Johnson,2024-06-27 This timely examination of hydropower in Brazil brings nuance to energy debates centring social and environmental justice *The People's Own Landscape* Scott Moranda,2014-01-21 East Germany s Socialist Unity Party aimed to placate a public well aware of the higher standards of living enjoyed elsewhere by encouraging them to participate in outdoor activities and take vacations in the countryside Scott Moranda considers East Germany s rural landscapes from the perspective of both technical experts landscape architects biologists and physicians who hoped to dictate how

vacationers interacted with nature and the vacationers themselves whose outdoor experience shaped their understanding of environmental change As authorities eliminated traditional tourist and nature conservation organizations dissident conservationists demanded better protection of natural spaces At the same time many East Germans shared their government's expectations for economic development that had real consequences for the land By the 1980s environmentalists saw themselves as outsiders struggling against the state and a public that had embraced mainstream ideas about limitless economic growth and material pleasures *Practical Matter* Margaret C. Jacob, Larry Stewart, 2004 From 1687 the year when Newton published his Principia to the Crystal Palace Exhibition of 1851 science gradually became central to Western thought and economic development The book examines how despite powerful opposition on the Continent a Newtonian understanding gained acceptance and practical application The Paradox of Ukrainian Lviv Tarik Cyril Amar, 2015-11-17 The Paradox of Ukrainian Lviv reveals the local and transnational forces behind the twentieth century transformation of Lviv into a Soviet and Ukrainian urban center Lviv's twentieth century history was marked by violence population changes and fundamental transformation ethnically linguistically and in terms of its residents self perception Against this background Tarik Cyril Amar explains a striking paradox Soviet rule which came to Lviv in ruthless Stalinist shape and lasted for half a century left behind the most Ukrainian version of the city in history In reconstructing this dramatically profound change Amar illuminates the historical background in present day identities and tensions within Ukraine *The Illusory Boundary* Martin Reuss, Stephen H. Cutcliffe, 2010-08-06 This compelling new book challenges the view that a clear and unwavering boundary exists between nature and technology Rejecting this dichotomy the contributors show how the history of each can be united in a constantly shifting panorama where definitions of nature and technology alter and overlap Climate Change and the Future of Democracy R. S. Deese, 2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons *Digital Transformations of the Public Arena* Andreas Jungherr, Ralph Schroeder, 2022-01-27 Digital technologies have changed the public arena but there is little scholarly consensus about how they have done so This Element lays out a new framework for the digitally mediated public arena by identifying structural changes and continuities with the pre digital era It examines three country cases the United States Germany and China In these countries and elsewhere the emergence of new infrastructures such as search engines and social media platforms increasingly mediate and govern the visibility and reach of information and thus reconfigure the transmission belt between citizens and political elites This shift requires a rethinking of the workings and

dysfunctions of the contemporary public arena and ways to improve it **Environmental Governance** Arild
