Breaking the Conflict Trap World Bank, 2003-05-30 Civil war conflict is a core development issue The existence of civil war can dramatically slow a country's development process especially in low income countries which are more vulnerable to civil war conflict Conversely development can impede civil war When development succeeds countries become safer when development fails they experience a greater risk of being caught in a conflict trap Ultimately civil war is a failure of development *Breaking the Conflict Trap* identifies the dire consequences that civil war has on the development process and offers three main findings First civil war has adverse ripple effects that are often not taken into account by those who determine whether wars start or end Second some countries are more likely than others to experience civil war conflict and thus the risks of civil war differ considerably according to a country's characteristics including its economic stability Finally *Breaking the Conflict Trap* explores viable international measures that can be taken to reduce the global incidence of civil war and proposes a practical agenda for action This book should serve as a wake up call to anyone in the international community who still thinks that

development and conflict are distinct issues **Conflict, Political Accountability and Aid** Paul Collier, 2013-10-31 Paul Collier's contributions to development economics and in regard to Africa in particular have marked him out as one of the most influential commentators of recent times. His research has centred upon the causes and consequences of civil war, the effects of aid and the problems of democracy in low income and natural resource rich societies. His work has also enjoyed substantial policy impact having seen him sit as a senior adviser to Tony Blair's Commission on Africa and addressed the General Assembly of the United Nations. This collection of Collier's major writings with assistance from Anke Hoeffler and Jan Gunning and accompanied by a new introduction provide the definitive account of a wide range of macroeconomic, microeconomic and political economy topics concerned with Africa. Within macroeconomics there is a focus on external shocks, exchange rate and trade policies whilst microeconomic topics focus upon labour and financial markets as well as rural development. Collier's book *The Bottom Billion* had become a landmark book and this summation of the research underpinning it will be a superb guide for all those concerned with African development.

The Political Economy of War and Peace Murray Wolfson, 2012-12-06 In any malignant tumor, metastasis may occur via the bloodstream or the lymphatic channels or across body cavities setting up secondary tumors. Each individual primary tumor has its own pattern. There are probably many causative factors. Treatment depends on the type of tumor, the site of the primary tumor and the extent of the spread. Oxford Concise Medical Dictionary 1996-97. Let us begin by stating the obvious. Acts of organized violence are not necessarily of human nature but they are endogenous events arising within the intrinsic part of evolution of complex systems of social interaction. To be sure, all wars have features in common: people are killed and property is destroyed but in their origin wars are likely to be at least as different as the social structures from which they arise. Consequently, it is unlikely that there can be a simple theory of the causes of war or the maintenance of peace. The fact that wars are historical events need not discourage us. On the contrary, we should focus our understanding of the dimensions of each conflict or classes of conflict on the conjuncture of causes at hand. It follows that the study of conflict must be an interdisciplinary one. It is or a penchant for eclecticism that leads to that conclusion but the not humility, multi-dimensionality of war itself.

Collective Political Violence Earl Conteh-Morgan, 2019-11-19 First published in 2004, *Collective Political Violence* is a concise but thorough interdisciplinary analysis of the many competing concepts, theories and explanations of political conflict including revolutions, civil wars, genocide and terrorism. To further his examination of each type of conflict, Earl Conteh Morgan presents case studies from

the Rwandan genocide to the civil rights movement in the United States Along the way he illuminates new debates concerning terrorism peacekeeping and environmental security Written in a knowledgeable yet accessible manner *Collective Political Violence* treats the issue of political violence with an impressively wide geographic range and successfully straddles the ideological divide

Fighting Over Peace Andrew G. Reiter, 2016-09-19 This book presents post peace agreement violence as a serious yet predictable and manageable political phenomenon Negotiating an end to a civil war is extremely difficult and many signed peace agreements subsequently unravel ushering in renewed conflict In response important international actors have become increasingly involved in conflict mediation peacekeeping and post conflict reconstruction around the globe Policymakers and scholars alike have identified spoilers violent actors who often rise up and attempt to challenge or derail the peace process as one of the greatest threats to peace Using a mixed method approach combining quantitative and qualitative analyses of a newly created global dataset of spoiling Reiter demonstrates that this type of violence occurs in predictable circumstances and only represents a threat to peace under specific conditions The book also shows that spoiling often serves to bring agreement flaws and implementation failures to light and in turn forces actors to recommit to an accord thereby strengthening peace in the long term

Foreign Powers and Intervention in Armed Conflicts Aysegul Aydin, 2012-07-11 Intervention in armed conflicts is full of riddles that await attention from scholars and policymakers This book argues that rethinking intervention redefining what it is and why foreign powers take an interest in others conflicts is of critical importance to understanding how conflicts evolve over time with the entry and exit of external actors It does this by building a new model of intervention that crosses the traditional boundaries between economics international relations

theory and security studies and places the economic interests and domestic political institutions of external states at the center of intervention decisions Combining quantitative and qualitative evidence from both historical and contemporary conflicts including interventions in both interstate conflicts and civil wars it presents an in depth discussion of a range of interventions diplomatic economic and military in a variety of international contexts creating a comprehensive model for future research on the topic

Theories of War and Peace Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

Understanding Boko Haram James J. Hentz, Hussein Solomon, 2017-05-08 The primary objective of this book is to understand the nature of the Boko Haram insurgency in northeast Nigeria Boko Haram's goal of an Islamic Caliphate starting in the Borno State in the North East that will eventually cover the areas of the former Kanem Borno Empire is a rejection of the modern state system forced on it by the West The central theme of this volume examines the relationship between the failure of the state building project in Nigeria and the outbreak and nature of insurgency At the heart of the Boko Haram phenomenon is a country racked with cleavages making it hard for Nigeria to cohere as a modern state Part I introduces this theme and places the Boko Haram insurgency in a historical context There are however multiple cleavages in Nigeria ethnic regional cultural and religious and Part II examines the different state society dynamics fuelling the conflict Political grievances are common to every society however what gives Boko Haram the space to express such grievances through violence Importantly this volume demonstrates that the insurgency is in fact a reflection of the hollowness within Nigeria's overall security Part III looks at the responses to Boko Haram by Nigeria neighbouring states and external actors For Western actors Boko Haram is seen as part of the global war on terror and the fact that it has pledged allegiance to ISIS encourages this framing However as the chapters here discuss this is an over simplification of Boko Haram and the West needs to address the multiple dimension of Boko Haram This book will be of much interest to

students of terrorism and political violence insurgencies African politics war and conflict studies and IR in general

Estimating Impact Alexander Kott, Gary Citrenbaum, 2010-09-15 Sociological theories of crime include theories of strain blame crime on personal stressors theories of social learning blame crime on its social rewards and see crime more as an institution in conflict with other institutions rather than as in vicarious deviance and theories of control look at crime as natural and rewarding and explore the formation of institutions that control crime Theorists of corruption generally agree that corruption is an expression of the Patron Client relationship in which a person with access to resources trades resources with kin and members of the community in exchange for loyalty Some approaches to modeling crime and corruption do not involve an explicit simulation rule based systems Bayesian networks game theoretic approaches often based on rational choice theory and Neoclassical Econometrics a rational choice based approach Simulation based approaches take into account greater complexities of interacting parts of social phenomena These include fuzzy cognitive maps and fuzzy rule sets that may incorporate feedback and agent based simulation which can go a step farther by computing new social structures not previously identified in theory The latter include cognitive agent models in which agents learn how to perceive their environment and act upon the perceptions of their individual experiences and reactive agent simulation which while less capable than cognitive agent simulation is adequate for testing a policy's effects with existing societal structures For example NNL is a cognitive agent model based on the REPAST Symphony toolkit
