Responding To The New Affirmative Action Climate:

Responding to the New Affirmative Action Climate Donald D. Gehring, 1998-10-13 Although the term affirmative action stirs hot debate wherever it is mentioned nearly everyone in higher education would agree that students learn a great deal from one another and that an economically ethnically spiritually and culturally diverse student body provides a positive educational experience This timely issue of *New Directions for Student Services* explores how to achieve that educational goal while complying with confusing and sometimes conflicting laws and judicial pronouncements The authors clarify the law as it relates to affirmative action in admissions and financial aid discuss alternatives to race based methods for achieving diversity and report on a national study of student affairs programs that have successfully used affirmative action This is the 83rd issue of the quarterly journal *New Directions for Student Services* For more information on the series please see the Journals and Periodicals section

Affirmative Action and the Meanings of Merit Bruce P. Lapenson, 2009-03-16 The public defenses of affirmative action have not convinced the majority of Americans that the policy is necessary and just The notion that merit and qualifications for academic places and jobs can be judged solely by test scores and grades is seriously called into question by the numerous studies analyzed in *Affirmative Action and the Meanings of Merit* These studies show that many affirmative action beneficiaries have succeeded in higher education and various occupations despite not having the required test scores or GPA therefore exposing reified concepts of merit as intellectually murky Public defenders of affirmative action must point to these realities to convince more Americans that such policies are ethical and contribute to the goal of a diverse and fair minded society

Governmental Response to Environmental Challenges in Global Perspective Joseph G. Jabbara, O. P. Dwivedi, 1998 In our drive to improve human standards of living we have paradoxically paid scant attention to the need for clean air and water the impact of acid rain on agriculture lakes and rivers the effect of pollutants on the ozone layer the safe disposal of hazardous wastes and the relationship between population growth and the environment It seems that every time governments are faced with an apparent choice between economic development and the protection of the environment priority is always given to the former Short term plans dictated by canons of political survival and expediency always seem to take precedence over long term strategies with politicians and decision makers deftly relegating environmental concerns to the realm of rhetoric This book is an effort to better understand the problems faced by our global ecosystems It is also the result of the authors deep commitment to urge both citizens and their leaders the world over to work together for a better protection of the environment so that our planet may be saved for the present and for future generations

Profitability of Domestic Energy Company Operations, Hearing Before the Finance Committee, 93-2, February 13, 14, 1974 United States. Congress. Senate. Finance, 1974 Undermining Racial Justice Matthew Johnson, 2020-04-15 Over the last sixty years administrators on college campuses nationwide have responded to black campus activists by making racial inclusion and inequality compatible This bold argument is at the center of Matthew Johnson's powerful and controversial book Focusing on the University of Michigan often a key talking point in national debates about racial justice thanks to the contentious Gratz v Bollinger 2003 Supreme Court case Johnson argues that UM leaders incorporated black student dissent selectively into the institution's policies practices and values This strategy was used to prevent activism from disrupting the institutional priorities that campus leaders deemed more important

than racial justice. Despite knowing that racial disparities would likely continue, Johnson demonstrates that these administrators improbably saw themselves as champions of racial equity. What Johnson contends in *Undermining Racial Justice* is not that good intentions resulted in unforeseen negative consequences but that the people who created and maintained racial inequities at premier institutions of higher education across the United States firmly believed they had good intentions in spite of all the evidence to the contrary. The case of the University of Michigan fits into a broader pattern at elite colleges and universities and is a cautionary tale for all in higher education. As Matthew Johnson illustrates, inclusion has always been a secondary priority, and as a result, the policies of the late 1970s and 1980s ushered in a new and enduring era of racial retrenchment on campuses nationwide.
