Reconciling Responsibility with Reality Johannes Block, 2023-08-26 This book explores the issue of leadership criminality from a new angle by comparing two highly relevant modes of responsibility By contrasting individual criminal responsibility for ordering international crimes with indirect perpetration through an organisation it shows the doctrinal weaknesses of the latter and outlines the much overlooked advantages of the former The volume analyses the development of both forms of responsibility looking at their origins and their reception in academia and practical use in jurisprudence The history of indirect perpetration through an organisation Organisationsherrschaft is portrayed from its German academic origin through German jurisprudence to the reception of the doctrine at the International Criminal Court By comparing the doctrine's stages of evolution the book sheds light on the different aspects of the various models of indirect perpetration through an organisation and carves out general and fundamental criticism of it The characteristics of ordering liability are explored in depth through an analysis of jurisprudence of the Nuremberg subsequent trials the ad hoc tribunals and the International Criminal Court This historic and doctrinal comparison reveals a well defined and to date much neglected mode of responsibility with enormous potential for the adjudication of leadership figures in the ambit of international criminal law and only one conclusion can follow from this analysis it calls for practitioners and academics to leave the well trodden paths of national criminal law doctrine and embrace truly international modes of liability such as the ordering of a crime This volume in the ICJ series provides practitioners researchers and students with a detailed account of forms of leadership

The Call to Personhood Alistair I. McFadyen, 1990-10-26 This book is an attempt to answer the question What is a person Although the answer is given in largely theoretical terms the author is concerned primarily with practice what does it mean to live as a human person in community with others What personal social and political practices are required by personal being The central insight that human identity is most productively understood in communicational terms leads to an account of personhood which is both compassionate and which at the same time keeps sight of the particularity of each individual

The Pragmatics of Requests and Apologies Elizabeth Flores Salgado, 2011 The purpose of this research is to analyse the pragmatic development of language groups at different proficiency levels and to investigate the relationship between interlanguage pragmatics and grammatical competence For this study 36 native Spanish speaking EFL learners at different proficiency levels were asked to respond in English to 24 different situations that called for the speech acts of request and apology Results showed three important aspects The first

finding suggested that basic adult learners possess a pragmatic knowledge in their L1 that allows them to focus on the intended meaning and in most cases to assemble an utterance that conveys a pragmatic intention and satisfies the communicative demands of a social situation The second finding revealed that there are two essential conditions to communicate a linguistic action the knowledge of the relevant linguistic rules and the knowledge of how to use them appropriately and effectively in a specific context The findings further suggested that advanced learners possess the grammatical knowledge to produce an illocutionary act but they need to learn the specific L2 pragmatic conventions that enable them to know when to use these grammatical forms and under which circumstances Management Analysis at the
