Arms Races Nils Petter Gleditsch, Olav Njølstad, 1990-02 A long tradition of theoretical and empirical work has been devoted to the question of the driving forces in the arms race since the 1960s This book takes up the internal factors of arms dynamics such as bureaucratic politics interservice rivalry and the military industrial complex as well as external factors such as interactive arms dynamics between the two superpowers It also deals with the question of technological determinism the ideas that what is technically possible will be done as opposed to the idea that politics is in command Finally factors in the international system affecting arms races are also examined such as long economic waves and power transitions

Delivering on Promises Lauren J. Peritz, 2022-12-21 A timely investigation into the conditions that make international agreements and the institutions that enforce them vulnerable When do international institutions effectively promote economic cooperation among countries and help them resolve conflict Although the international system lacks any central governing authority states have created rules particularly around international economic relations and empowered international tribunals to enforce those rules Just how successful are these institutions In *Delivering on Promises* Lauren J Peritz demonstrates that these international courts do indeed deliver results but they are only effective under certain conditions As Peritz shows states are less likely to comply with international rules and international court decisions when domestic industries have the political ability to obstruct compliance in particular cases The author evaluates the argument with an extensive empirical analysis that traces the domestic politics of compliance with the decisions of two international economic courts the World Trade Organization's dispute settlement mechanism and the Court of Justice of the European Union At a time when international agreements are under attack this book sheds light on the complex relationship between domestic politics and international economic cooperation offering detailed evidence that international economic courts are effective at promoting interstate cooperation

theoretically informed but simultaneously empirically based syntax is dynamic but little represented in the literature This volume addresses this need While there has previously been something of a gulf between theoretical linguists in the generative tradition and those linguists who work with quantitative data types this gap is narrowing In the light of the empirical revolution in the study of syntax even people whose primary concern is grammatical theory take note of processing

effects and attribute certain effects to them Correspondingly workers focusing on the surface evidence can relate more to the concepts of the theoreticians because the two layers of explanation have been brought into contact And these workers too must account for the data gathered by the theoreticians An additional innovation is the generative analysis of historical data this is now seen as psycholinguistic theory relevant data like any other These papers are thus a snapshot of some of the work currently being done in evidence based grammar using both experimental and historical data **Anfangsgründe der**

Naturgeschichte Johann Christian Polykarp Erxleben, Johann Friedrich Gmelin, 1787 *Gödel's Disjunction* Leon Horsten, Philip Welch, 2016 The logician Kurt Gödel in 1951 established a disjunctive thesis about the scope and limits of mathematical knowledge either the mathematical mind is not equivalent to a Turing machine i.e. a computer or there are absolutely undecidable mathematical problems In the second half of the twentieth century attempts have been made to arrive at a stronger conclusion In particular arguments have been produced by the philosopher J.R. Lucas and by the physicist and mathematician Roger Penrose that intend to show that the mathematical mind is more powerful than any computer These arguments and counterarguments to them have not convinced the logical and philosophical community The reason for this is an insufficiency of rigour in the debate The contributions in this volume move the debate forward by formulating rigorous frameworks and formally spelling out and evaluating arguments that bear on Gödel's disjunction in these frameworks The contributions in this volume have been written by world leading experts in the field **Russia and the Right to**

Self-determination in the Post-Soviet Space Johannes Socher, 2021 This book shows that Russia has a distinct approach to the right to self-determination that sets it apart from Western States and from Soviet state practice Drawing on analysis of seven secessionist conflicts and a detailed study of Russian sources it traces how Russian engagement with self-determination has changed over the past three decades **The Immunology of Sepsis - Understanding Host**
