Resources Of Critique:

The Resources of Critique Alex Callinicos, 2006-04-17 Social criticism has enjoyed a renaissance in the past few years. The anti globalization protests at Seattle and Genoa and the great marches against the war in Iraq have put contestation of capitalism and imperialism back on the political and intellectual agenda. But how does social critique situate itself philosophically today after the marginalization of Marxism and the impact of postmodernism? In *The Resources of Critique* Alex Callinicos seeks to address this question systematically. He does so in the first part by surveying some of the most influential contemporary critical theorists: Alain Badiou, Jacques Bidet, Luc Boltanski, Pierre Bourdieu, Eve Chiapello, Jürgen Habermas, Antonio Negri, and Slavoj Žižek. The limitations of all these theorists' perspectives prompts Callinicos in the second part of the book to outline an alternative approach whose main elements are a critical realist ontology, a Marxist theory of social contradiction, and an egalitarian conception of justice. The main thrust of his argument is to show that Marx's critique of political economy remains inescapable for anyone seeking to challenge the existing world order, but only if it maintains an open but rigorous dialogue with other critical perspectives. *The Resources of Critique* is above all a contribution to this dialogue.

The Resources of Critique Alex Callinicos, 2006 *The Resources of Rationality* Calvin O. Schrag, 1992

Schrag has addressed the important problems put forth by thinkers ranging from Habermas to Lyotard and Deleuze and has confronted them openly and honestly. This work will be useful to all who wonder what to do about the largely negative results of postmodern thought. Joseph C. Flay: *The Resources of Rationality* addresses the postmodernist assault on the claim of reason and develops a refigured notion of rationality to meet the charges and challenges of postmodern thought. Calvin O. Schrag responds to the postmodernist indictment of the claims of reason by working out a fresh approach which he calls the transversal rationality of praxis. With the concept of transversality as a binding theme, Schrag identifies and delineates the function of three powerful resources of reason: critique, articulation, and disclosure. Cutting across multiple and changing discursive and social practices, transversal thinking as delineated by Schrag charts a new course between the classical and modern overdetermination of rationality and the dissolution of the rational subject in postmodern philosophy.

Sociological Paradigms and Human Resources Ken N. Kamoche, 2019-07-12 This title was first published in 2000. This book examines critically the theory and practice of Human Resource Management. It discusses some of the contemporary debates about the nature of Human Resource Management and attempts to offer conceptual clarity into this organizational phenomenon. The

book effectively captures both the theoretical and practical issues in Human resource management issues which are too often treated as separate. By examining Human Resource management with a variety of analytical lenses Ken Kamoché's book takes the reader on an enjoyable and intellectually stimulating paradigmatic journey. **Selected Water Resources**

to Post-Human Resources Peter Baofu, 2014-09-18 Are natural resources really so limited that as Mahatma Gandhi once famously said Earth provides enough to satisfy every man's need but not every man's greed? TE 2012 This limiting view of natural resources can be contrasted with an opposing view by John Maynard Keynes who summarized Say's Law as supply creates its own demand but then turned Say's Law on its head in the 1930s by declaring that demand creates its own supply so whenever a demand exists there will be resources to create the supply. EN 2012 Contrary to these opposing views and other ones as will be discussed in the book natural resources in relation to both diversity and discontinuity are neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe. Needless to say this challenge to the opposing views of natural resources does not mean that natural resources are unimportant or that those interdisciplinary fields related to natural resources like conservation biology environmental management ecological economics political ecology environmental ethics adaptive management genetic engineering Malthusianism and so on are not worth studying. Of course neither of these extreme views is reasonable. Rather this book offers an alternative better way to understand the future of natural resources especially in the dialectic context of diversity and discontinuity while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other. More specifically this book offers a new theory that is the resilient theory of natural resources to go beyond the existing approaches in a novel way. If successful this seminal project is to fundamentally change the way that we think about natural resources in relation to diversity and discontinuity from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate. *Religion and Sustainability: Interreligious Resources,*

Interdisciplinary Responses Rita D. Sherma, Purushottama Bilimoria, 2022-05-09 This volume brings sustainability studies into creative and constructive conversation with actions practices and worldviews from religion and theology supportive of the vision and work of the UN SDGs. It features more than 30 chapters from scholars across diverse disciplines including economics ethics theology sociology ritual studies and visual culture. This interdisciplinary content presents new insights for inhibiting ecospheric devastation which is inextricably linked to unsustainable financial societal racial geopolitical and cultural relationships. The chapters show how humanistic elements can enable the establishment of sustainable ways of thinking feeling and acting. This includes the aesthetic and emotive dimensions of life. The contributors cover such topics as empowering women and girls to systemically reverse climate change nurturing interreligious peace decolonizing landscapes

and promoting horticulture ecovillages equity and animal ethics Coverage integrates a variety of religious and theological perspectives These include Buddhism Judaism Hinduism Islam Christianity and other traditions To enable the restoration and flourishing of the ecosystems of the biosphere human societies need to be reimagined and reordered in terms of economic cultural religious racial and social equitability This volume illustrates transformative paradigms to help foster such change It introduces new principles practices ethics and insights to the discourse This work will appeal to students scholars and professionals researching the ethical moral social cultural psychological developmental and other social scientific impacts of religion on the key markers of sustainability **Proceedings of the 1991 Symposium on Systems Analysis in Forest**
