Unamuno's Theory of the Novel C.A. Longhurst, 2017-07-05 Miguel de Unamuno 1864 1936 is widely regarded as Spain s greatest and most controversial writer of the first half of the twentieth century Professor of Greek and later Rector at the University of Salamanca and a figure with a noted public profile in his day he wrote a large number of philosophical political and philological essays as well as poems plays and short stories but it is his highly idiosyncratic novels for which he coined the word *novela* that have attracted the greatest critical attention *Niebla* 1914 has become one of the most studied works of Spanish literature such is the enduring fascination which it has provoked In this study C A Longhurst a distinguished Unamuno scholar sets out to show that behind Unamuno s fictional experiments there lies a coherent and quasi philosophical concept of the *novela* genre and indeed of writing itself Ideas about freedom identity finality mutuality and community are closely intertwined with ideas on writing and reading and give rise to a new and highly personal way of conceiving fiction

Immunodiagnosics R. Edwards, 1999-11-25 Immunodiagnostic tests are analytical methods that use antibodies as reagents whose results are used to aid diagnosis and are widely used in many scientific disciplines and in many different ways Perhaps the most widespread and obvious use is in clinical applications but immunodiagnostic tests are also used in other fields such as forensic science and environmental and food analysis The different types of test range from simple manual methods to fully automated systems with sophisticated integrated detection Immunodiagnosics A Practical Approach starts off by explaining the principles and development of immunodiagnostic tests specifically the use of radioisotopes as tracers Chapter 2 explains the use of solid phase supports to bind immunoreagents Enzymes are widely used as labels in immunoassays and their use with colourimetric fluorimetric and chemiluminescent detection systems is described The use of enzymes as labels reflects the move away from radioisotopes and one of the most powerful non radioisotope procedures is the time resolved fluorescence assay Enzymes can also be used as a simple method of obtaining high performance from immunodiagnosics and this application is covered later in the book The next set of techniques to be described are light scattering techniques which can be used in either simple manual assays or in sophisticated automated procedures The penultimate chapter describes the principles of automation of immunodiagnostic tests The last topic to be discussed is that of quality assurance **The Publishers' Circular and Booksellers' Record**, 1926 FCC Record United States. Communications Commission, 1998 **Bulletin of the Board of Standards and Appeals of the City of New York** New York (N.Y.). Board of Standards and Appeals, 1918 *Unity*, 1903 *Cooper's Leather-Stocking Novels* Geoffrey Rans, 2000-11-09 James Fenimore Cooper's Leather Stocking tales published between 1823 and 1841 are generally regarded as America's first major works of fiction Here Geoffrey Rans provides not simply a new reading of the five novels that comprise the series but also a new way of reading them Rans analyzes each of the five novels The Pioneers The Last of the Mohicans The Prairie The Pathfinder and The Deerslayer in the order in which they were originally composed an achronological sequence in terms of the stories they tell As events in early written novels interact with those in later ones the reader is compelled to construct political meanings different from Cooper's ideological preferences This approach effectively

precludes reading these works as Natty Bumppo's life story or as an aspect of Cooper's Rans presents the series as a text that faithfully reproduces the conflicts Cooper faced both at the time when he wrote the novels and in the history that the novels contemplate Cooper emerges as a composer of richly problematical texts for which no aesthetic resolution is possible and in which every idealization political or poetic is relentlessly subjected to the gaze of historical reality The tension between potential and practice which is apparent in the final two volumes of the tales is present Rans contends from the inception of the series Because the problems of racism and greed that Cooper addresses remained as unresolved for us as for him Rans concludes that this reading of the Leather Stocking tales reinforces both Cooper's central canonical position and his value as an articulator of political conflict Originally published in 1991 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

Constitutionalism Jefferson Powell,1993 Debate over the relationship between morality and the law characterizes the contemporary discussion of American constitutionalism Many theorists equate constitutionalism with the social morality of the American community others deny the existence of such a community and identify constitutionalism simply as the positive law of the state In this thoughtful and innovative book H Jefferson Powell presents a theological interpretation of the connection between constitutionalism and morality Powell locates the origins of constitutional law in the Enlightenment attempt to control the violence of the state by subjecting power to reason He then traces constitutionalism s rapid evolution into a tradition of rational inquiry centered in the practice of adjudication and embodied in a community of lawyers and judges Finally Powell shows how the tradition s nineteenth century presuppositions about the autonomy and rationality of constitutional argument have been undermined in the twentieth century within the constitutional community itself by the acceptance of a positivist and democratic understanding of law Powell shows how the continued willingness of the courts to resolve moral questions by invoking the Constitution has thrown the constitutional tradition into an epistemological crisis He critiques the work of many major theorists John Hart Ely Bruce Ackerman Frank Michaelman Rogers Smith Michael Perry Mark Tushnet Robert Bork Sanford Levinson who he claims persist in attempting to resolve the crisis by redefining constitutionalism as American social morality With reference to Alasdair MacIntyre s concepts of moral tradition and social practice and John Howard Yoder s theological account of the state Powell places his analysis of current constitutionalism within a contemporary Christian theological critique of Western liberalism With certain exceptions Powell concludes there are theological grounds in the United States to prefer decision making by elected officials to decision by constitutional courts Despite the controversial implications for judicial practice and legal argument Powell ultimately argues that the liberal tradition of rational inquiry American constitutionalism be renounced by the Christian community in favor of the majoritarian political process Relational Models Theory Nick Haslam,2004-09-22 This book offers a critical introduction to contemporary relational models theory and illustrates the ways in which it has illuminated a wide range of interpersonal phenomena and stimulated research on individual psychology collective behavior and cult
