Resistance And Control In Pakistan:

Resistance and Control in Pakistan Akbar S. Ahmed, 2004 How can people in the West make sense of contemporary unrest in the Muslim world Is Islamic fundamentalism to be understood purely in religious terms In Resistance and Control in Pakistan one of the world's leading authorities on Islam Akbar S Ahmed illuminates what is happening in the Muslim world today and assesses the underlying causes He does this by telling the dramatic story of the revolt of the Mullah of Waziristan in northwest Pakistan and by placing it within the context of other movements occurring elsewhere in the Islamic world He also examines the social structure and operative principles in Muslim society and scrutinizes the influence of religion in a society that is undergoing modernization Till now there has been little available literature on this topic This book written by an eminent scholar with an international reputation fills this gap giving students of politics sociology and Asian studies a revealing examination of the Muslim world today

disciplines **Developing Sustainable Agriculture in Pakistan** Iqrar Ahmad Khan, Muhammad Sarwar Khan, 2018-04-17 Agriculture plays a pivotal role in the economy and development of Pakistan providing food to consumers raw materials to industries and a market for industrial goods Unfortunately agricultural production is stagnant due to several barriers including a fixed cropping pattern reliance on a few major crops a narrow genetic pool poor seed quality and a changing climate In addition the high cost of production weak phytosanitary compliance mechanisms and a lack of cold chain facilities makes Pakistan agriculturally uncompetitive in export markets Despite all these issues agriculture is the primary industry in Pakistan and small farmers continue to dominate the business Small farmers grow crops for subsistence under a fixed cropping pattern and a holistic approach is required to develop agriculture to improve the livelihoods of the rural populace This book presents an exhaustive look at agriculture in Pakistan Chapters provide critical analyses of present trends inadequacies in agriculture strategic planning improvement programs and policies while keeping in view the natural resources plant and animal related agricultural production technologies input supplies population planning migration and poverty and balanced policies on finance credit marketing and trade The Rise and Decline of the Insurgency in Pakistan's FATA Shahzad Akhtar, 2022-12-16 This book analyzes the emergence rise and decline of insurgency by the Pakistani Taliban in Pakistan's North Western region also known as Federally Administered Tribal Areas FATA It provides a detailed account of the rise and decline of the FATA insurgency and also examines aftereffects of the insurgency Offering an in depth analysis of how insurgency in the FATA began in 2004 after Pakistan entered its military forces into the tribal areas the author illustrates that the insurgency erupted when state repression on masses is combined with a disruption of the previous modus vivendi centered on co optation of local elites In the following years the insurgency became so powerful that most of the FATA region fell under the control of the insurgents The book further argues that a weak counterinsurgency strategy by the Pakistani government characterised by the overzealous use of force and a failure to win the support of local communities led the insurgency to become stronger and expand its control Furthermore the analysis reveals that a more robust counterinsurgency strategy relying more on a determined and a judicious use of force and attempts to gain the trust and support of local communities adopted in the later years led to the collapse of the insurgency In short this book offers an explanation of what makes an insurgency more likely to occur and how insurgency escalates and declines In addition this book sheds light on recent development in FATA including the merger of FATA with the mainstream Pakistan the rise of the Pashtun Tahafuz Movement a non violent protest movement and the resurgence of the Pakistani Taliban especially after the Afghan Taliban capture of Kabul in the wake of US withdrawal of forces in Afghanistan This book is a timely addition to the literature on South Asian Politics and Security Studies **Parasitism and Parasitic Control in Animals** Hafiz Muhammad Rizwan, Muhammad Sohail Sajid, 2023-07-10 Parasitism and Parasitic Control in Animals brings together all the details needed to appropriately manage parasites in domestic animals It provides comprehensive coverage of parasites and factors

Pest Management in Cotton
 Graham A. Matthews, Thomas A. Miller, 2021-12-23 This book presents a global overview of the background to and the current state of crop protection and pest management in cotton crops Cotton is one of the most economically important crops in the world and has been grown for centuries but maintaining high yields of good quality requires sophisticated approaches to pest management The introduction and use of pesticides over the decades significantly increased cotton yields but lead to many adverse environmental impacts Over time new and alternative insecticides were developed but overuse has enabled pests to develop significant resistance The development of genetically modified cotton varieties with toxins derived from *Bacillus thuringiensis* enabled much improved control of lepidopteran larvae including bollworms but as the toxins had no effect on sucking pests farmers had no choice but to continue using insecticides Also some of the new cotton varieties developed in recent times have not adapted to different climatic conditions and the quality of cotton fibre declined as a result This book shows the need for more research to select cotton varieties with high quality fibres suitable for different cotton growing areas and to develop integrated pest management strategies to minimise the use of pesticides It also demonstrates the need for an inter disciplinary approach bringing together plant breeders entomologists plant pathologists agronomists and agricultural engineers to achieve high yields of high quality cotton

The Genesis of Baloch Nationalism Salman Rafi Sheikh, 2018-04-27 This book explores the ideological political and military interventions of the state of Pakistan in Balochistan and traces the genesis of today's secessionist movement It delves into the historical question of Balochistan's integration into Pakistan in 1947 and brings out

the true political and militant character of the movement during the first three decades 1947-77 of Pakistan's existence as a nation state. It shows how the Baloch as well as other minority groups were denied the right to identify themselves as a sub-national ethnic group in the new nation state compounded by a systematic exclusion from decision-making circles and structures of political and economic power. The volume also traces political resistance from within Balochistan and its subsequent suppression by military operations leading to a widespread militant insurgency in the present day. Drawing on hitherto unexplored sources, this book will be indispensable to scholars and researchers of South Asian history, politics, international relations and area studies.

Health Care in Muslim Asia Ronald W. O'Connor, 1994. Afghanistan had the world's highest rates of infant child and maternal deaths when Management Sciences for Health began its project to train and support health workers. This book uses that project to discuss the problems and potential for health development in remote war-torn areas. The field team's efforts provide insight into such problems as coordination among donors of foreign aid and strategies for immunization and family planning. The book analyzes in detail broader issues of health care development such as the management of health systems in times of disorder, the politics of international assistance and women's access to health services in Islamic societies. Unlearning Languages that Control the Mind Vladan Sutanovac, 2025-10-14. The edited collection *Unlearning Languages That Control the Mind* (ULCM) is to be read as a continuous multi-voiced work on what takes place when we forget that unlearning is a part of our existence as much as learning. As the world as we know it finds itself at a critical juncture yet again, how we talk about the continuously amassing genocidal invasions and authoritarian occupations of our minds, thoughts, bodies and environments will affect how we experience, process and counter them on a day-to-day basis. Based on this, ULCM offers its readers a singular interdisciplinary blueprint of the inner and outer workings of motivated language use when in service of mind engineering and engineered acting. As such, it is a valuable enabling resource for anyone looking to identify and unlearn the languages that mask belief traps and cognitive distortions set up by various antisocial actors to keep our day-to-day cognition and acting confined to society as engineered laboratory. With its interdisciplinary breadth and engaging multimodal content, this handbook breaks new grounds in actionable application of science as accessible community enabling tool for seeing through, i.e. dismantling belief traps and mental distortions that turn language use into mind/body abuse.
