Young, 2021-01-08 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982 **International**

Cooperation Oran R. Young, 1989 The notion of regimes as institutions that shape international behavior has received much attention from scholars in the field of international relations as a way of understanding how sovereign states secure international cooperation Oran Young here seeks both to develop our theoretical grasp of international regimes and to expand the range of empirical applications of this line of analysis **Resource Regimes** Oran R. Young, 2023-04-28 This

title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982 **Institutions and the Control of Natural Resources** Enrique A. Environmental and Natural Resources Economics Steven Hackett, Sahan T. M. Dissanayake, 2014-12-18 Extensively revised and updated this popular text presents an accessible yet rigorous treatment of environmental and natural resources economics including climate change and the economics of sustainability Completely revised and updated the fourth edition now includes new figures and tables definitions to assist the reader and updated policy information New advances in the science economics and policy approaches to climate change have been integrated into essentially all new chapters on incentive regulation and global climate change This innovative textbook integrates economics with science and public policy in a balanced and accessible way that will be appreciated by students from disciplines ranging from economics and natural resources management to environmental studies and energy policy Theories of International Regimes Andreas

Hasenclever, Peter Mayer, Volker Rittberger, 1997-10-02 International regimes have been a major focus of research in international relations for over a decade Three schools of thought have shaped the discussion realism which treats power relations as its key variable neoliberalism which bases its analysis on constellations of interests and cognitivism which emphasizes knowledge dynamics communication and identities Each school articulates distinct views on the origins robustness and consequences of international regimes This book examines each of these contributions to the debate taking stock of and seeking to advance one of the most dynamic research agendas in contemporary international relations While the differences between realist neoliberal and cognitivist arguments about regimes are acknowledged and explored the authors argue that there is substantial scope for progress toward an inter paradigmatic synthesis **Ruling the Waves** Alan W. Cafruny, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California

Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987 **When Knowledge Is Power** Ernst B. Haas, 2024-06-28 Do governments seeking to collaborate in such international organizations as the United Nations and the World Bank ever learn to improve the performance of those organizations Can international organizations be improved by a deliberate institutional design that reflects lessons learned in peacekeeping the protection of human rights and environmentally sound economic development In this incisive work Ernst Haas examines these and other issues to delineate the conditions under which organizations change their methods for defining problems Haas contends that international organizations change most effectively when they are able to redefine the causes underlying the problems to be addressed He shows that such self reflection is possible when the expert generated knowledge about the problems can be made to mesh with the interests of hegemonic coalitions of member governments But usually efforts to change organizations begin as adaptive practices that owe little to a systematic questioning of past behavior Often organizations adapt and survive without fully satisfying most of their members as has been the case with the United Nations since 1970 When Knowledge Is Power is a wide ranging work that will elicit interest from political scientists organization theorists bureaucrats and students of management and international administration This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 *Managing the Frozen South* M. J. Peterson, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988 Banker to the Third World Barbara Stallings, 2024-06-04 By the end of 1985 Latin Americans owed their foreign creditors 368 billion That was nearly 1 000 for every man woman and child between the Rio Grande and Tierra del Fuego The debt represented more than half of the region's gross domestic product and interest payments alone consumed 36 percent of export revenues If profits are added to interest and the total compared to new capital inflows the drama of the situation becomes clear a real resource transfer from Latin American was under way More than three fourths of Latin America's debt was owed to several hundred commercial banks with headquarters in North America Europe and Japan Banker to the Third World examines why the loans that precipitated the 1985 debt crisis were made how these loans were similar to and different from other loans what solutions to the crisis would be effective and how such problems could be avoided in the future When originally published this title presented a new and timely analysis of the crisis today it serves as a

historical exploration that will give readers a better understanding of both Latin American economic history and more recent foreign debt crises This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987

Unequal Alliance Robin Broad,1988-04-06 In this seminal work U S development specialist Robin Broad chronicles the Philippine experiment with the structural adjustment model of development espoused by the World Bank and the International Monetary Fund

The Power of Ideology Emanuel Adler,2024-06-21 In this prodigiously researched book Emanuel Adler addresses the hotly contested issue of how developing nations can emerge from the economic and technological tutelage of the developed world Is the dependence of Third World countries on multinational corporations especially in the realm of high technology a permanent fixture of an inherently unequal relationship Or can it be managed by the developing nations for their benefit By a masterful comparative study of the development of science and technology in Argentina and Brazil the author discusses governmental policies that are effective in attaining autonomous technological development Professor Adler provides a useful corrective to the structural theories of development that have up to now prevailed in the study of international relations by demonstrating that intellectual and technological elites play a far more significant role in the success or failure of such governmental policies than has hitherto been recognized This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988

Driving a Bargain Richard F. Doner,2023-11-15 Driving a Bargain Automobile Industrialization and Japanese Firms in Southeast Asia explores the dynamics between developing nations and foreign investors in the context of automobile manufacturing Focused on Southeast Asia the book analyzes the national efforts of the Philippines Malaysia Indonesia and Thailand to establish domestic automobile industries These countries have pursued policies aimed at reducing dependency on foreign imports and building local manufacturing capacities By examining the interactions between ASEAN countries and largely Japanese auto firms the study highlights the challenges and opportunities these nations face in negotiating technology transfer market access and industrial autonomy The book presents a critical examination of the bargaining processes that shape these countries industrialization strategies Through comparative case studies the book challenges prevailing theories of foreign investment and dependency It critiques the structuralist approach to bargaining arguing for a more nuanced understanding of local leverage in manufacturing industries The study highlights the significance of local firms the role of the state and the political and economic conditions that determine bargaining success By exploring the interplay between the private sector and government in ASEAN nations

Driving a Bargain offers new insights into the potential for developing countries to increase their manufacturing capacity and achieve economic growth through strategic partnerships with foreign firms This work also contributes to the broader development literature by emphasizing the importance of public private coalitions in fostering sustainable industrial development This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991 From Marshall Plan to Debt Crisis Robert E. Wood, 2024-06-04 This book traces the evolution of concessional financing to Third World countries from its postwar origins in the Marshall Plan to the debt crisis that engulfed virtually the entire Third World in the early 1980s It documents the evolution of a system of aid provision of structured access to concessional external financing The central focus is on how this structure of access to aid has changed over time and shaped development options and choices in the Third World From this perspective the emergence of the debt crisis is closely connected to the role of aid in the world economy Although the debt crisis had other roots as well this book elucidates an important set of determinants generally overlooked within the systems of aid provision itself It further seeks to show that the debt crisis defines a new era not simply a set of discrete and extraordinary events between say Mexico s request for rescheduling in August 1982 and Argentina s coming to terms with the International Monetary Fund in September 1984 The debt crisis has profoundly altered the international environment that Third World countries face and the legacy of debt will continue to be a central focus of international relations and development choices for years to come This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987 *The Politicized Market Economy* Michael Barzelay, 2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1986

Toward a Sustainable Whaling Regime Robert Friedheim, 2016-06-01 **Global Environmental Politics** Ronnie D. Lipschutz, 2003-07-30 Traditional views of global environmental politics take the structures and relations of international politics as a given Solutions to environmental problems then must be products of concession negotiation and inevitable compromise a world of top down planetary management Lipschutz challenges students to question these conventional approaches He argues that much light can be shed on global environmental degradation if we look beyond the politics of conflict and cooperation and explore environmental problems from their very roots Using a

framework that accounts for the ontologies material conditions and power relations that structure global environmental problems Lipschutz is able to more effectively question attempts to clean up the globe and sustain the world's natural resources Throughout the text the author uses compelling cases to illustrate the effects of globalization and capitalism yet is careful to make the link between the local and the global to show how we as individuals are both consumers of goods and producers of pollution A powerful new approach How is the financing of a water system in Bolivia linked to long standing forestation practices in India Taking nothing for granted the root causes of major global environmental problems are exposed and subjected to rigorous analysis Lipschutz shows for instance how privatization operates in different global contexts with strikingly similar consequences In what ways are liberalism and realism actually two sides of the same coin Both make self interest of the individual and of the state key operating terms In a revealing comparison Lipschutz explores the limits of these dominant political models to effectively frame and solve environmental problems What kinds of political social and environmental practices bring about meaningful change By emphasizing the global impacts of local actions the text shows how attempts to control environmental problems may actually reproduce the very systems they are meant to ameliorate Combined with practical pedagogy Rich historical background helps contextualize contemporary issues Extensive suggested reading lists at the end of each chapter guide students to further research while tables and figures elegantly show data and concepts The emphasis on assessing the root causes of global environmental problems and models encourages critical thinking Students are also encouraged to rethink their own role in the global environmental system and to get involved in effective forms of social change

Water and Power Miriam R. Lowi, 1995-10-26 Why do states in arid regions fail to co operate in sharing water resources when co operation would appear to be in their mutual interest Through in depth analysis of the history and current status of the dispute over the Jordan River basin Miriam Lowi explores the answers to these critical questions

Integrated Governance and Water Basin Management Stefan Kuks, Hans Bressers, 2012-11-03 This book examines water management integration in the Netherlands Belgium France Spain Italy and Switzerland based on the European research project EUWARENESS Coverage includes 12 country specific case studies examining theory on water governance institutional regimes and property rights resulting in a tool for monitoring the progress of integrated water management at the basin level in EU member states or other countries

The Paradox of Plenty Terry Lynn Karl, 1997-10-10 In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft
