due to the production of mass housing The final part of the chapter rethinks the notion of adaptability for mass housing Factors of mass housing related to social financial technical and design issues and which address adaptability are explored Lastly it is revealed that the design aspect of adaptability is chosen as the research focus in this research study **Standardized Guidelines by Building Type**

Siegfried Wyner,2007-12 **Robot Oriented Design** Thomas Bock,Thomas Linner,2015-05-05 The Cambridge Handbooks on Construction Robotics series focuses on the implementation of automation and robot technology to renew the construction industry and to arrest its declining productivity The series is intended to give professionals researchers lecturers and students basic conceptual and technical skills and implementation strategies to manage research or teach the implementation of advanced automation and robot technology based processes and technologies in construction Currently the implementation of modern developments in product structures modularity and design for manufacturing organizational strategies just in time just in sequence and pulling production and informational aspects computer aided design manufacturing or computer integrated manufacturing are lagging because of the lack of modern integrated machine technology in construction The Cambridge Handbooks on Construction Robotics books discuss progress in robot systems theory and demonstrate their integration using real systematic applications and projections for off site as well as on site building production Robot Oriented Design and Management introduces the design innovation and management methodologies that are key to the realization and implementation of the advanced concepts and technologies presented in the subsequent volumes This book describes the efficient deployment of advanced construction and building technology It is concerned with the coadaptation of construction products processes organization and management and with automated robotic technology so that the implementation of modern technology becomes easier and more efficient It is also concerned with technology and innovation management methodologies and the generation of life cycle oriented views related to the use of advanced technologies in construction *Land Utilization : Theory And Practice* R.B.
